The Scientific Basis of Education Productivity Rena F. Subotnik, Herbert J. Walberg, 2006-02-01 This volume is not primarily concerned with what students should learn nor even how they should learn Rather it concerns how we can discover the best means and conditions for teaching them in school at home and in society Expressed more explicitly we seek to find out how students can learn efficiently or productively as much as possible within a given amount of time and resources As in agriculture medicine public health and modern industries we can turn to rigorous science as one of the best sources for informing ourselves The intended audiences are not only scholars in a variety of academic disciplines but also research consumers including educators policymakers parents and citizens who seek principles to critically separate valid from invalid claims for the efficacy and efficiency of education products personnel and policies Initial versions of the chapters were discussed at a national invitational conference sponsored by the Laboratory for Student Success LSS the mid Atlantic regional educational laboratory at Temple University Center for Research in Human Development and Education LSS operates under a contract with the U S Department of Education s Institute of Education Sciences

Speaking Justice to Power Kim Forss, 2017-09-08 Efficiency economy and equity are policy goals pursued by governments around the world but analysts and

evaluators have devoted more effort to measuring and evaluating the first two In *Speaking Justice to Power* contributors examine the concept of equity the role it plays and its application in policy evaluation Here some of the most valuable thinkers in the area of policy studies address key questions How should evaluators develop criteria for measuring equity as they analyze both program and policy implementation as well as their impacts What distinctions among people should be taken into account when measuring and valuing impacts What sorts of data should be used to analyze processes and impacts in different settings How might such data be validated The contributors employ grounded theory thinking as they translate key ethical principles into their work and draw important lessons from their experiences The work discusses equity in interventions addressing a variety of social and environmental problems This volume continues the fine tradition of Transaction's Comparative Policy Evaluation series ***The Practice of Research in Social Work*** Rafael J. Engel, Russell K. Schutt, 2016-01-14 The authors are proud sponsors of the 2020 SAGE Keith Roberts Teaching Innovations Award enabling graduate students and early career faculty to attend the annual ASA pre conference teaching and learning workshop The Fourth Edition of *The Practice of Research in Social Work* introduces an integrated set of techniques for evaluating research and practice problems as well as conducting studies Evidence based practice comes alive through illustrations of actual social work research Updated with new examples the latest research and expanded material on technology and qualitative methods this popular text helps readers achieve the 2015 EPAS core competencies essential for social work practice

The SAGE Encyclopedia of Social Science Research Methods Michael Lewis-Beck,Alan E Bryman,Tim Futing Liao,2004 This defining work will be valuable to readers and researchers in social sciences and humanities at all academic levels As a teaching resource it will be useful to instructors and students alike and will become a standard reference source Essential for general and academic collections CHOICEAppreciative users of this volume will be students faculty and researchers in academic special and large public libraries for whom it is recommended LIBRARY JOURNALSAGE Reference is proud to announce The SAGE Encyclopedia of Social Science Research Methods a three volume resource that is a first of its kind developed by the leading publisher of social science research methods books and journals This unique multi volume reference set offers readers an all encompassing education in the ways of social science researchers Written to be accessible to general readers entries do not require any advanced knowledge or experience to understand the purposes and basic principles of any of the methods The Encyclopedia features two major types of entries definitions consisting of a paragraph or two provide a quick explanation of a methodological term and topical treatments or essays discussing the nature history application example and implication of using a certain method Also included are suggested readings and references for future study To help provide a more complete explanation than is often achieved within the scope of a single article key terms and concepts appear in SMALL CAPITAL LETTERS to refer readers to related terms explained elsewhere In addition to epistemological issues that influence the nature of research questions and assumptions The SAGE Encyclopedia of Social Science Research Methods tackles topics not normally viewed as part of social science research methodology from philosophical issues such as poststructuralism to advanced statistical techniques In covering the full range of qualitative and quantitative data analyses this key reference

offers an integrated approach that allows the reader to choose the most appropriate and robust techniques to apply to each situation. Many entries treat traditional topics in a novel way stimulating both interest and new perspectives. One example is the entry *Econometrics* by Professor Damodar Gujarati. Following a process which many educators preach but seldom practice, Gujarati walks the reader twice through the research process from economic theory to data and models to analysis, once in principle and a second time with an example. In using the ordinary process of economic research to achieve an extraordinary impact, he leaves the reader thinking not only about methods and models but also the fundamental purpose of econometrics.

Topics Covered: Analysis of Variance, Association and Correlation, Basic Qualitative Research, Basic Statistics, Causal Modeling, Structural Equations, Discourse, Conversation Analysis, Econometrics, Epistemology, Ethnography, Evaluation, Event History, Analysis, Experimental Design, Factor Analysis, Related Techniques, Feminist Methodology, Generalized Linear Models, Historical Comparative, Interviewing in Qualitative Research, Latent Variable Model, Life History, Biography, Loglinear Models, Categorical Dependent Variables, Longitudinal Analysis, Mathematics and Formal Models, Measurement Level, Measurement Testing, Classification, Multiple Regression, Multilevel Analysis, Qualitative Data Analysis, Sampling in Surveys, Sampling in Qualitative Research, Scaling, Significance Testing, Simple Regression, Survey Design, Time Series.

Key Features: Over 900 entries arranged A to Z. Each entry is written by a leading authority in the field covering both quantitative and qualitative methods. Covers all disciplines within the social sciences. Contains both concise definitions and in-depth essays. Three volumes and more than 1500 pages.

Scale-Up in Education Barbara Schneider, Sarah-Kathryn McDonald, 2006-12-05. *Scale Up in Education Volume 1: Ideas in Principle* examines the challenges of scaling up from a multidisciplinary perspective. It brings together contributions from disciplines that routinely take promising innovations to scale, including medicine, business, engineering, computing, and education. Together, the contributors explore appropriate methods for estimating the effects of innovations in larger, more diverse settings and provide theories and models to guide the design of innovations most likely to remain viable at large scales. Specially commissioned commentaries also discuss the analytical requirements and theoretical possibilities of a program of educational research on scale up built upon these foundations. This volume is ideally suited for researchers, policymakers, and graduate students charged with determining the effectiveness of educational interventions. With its insights into the conceptual and methodological prerequisites for obtaining rigorous, actionable evidence of intervention effects, the volume provides reading for program evaluation courses in schools of education and public policy.
