 Sławomir Koziół,2022-09-07 Futures of the Human Subject focuses on the representation of the effects of technology use on
 human subjectivity in several recent near future science fiction novels Sharing the idea that human subjects are constructed
 in the world in which they exist this volume inscribes itself in the wider field of posthumanism which contests the liberal
 humanist notion of people as self contained autonomous agents At the same time it is the first substantial study of literary
 representations of the human subject carried out within the conceptual framework of Foucault inflected philosophy of
 technical mediation which examines the nature of the relation between people and specific technologies as well as the way in
 which this relation affects human subjectivity As such the book may help readers to exercise more effective control over the
 way in which they are constituted as subjects in this technologically saturated world *Rainbow Facts* Raina

 understanding these processes enhances appreciation for the natural world and the scientific principles that govern it The
 book begins with the nature of light explaining its behavior as both a wave and a particle before delving into rainbow
 formation It explains how sunlight interacts with raindrops leading to the separation of light into its constituent colors
 Subsequent chapters explore different types of rainbows detailing the atmospheric conditions and light interactions that give
 rise to each including double rainbows with their reversed colors and Alexander s band This approach offers depth for those
 curious about the science behind rainbows With a clear engaging tone Rainbow Facts is accessible to general readers
