biography that explores the rise and fall of the advertising man as a figure who became effectively a licensed deceiver in the process of governing the lives of American consumers. Apparently this personage was caught up in a contradiction both compelled to deceive yet supposed to tell the truth. It was this moral condition and its consequences that made the adman so interesting to critics, novelists, and eventually filmmakers. The biography tracks his saga from its origins in the exaggerated doings of P. T. Barnum, the emergence of a new profession in the 1920s, the heyday of the adman's influence during the post-WW2 era, the later rebranding of the adman as artist, until the apparent demise of the figure symbolized by the triumph of that consummate huckster, Donald Trump. In *The Adman's Dilemma*, author Paul Rutherford explores how people inside and outside the advertising industry have understood the conflict between artifice and authenticity. The book employs a range of fictional and nonfictional sources including memoirs, novels, movies, TV shows, websites, and museum exhibits to suggest how the adman embodied some of the strange realities of modernity.

Neural and Metabolic Control of Macronutrient Intake
 Hans-Rudolf Berthoud, Randy J. Seeley, 1999-10-25. When an excessive proportion of the human energy requirement is derived from fat, the likelihood of obesity increases. Any such individual is at risk for diabetes and cardiovascular disease, grave and costly health hazards. The selective control of fat ingestion is a promising solution to these concerns. Existing data suggests that macronutrient intake can be manipulated. Further research is working to create pharmacological tools that will suppress fat consumption. It will also be possible to fight obesity, heart disease, and diabetes. *Neural and Metabolic Control of Macronutrient Intake* systematically discusses the known physiological mechanisms involved in macronutrient selection, including their molecular, genetic, and neurochemical aspects. The book is also a critical review of the hypothesis that ingestion of the three nutrients is regulated by separate neural control mechanisms, leaving open the possibility that strategies could be devised to intervene in bodily control systems and alter the proportion of fat in the diet. This reference provides three types of information: First, the basic background of the biochemical and physiological systems as they relate to macronutrient selection. Second, opinions and data concerning to what degree animals and humans show evidence of macronutrient selection. And third, evidence about how the central nervous system might be involved in the choices animals make among macronutrients.

Behind the Rifle Shelby Harriel-Hidlebaugh, 2019-02-25. During the Civil War, Mississippi's strategic location bordering the Mississippi River and the state's system of railroads drew the attention of opposing forces who clashed in major battles for control over these resources. The names of these engagements—Vicksburg, Jackson, Port Gibson, Corinth, Iuka, Tupelo, and Brice's Crossroads—along with the narratives of the men who fought there, resonate in Civil War literature. However, Mississippi's chronicle of military involvement in the Civil War is not one of men alone. Surprisingly, there were a number of female soldiers disguised as males.

who stood shoulder to shoulder with them on the firing lines across the state Behind the Rifle Women Soldiers in Civil War Mississippi is a groundbreaking study that discusses women soldiers with a connection to Mississippi either those who hailed from the Magnolia State or those from elsewhere who fought in Mississippi battles Readers will learn who they were why they chose to fight at a time when military service for women was banned and the horrors they experienced Included are two maps and over twenty period photographs of locations relative to the stories of these female fighters along with images of some of the women themselves The product of over ten years of research this work provides new details of formerly recorded female fighters debunks some cases and introduces over twenty previously undocumented ones Among these are women soldiers who were involved in such battles beyond Mississippi as Shiloh Antietam and Gettysburg Readers will also find new documentation regarding female fighters held as prisoners of war in such notorious prisons as Andersonville Master of the Moon: Ronnie James Dio Wikipedia Presents, *Ponderosa Pine Ecosystems Restoration and Conservation* ,2001
