Power And Community Dissenting Essays In Political Science:

Power and Community Philip Green, Sanford Levinson, 1970 Reappraising Political Theory Terence Ball, 1995

Machiavelli Hobbes Rousseau Mill and Marx and Foucault what really links these and other classic political theorists Not argues Terence Ball their common status as dead white European males but instead the exciting and compelling way in which they can speak to us today Professor Ball begins by setting out his liberating view of the way we should approach classic texts Using an approach that is both problem driven and methodologically pluralist Ball offers new readings and reappraisals of key authors and classic works in political theory Throughout he argues that the importance of the great texts lies in their repeated reinterpretation in the light of problems that arise for present day readers This tour de force always entertaining and eclectic focuses on the core problems surrounding many of the major thinkers Was Machiavelli really amoral Why did language matter so much to Hobbes and why should it matter to us Are the roots of the totalitarian state to be found in Rousseau Were the utilitarians sexist in their view of the franchise Written in lively and accessible style the book will provoke debate among students and scholars alike Throughout Terence Ball shows just how exciting and important political theory can be

Purcell Jr., 2014-04-23 Widely acclaimed for its originality and penetration this award winning study of American thought in the twentieth century examines the ways in which the spread of pragmatism and scientific naturalism affected developments in philosophy social science and law and traces the effects of these developments on traditional assumptions of democratic theory

The Tragedy of Political Science David M. Ricci, 1984-01-01 This book is both a comprehensive review and a thoughtful critique of the development of political science as an academic discipline in this century David Ricci eloquently describes the tragic dilemma of political science in America when political scholars deal with politics in a scientific fashion they reveal facts that contradict democratic expectations when the same scholars seek to justify those expectations their moral arguments carry little professional weight

Jacket The Oxford Handbook of Political Ideologies Michael Freeden, Lyman Tower Sargent, Marc Stears, 2013-08-15 This is the first comprehensive volume to offer a state of the art investigation both of the nature of political ideologies and of their main manifestations The diversity of ideology studies is represented by a mixture of the range of theories that illuminate the field combined with an appreciation of the changing complexity of concrete ideologies and the emergence of new ones Ideologies however are always with us The Handbook is divided into three sections The first is divided into three sections The first reflects some of the latest thinking about the development of ideology on an historical dimension from the standpoints of conceptual history Marx studies social science theory and history and leading schools of continental philosophy The second includes some of the most recent interpretations and theories of ideology all of which are sympathetic in their own ways to its exploration and close investigation even when judiciously critical of its social impact This section contains many of the more salient contemporary accounts of ideology The third focuses on the leading ideological families and traditions as well as on

some of their cultural and geographical manifestations incorporating both historical and contemporary perspectives Each chapter is written by an expert in their field bringing the latest approaches and understandings to their task The Handbook will position the study of ideologies in the mainstream of political theory and political analysis and will attest to its indispensability both to courses on political theory and to scholars who wish to take their understanding of ideologies in new directions

Discipline and History James Farr,Raymond Seidelman,1993 Historical panorama of views about the state of political science as a discipline

Globalization and the Decline of Social Reform Gary Teeple,2000-01-01 Globalization is the coming of the triumph of capitalism the growing ascendancy of economics over politics of corporate demands over public policy of private over public interest It represents the approaching completion of the capitalization of the world carried out by self generating capital in the form of transnational corporations within an increasingly coherent transnational regulatory regime Neo liberal policies at the national level argues the author represent the policy side of globalization the political requirements of global capital the harmonization of the national with the global They mark the transition between two eras from a world of national corporations and nation states to a world of transnational corporations and supranational regulatory agencies The author examines the postwar conditions that gave rise to the modern welfare state and the politics of social democracy throughout the industrial world He traces the transformation of these conditions in the 1970s with the coming of a computer based mode of production and the consequent necessity for global relations of production In the face of global assertions of the rights of corporate private property he makes the case that the world s subordinate classes and peoples will have to create global means of resistance

