## **Power And Interpersonal Relations:**

Power and Interpersonal Relations Wally D. Jacobson, 1972      **Economics and Power** Giulio Palermo, 2016-06-03 In the economic debate power is defined and studied mainly as an interpersonal relation occurring out of perfect competition This is a consequence of the combination of methodological individualism and the assumption of competition as a natural and everlasting coordinating mechanism operating without any sort of coercion This methodology however is not adequate to analyze the forms of social coercion that characterize capitalism Economics and Power criticizes the main theories of power developed in economic literature analyzing ultraliberal contractualism to radical political economics and ultimately suggesting a Marxist conception of power and coercion in capitalism Palermo's ontological argument is rooted in the philosophy of critical realism This unique volume presents his main finding as being that the essential coercive mechanism of capitalism is competition Capitalist power is not caused by a lack of competition but by the central role it plays in this mode of production Following this the chapters reconstruct a Marxian conception of power where it is analyzed as a social relation and argues that perfect competition does in fact exist under the disguise of capitalist power This book criticizes the construct of power and the underlying ideas surrounding perfect competition This book is of interest to those who study political economy as well as economic theory and philosophy      **Gender, Power, and Communication in Human Relationships**

*Informal Economies and Power* Anna Danielsson, 2018-10-26 The global ubiquity of informal economic activities has turned informality into a key policy question not least in international peace and state building This book explores a core aspect of economic informality its resilience despite comprehensive international anti informality operations Using Kosovo as an illustrative case Danielsson suggests that to understand the resilience of informality two distinct areas of practice need to be studied in conjunction rather than separately The first concerns the professional practices enacted by international organisations in their attempts to formalise the informal economy in Kosovo The second area of practice concerns the everyday informal economic practices of social agents in Kosovo To study these areas of practice at their junction Danielsson uses Pierre Bourdieu s concept of symbolic power and argues that in post conflict Kosovo the distinct practices have become interwoven and co constitutive of a novel ordering and meaning of informality The resilience of the informal thus plays out through while undermining and reinforcing the need of the international anti informality operations Including scholarship from global governance global political economy and social theory this book s original perspective on informal economies and power will appeal to scholars and professionals located in peace studies development studies and the field of international relations *Persuasion in Your Life* Shawn T. **Sociology of Power** Roderick Martin, 2024-01-15 First published in 1977 The Sociology of Power presents a broad comparative study in the sociology of domination by placing empirical research in political and industrial sociology in a

comprehensive theoretical framework derived from Marxism and social exchange theory Roderick Martin argues that conventional definitions of political sociology are no longer relevant having been replaced by a revival of interest in wider problems which need to be approached from new theoretical positions He contends that what is needed is a more general definition based on the analytical concepts of sociological theory Three initial general chapters locate the study within the social action tradition and discuss problems of definition and measurement in detail The major part of the book examines the distribution of power under different systems of labour exploitation slavery feudalism and especially capitalism Professor Martin sees power as most concentrated in slavery most dispersed in capitalism and shows the extent and importance of this dispersal by a detailed discussion of power relations within industrial and political organizations including trade unions and a critique of contemporary elitist theories By reorienting political sociology around the concept of power and by analyzing the conventionally distinct fields of industrial and political sociology within a common theoretical framework Roderick Martin offers a persuasive redefinition of the sociology of politics This is a must read for scholars and researchers of sociology
