The 2nd Edition** Andrea O'Reilly, 2021-04-04 The 2nd edition includes a new preface that considers

how matricentric feminism in positioning mothering as a verb affords a gender neutral understanding of motherwork and allows for an appreciation of how motherwork is deeply gendered and how this may be challenged and changed through empowered mothering The book argues that the category of mother is distinct from the category of woman and that many of the problems mothers face are specific to women's role and identity as mothers Indeed mothers are oppressed under patriarchy as women and as mothers Consequently mothers need a feminism of their own one that positions mothers concerns as the starting point for a theory and politic of empowerment O'Reilly terms this new mode of feminism matricentric feminism and the book explores how it is represented and experienced in theory activism and practice **1,037 Practice**

Handel, 2009-01-01 Social welfare has a three thousand year history in Western society This book offers a sociological framework that provides conceptual order to the countless details of that history while highlighting its essentials Social welfare in all its forms is based on one central concept help But there are many versions of help and multiple debates about those versions The outcomes of some debates have led to withholding help and these outcomes are an inescapable part of this domain in the past and in the present The major versions their development and the debates are carefully examined in this volume Social Welfare in Western Society argues that in history five basic concepts of help have emerged These five explored and developed are charity based on a relationship between private donors and recipients public welfare based on a relationship between the state and its recipients social insurance based on a relationship between the state and beneficiaries of its programs social service based on people skilled in interaction providing skill based time to their clients mutual aid groups sometimes misleadingly called self help groups whose members are simultaneously helpers and those helped There are multiple versions of each of these five concepts now usually referred to as social policy issues There are fierce disagreements about what is helpful and which supposed forms of help are harmful to the wider society The book concludes that major debates have centered and continue to center around these major issues Should the poor be helped or punished Who is to blame Do the poor have the same rights as other people Who should pay Who should decide What is the effect of receiving welfare on incentive to work Who should be helped This is a masterful text designed for professional and public reading Gerald Handel is professor emeritus of sociology at The City College and The Graduate Center City University of New York He is the author of Making a Life in Yorkville Experience and Meaning in the Life Course Narrative of an Urban Working Class Man editor of Childhood Socialization and co editor of The Psychosocial Interior of the Family all published by Transaction Publishers **Human Behavior for Social Work Practice, Second Edition** Wendy L. Feminism in Practice Karen A. Foss, Sonja K. Foss, Alena Amato

Ruggerio, 2021-09-23 *Feminism in Practice* uses feminism as a blueprint for exploring change strategies. It features twenty contemporary feminists from diverse arenas including activists, comedians, musicians, politicians, poets, and showrunners. The women come to life through line drawings, brief biographies, extensive quotations, their definitions of feminism, and the change strategies they employ. Questions for reflection encourage readers to think through their own relationship to feminism and change. Chapter 1 defines feminism, raising issues with the typical definition of feminism as the effort to achieve equality between women and men. It concludes with a description of over twenty types of feminism. Chapter 2 describes the triggering events, happening places, and key ideas of the four waves of feminism. The opening chapters provide a comprehensive understanding of the diversity and complexity of feminist movement. The book is organized around five primary objectives that animate contemporary change efforts: proclaiming identity, naming a problem, enriching a system, changing a system, and creating an alternative system. Each objective is developed through theoretical assumptions and twelve change strategies that show it at work in feminist movement. *Feminism in Practice* also serves as a practical handbook that readers can use to experiment with the strategies and expand their toolkits for creating change in their lives and worlds. The authors are uniquely qualified to explore issues of feminism and change. Karen Foss and Sonja Foss are second-wave feminists who have written extensively on alternative change strategies, feminist communication, and feminist theory. Alena Ruggerio brings to the project the standpoint of a third-wave feminist at home in pop culture. Her scholarship lies at the intersection of rhetoric, feminism, and religious studies.
