Apocalyptic Phenomenology Balázs M. Mezei,2025-11-28 This book provides a detailed view of the author's conception of apocalyptic phenomenology referring to the revelatory and self-disclosing nature of phenomenological thinking a thinking that is central to our philosophical traditions today The concept of apocalyptic phenomenology i.e. a phenomenological theology that discloses the ultimate ground of being God in the form of divine revelation is original At the same time it is rooted in the phenomenological tradition of Offenbarung revelation revealing as the basic feature of phenomena In the author's view reality is self-disclosing apocalyptic and thus he explains the connections between the original biblical notion of apocalupsis and the important developments of our philosophical traditions leading up to the theological turn of phenomenology The chapters are framed around a focus on newness and engage with the work of key thinkers such as Edmund Husserl Martin Heidegger Paul Ricoeur Hans Urs von Balthasar and Anton Günther Apocalyptic Phenomenology will be of interest to scholars of both theology and philosophy

Phenomenology Dermot Moran,Lester E. Embree,2004 This set reprints the essential scholarship published in the field It includes a general introduction by the editors as well as individual volume introductions exploring and contextualising the main themes of the comprehensively covered tradition This is a key point of reference for anyone researching the phenomenological tradition

Beyond Tithing Stuart Murray,2011-12-19 Tithing is biblical but not Christian So asserts Dr Stuart Murray in this radical examination of the contemporary practice of tithing in which the author comes to some surprising conclusions Stuart Murray clearly explains tithing in the Old Testament and in Christian history but then probes further asking penetrating questions such as Is tithing Christian Did Jesus tithe Does tithing function as a regressive tax burdening the poor while the rich get richer Does tithing lead to a legalistic approach that alienates us from Jesus The author suspects that a lot of the current lack of interest in the church stems from deep-seated memories of the church as oppressive uncreative and money-grabbing In response we should therefore learn not to calculate percentages but explore creative ways of developing communities of justice and generosity that are good news to the poor Beyond Tithing will stimulate your thinking and challenge the dominant influence of the practice of tithing as the model for Christian stewardship

Radicalism In The Contemporary Age, Volume 1 Seweryn Bialer,Sophia Sluzar,2019-08-16 This volume Sources of

Contemporary Radicalism begins with Seweryn Bialer's examination of the definitional aspects of radicalism as well as with the identification of specific contemporary sources of the radical impulse and the social groups that are the carriers of radicalism within society. In the next two chapters Seymour Lipset and Stanley Rothman consider the case of the United States. Lipset asks anew the question posed by Werner Sombart at the beginning of this century: Why is there no socialism in the United States? From the perspective of a century of literature addressed to this question, he provides his own critique and explanation. Rothman considers the relatively new phenomenon of student radicalism in the United States and, on the basis of interviews with student activists and results of tests they agreed to take, he offers hypotheses concerning their psychological motivation. Sidney Tarrow's chapter presents a comparison and contrast of the societal sources contributing to the growth of radical movements in post-World War II France and Italy. Henry Landsberger, in his chapter, concentrates on one societal group, the peasantry. Landsberger addresses the methodological issue that arises in defining peasant discontent as radicalism and examines what it is that provides a new dimension to peasant discontent in modern times. In the final chapter William Overholt presents a valuable interpretative survey of the literature on radicalism.

Authentic Reconstruction John Bold, Peter Larkham, Robert Pickard, 2017-12-14 Notions of authenticity lie at the heart of many questions about heritage and identity in the built environment. These questions are most pertinent when buildings have been destroyed in disaster or war and the built fabric is being reconstructed to reinstate traditional or historic appearances in place of what was lost. *Authentic Reconstruction* examines this idea of reconstruction using it as a prompt to examine a range of deeper issues on heritage and the built environment. From post-WWII reconstruction programmes through to the rebuilding of historic cultural landscapes lost in natural disasters, this collection of essays by heritage specialists provides a wide range of case studies and discussions. Each presents responses to crises and lessons learned in order to extrapolate general guidelines for future actions by politicians, architects and planners in reconstructing buildings. The book also looks beyond disaster and war, noting how authenticity bears on political intentions and image building, exploring how reconstruction is used to tell a political or historical story, so conditioning the ways in which the built environment is perceived and appreciated by its users. This is not just about the buildings as bricks and mortar, but about perceptions of identity and the social and historical values which buildings and spaces embody for a richly diverse population. This book will be valuable to all who are concerned with heritage as practitioners or consumers, particularly those concerned with reconstruction and the creation of authentic places and experiences: architects, architectural historians, town planners, preservationists, conservationists and those involved in heritage management and material culture.

Grasping Truth and Reality Donald Le Roy Stults, 2008-08-01 When Leslie

Newbigin returned to Britain in 1974 after years of missionary service he observed that his homeland was as much a mission field as India where he had spent the majority of his missionary career He concluded that the Western world needed a missionary confrontation Instead of the traditional approach to missions however Newbigin realized that the Western world needed to be confronted theologically From his earliest days at Cambridge University Newbigin developed certain theological convictions that shaped his understanding of the Christian faith Newbigin utilizes these theological convictions as criteria for evaluating the belief system of Western culture and for providing an answer to Western culture's dilemma It is Newbigin's contention that the West is suffering from a loss of purpose because at the time of the Enlightenment it rejected a belief system that gave it purpose This was also a belief system that made it uniquely different from the rest of the world particularly Asia The Enlightenment reintroduced humanism and dualism into Western culture which resulted in the loss of purpose and the rise of skepticism Modern science and the scientific method in the form of scientism added to the problem making human reason the measure of truth and limiting facts to only that which could be verified through controlled experiment Newbigin's solution is to reintroduce the Christian belief system into Western culture in order to restore purpose and truth to Westerners and to put them into contact with true reality through Jesus Christ He desires to do this in the context of both modernism and post modernism This book will discuss Newbigin's theological convictions and how they factored into both his critique of and his solution for Western culture's spiritual and worldview problems

Making Strange
Herbert Grabes, 2008 This compact indispensable overview answers a vexed question Why do so many works of modern and postmodern literature and art seem designed to appear strange and how can they still cause pleasure in the beholder To help overcome the initial barrier caused by this strangeness the general reader is given an initial non technical description of the aesthetic of the strange as it is experienced in the reading or viewing process There follows a broad survey of modern and postmodern trends illustrating their staggering variety and making plain the manifold methods and strategies adopted by writers and artists to make it strange The book closes with a systematic summary of the theoretical underpinnings of the aesthetic of the strange focussing on the ways in which it differs from both the earlier aesthetic of the beautiful and the aesthetic of the sublime It is made amply clear that the strangeness characteristic of modern and postmodern art has ushered in an entirely new third kind of aesthetic one that has undergone further transformation over the past two decades Beyond its usefulness as a practical introduction to the aesthetic of the strange the present study also takes up the most recent cutting edge aspects of scholarly debate while initiates are offered an original approach to the theoretical implications of this seminal phenomenon
