**Air University Library Index to Military Periodicals**, 1991 *The Chinese Armed Forces in the 21st Century*, 1999 The debate about China and Taiwan is re-emerging in the United States. The accidental bombing of the Chinese Embassy in Belgrade of course put on the front burner the way that nationalistic fervor has grown in China at least some of it as a result of manipulation by the Communist Party. President Lee Teng-hui's comments about state to state relations between Taiwan and the mainland raised the temperature of relations across the strait and among the three concerned parties: China, the United States, and Taiwan. China threatened, China postured, and China ran political campaigns against the United States and Lee. But the questions of military capability, security policy, and intent are rarely treated seriously. This book is a serious look at the armed forces of China and how they will evolve.

**Motherland** David R. Marples, 2014-10-13 Motherland tells the dramatic story of the rise and fall of the Soviet Union. From Lenin's virtual coup in November 1917 to Boris Yeltsin's ruthless takeover of power in 1991, the book culminates with a new view of the Yeltsin years. David Marples focuses on the evolution of Russia during the Soviet period and the attempt to harness Russian nationalism to the avowed Soviet mission of promoting World Communism. Along the way, he analyses some of the more intensive historical debates and uncovers some of the myths perpetuated by state propaganda, especially those associated with the Great Patriotic War.

**The Golden Age of the U.S.-China-Japan Triangle, 1972-1989** Ezra F. Vogel, Ming Yuan, Akihiko Tanaka, 2020-03-23 A collaborative effort by scholars from the United States, China, and Japan, this volume focuses on the period 1972-1989 during which all three countries brought together by a shared geopolitical strategy established mutual relations with one another despite differences in their histories, values, and perceptions of their own national interest. Although each initially conceived of its political and security relations with the others in bilateral terms, the three in fact came to form an economic and political triangle during the 1970s and 1980s. But this triangle is a strange one whose dynamics are constantly changing. Its corners are the three countries and its sides are the three bilateral relationships, which are unequal while the capacity of the three to work together has varied considerably as the economic and strategic positions of the three have changed and post-Cold War tensions and uncertainties have emerged.

**Area Bibliography of China** Richard T. Wang, 1997 A combination of scholarly, commercial, and popular interests has generated a large quantity of literature on every aspect of Chinese life during the past two decades. This bibliography reflects these combined interests; it is broken up into sections by subject headings and cross references refer the researcher to related topics.

**System Effects** Robert Jervis, 1998-12-28 Based on more than three decades of observation, Robert Jervis concludes in this provocative book that the very foundations of many social science theories, especially those in political science, are faulty. Taking insights from complexity theory as his point of departure, the author observes that we live in a world where things are interconnected where unintended consequences of our actions are

unavoidable and unpredictable and where the total effect of behavior is not equal to the sum of individual actions Jervis draws on a wide range of human endeavors to illustrate the nature of these system effects He shows how increasing airport security might actually cost lives not save them and how removing dead trees ostensibly to give living trees more room may damage the health of an entire forest Similarly he highlights the interconnectedness of the political world as he describes how the Cold War played out and as he narrates the series of events with their unintended consequences that escalated into World War I The ramifications of developing a rigorous understanding of politics are immense as Jervis demonstrates in his critique of current systemic theories of international politics especially the influential work done by Kenneth Waltz Jervis goes on to examine various types of negative and positive feedback bargaining in different types of relationships and the polarizing effects of alignments to begin building a foundation for a more realistic more nuanced theory of international politics System Effects concludes by examining what it means to act in a system It shows how political actors might modify their behavior in anticipation of system effects and it explores how systemic theories of political behavior might account for the role of anticipation and strategy in political action This work introduces powerful new concepts that will reward not only international relations theorists but also all social scientists with interests in comparative politics and political theory

**Terrorist Threats to the United States** United States. Congress. House. Committee on Armed Services. Special Oversight Panel on Terrorism,2000      The Rise and Fall of the Brezhnev Doctrine in Soviet Foreign Policy Matthew J. Ouimet,2003-01-01 Ouimet argues that the now famous reforms of Soviet bloc policy of the mid 1980s were not the instigation but rather the climax of a fundamental transformation in Soviet policy toward Eastern Europe that had its origins in the Brezhnev era      The Cultural Revolution Frank Dikötter,2017-06-06 The concluding volume following Mao s Great Famine and The Tragedy of Liberation in Frank Dikötter s award winning trilogy chronicling the Communist revolution in China After the economic disaster of the Great Leap Forward that claimed tens of millions of lives from 1958 1962 an aging Mao Zedong launched an ambitious scheme to shore up his reputation and eliminate those he viewed as a threat to his legacy The Cultural Revolution s goal was to purge the country of bourgeois capitalistic elements he claimed were threatening genuine communist ideology Young students formed the Red Guards vowing to defend the Chairman to the death but soon rival factions started fighting each other in the streets with semiautomatic weapons in the name of revolutionary purity As the country descended into chaos the military intervened turning China into a garrison state marked by bloody purges that crushed as many as one in fifty people The Cultural Revolution A People s History 1962 1976 draws for the first time on hundreds of previously classified party documents from secret police reports to unexpurgated versions of leadership speeches After the army itself fell victim to the Cultural Revolution ordinary people used the political chaos to resurrect the market and hollow out the party s ideology By showing how economic reform from below was an unintended consequence of

a decade of violent purges and entrenched fear The Cultural Revolution casts China's most tumultuous era in a wholly new light

The Proliferation Puzzle Zachary S. Davis, Benjamin Frankel, 2020-12-01 Originally published in 1993 this volume was unique in its scope and approach Unlike most literature on nuclear weapons proliferation at the time the essays in this volume offer theoretical discussions and suggest testable hypotheses about the causes and effects of nuclear weapons proliferation The proliferation of nuclear weapons is an ideal subject for social science scholarship and such scholarship is especially timely now Among the topics discussed in The Proliferation Puzzle are The building of nuclear weapons is a complex task touching upon many of the subjects of study at the core of social science and international relations Nuclear weapons may be acquired as a hedge against external threat for reasons of national prestige or as a result of pressures by domestic coalitions among scientists bureaucrats and the military They may be sought for defensive purposes or to support hegemonic aspirations Nuclear weapons also raise questions about civilian command and control especially in crisis situations During the last two decades the acquisition of nuclear weapons has been proscribed by the non proliferation regime The decisions countries made about acquiring these weapons and the manner they chose to build them serve as a test of the efficacy of this particular regime and of international regimes more generally Nuclear weapons were introduced at the time bipolarity became the international order As the world moves away from bipolarity there is a need to answer questions such as What would be the effect of nuclear weapons in a multipolar order How will the spread of nuclear weapons affect the distribution of capabilities among states If nuclear weapons spread to additional countries will they enhance stability or exacerbate instability Can the spread of these weapons be managed or controlled This book brings together scholars from different schools within international relations and the social sciences to address the question of why nuclear weapons spread A disciplined rigorous examination of proliferation is important not only for scholarship but also for informed policymaking The purpose of social science is to formulate hypotheses and devise theories that advance our understanding of society and aid in the fashioning of enlightened policy The essays in this volume show how explicit hypotheses about the causes and consequences of nuclear weapons proliferation provide a deeper understanding of the problem and suggest specific theory informed policy recommendations