Yudof,2009-04-03 Government's ever increasing participation in communication processes Mark Yudof argues threatens key democratic values that the First Amendment was designed to protect Government control over the exchange of ideas and information would be inconsistent with citizen autonomy informed consent and a balanced and mutually responsive relationship between citizens and their government Yet the danger of government dominance must be weighed against the necessary role of government in furthering democratic values by proposing and promotion policies and by disseminating information and educating citizens Restraints on government's ability to control communications processes are desirable but excessive or inappropriate restrictions threaten democracy Professor Yudof identifies a number of formal and informal checks on government as disseminator withholder and controller of ideas and information Where more controls are needed the strengthening of pluralism and legislative oversight is generally the answer Constitutional redress in the courts should be sought only in extreme instances he cautions to avoid judicial interference with legitimate policy objectives

issues of citizenship and political representation the ambiguities of identity politics and the problems in legislating for sexual equality the readings provide an exciting overview of recent developments This outstanding collection will be essential reading for any feminist who has doubted the importance of political studies and any student of politics who has doubted the relevance of feminism Carole Pateman Terrell Carver, Samuel Chambers, 2013-03-01 Carole Pateman's writings have been innovatory precisely for their qualities of engagement pursued at the height of intellectual rigour This book draws from her vast output of articles chapters books and speeches to provide a thematic yet integrated account of her innovations in political theory and contributions to the politics of policy making The editors have focused on work in three key areas Democracy Pateman's perspective is rooted in a practical perspective enquiring into and speculating about forms of participation over and above the traditional exclusions through which representative systems have been variously constructed over time Her work pushes hard on theorists and politicians who make easy assumptions about apathy and public opinion who bracket off the workplace and the home and who see politics only in partisan activity voter behaviour and governmental policy Women Pateman's innovatory and still cited work on participation antedates the feminist revolution in political theory and many of the practical struggles that developed through the later 1970s While woman centred her concerns were always worked through larger conceptions of social class economic advantage power differentials liberal individualism and contracts including marriage Her feminism was innovative in political theory and within feminism itself As a feminist Pateman defies categorization and her concepts of the sexual contract and Wollstonecraft's dilemma are canonical Welfare Pateman's innovation here is an integration of welfare issues in particular the proposals for a basic income or for a capital stake into her broad but always rigorous conception of democracy This is argued through in terms of citizenship taken as the result of a social contract In that way Pateman puts liberalism itself through an imminent critique drawing in the practicalities and risks of life in late capitalist societies Her theory as always is political taking in neo liberal attacks on welfare states and the stark realities of international inequalities Pateman's career achievements in democratic and feminist theory are brought productively to bear on debates that would otherwise occur in more limited and less provocative academic and political contexts Routledge Library Editions: Organizations (31 vols) Various, 2021-12-02 Re issuing volumes originally published between 1949 and 1995 this 31 volume set examines the theory and behaviour of organizations Topics covered include the sociology of work leadership and organizations politics at work theory and practice of company organization patterns of business organization company strategy and organizational design *The Artist and Political Vision* Benjamin R. Barber, Michael J. Gargas McGrath, Art and politics are often regarded as denizens of different realms but few artists have been comfortable with the notion of a purely aesthetic definition of art The artist has a public and thus political vision of the world interpreted by his art no less than the statesman and the legislator have a creative vision of the world they wish to make The sixteen original essays in this volume bear eloquent witness to this interpenetration of art and politics Each

confronts the intersection of the aesthetic and the social each is concerned with the interface of poetic vision and political vision of reflection and action They take art in the broadest sense ranging over poets dramatists novelists essayists and filmmakers Their focus is on art and its political dilemmas not simply on the artist They consider the issues raised for politics and culture by alienation violence modernization technology democracy progress and revolution And they debate the capacity of art to stimulate social change and incite revolution the temptations of social control of culture and of political censorship the uncertain relationship between art and history the impact of economic structure on artistic creation and of economic class on artistic product the common ground between art and legislation and between creativity and control
