## **Rational Animal And Other Philosophical Essays On The Nature Of Man:**

*A Rational Animal and Other Philosophical Essays on the Nature of Man* Antony Flew, 1978 These philosophical essays are related by a concern to develop and defend an Aristotelian view that we are both essentially and entirely creatures of mortal flesh and blood and uniquely rational animals *Dictionary of Modern American Philosophers* John R.

Shook, 2005-01-01 The *Dictionary of Modern American Philosophers* includes both academic and non academic philosophers and a large number of female and minority thinkers whose work has been neglected It includes those intellectuals involved in the development of psychology pedagogy sociology anthropology education theology political science and several other fields before these disciplines came to be considered distinct from philosophy in the late nineteenth century Each entry contains a short biography of the writer an exposition and analysis of his or her doctrines and ideas a bibliography of writings and suggestions for further reading While all the major post Civil War philosophers are present the most valuable feature of this dictionary is its coverage of a huge range of less well known writers including hundreds of presently obscure thinkers In many cases the *Dictionary of Modern American Philosophers* offers the first scholarly treatment of the life and work of certain writers This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought *The Boundaries of Humanity* James J. Sheehan, Morton Sosna, 2024-03-29 To the age old debate over what it

means to be human the relatively new fields of sociobiology and artificial intelligence bring new if not necessarily compatible insights What have these two fields in common Have they affected the way we define humanity These and other timely questions are addressed with colorful individuality by the authors of *The Boundaries of Humanity* Leading researchers in both sociobiology and artificial intelligence combine their reflections with those of philosophers historians and social scientists while the editors explore the historical and contemporary contexts of the debate in their introductions The implications of their individual arguments and the often heated controversies generated by biological determinism or by mechanical models of mind go to the heart of contemporary scientific philosophical and humanistic studies Contributors Arnold I Davidson John Dupré Roger Hahn Stuart Hampshire Evelyn Fox Keller Melvin Konner Alan Newell Harriet Ritvo James J Sheehan Morton Sosna Sherry Turkle Bernard Williams Terry Winograd This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 1991

*Contemporary Perspectives in Philosophy and Methodology of Science* Wenceslao J. González, 2006 Nowadays philosophy and methodology of science appear as a combination of novelty and continuity This blend is clear both in the general approaches to science those thought of as any science and in the specific perspectives on every science either formal or empirical There are new topics for philosophical reflection such as key issues in philosophy of medicine and central problems

raised by neuroscience Thus new contents have brought attention to aspects that previously went almost unnoticed In addition there are new angles for philosophical study such as the repercussion of society on scientific activity in aims processes and results But the background of the main philosophical and methodological trends of the twentieth century is in many ways still in place

*The Epistemological Skyhook* Jim Slagle, 2016-05-20 Throughout philosophical history there has been a recurring argument to the effect that determinism naturalism or both are self referentially incoherent By accepting determinism or naturalism one allegedly acquires a reason to reject determinism or naturalism The Epistemological Skyhook brings together for the first time the principal expressions of this argument focusing primarily on the last 150 years This book addresses the versions of this argument as presented by Arthur Lovejoy A E Taylor Kurt G del C S Lewis Norman Malcolm Karl Popper J R Lucas William Hasker Thomas Nagel Alvin Plantinga and others along with the objections presented by their many detractors It concludes by presenting a new version of the argument that synthesizes the best aspects of the others while also rendering the argument immune to some of the most significant objections made to it

**Biographical Dictionary of Twentieth-Century Philosophers** Stuart Brown, Diane Collinson, Robert Wilkinson, 2012-09-10 This Biographical Dictionary provides detailed accounts of the lives works influence and reception of thinkers from all the major philosophical schools and traditions of the twentieth century This unique volume covers the lives and careers of thinkers from all areas of philosophy from analytic philosophy to Zen and from formal logic to aesthetics All the major figures of philosophy such as Nietzsche Wittgenstein and Russell are examined and analysed The scope of the work is not merely restricted to the major figures in western philosophy but also covers in depth a significant number of thinkers from the near and far east and from the non European Hispanic language communities The Biographical Dictionary also includes a number of general entries dealing with important schools of philosophy such as the Vienna Circle or currents of thought such as vitalism These allow the reader to set the individual biographies in the context of the philosophical history of the period With entries written by over 100 leading philosophy scholars the Biographical Dictionary is the most comprehensive survey of twentieth century thinkers to date

**Structure** The book is structured alphabetically by philosopher Each entry is identically structured for ease of access and covers nationality dates and places of birth and death philosophical style or school areas of interest higher education significant influences main appointments main publications secondary literature account of intellectual development and main ideas critical reception and impact At the end of the book a glossary gives accounts of the schools movements and traditions to which these philosophers belonged and thorough indexes enable the reader to access the information in several ways by nationality by major areas of contribution to philosophy e g aesthetics by major influences on the thinker concerned e g Plato Kant Wittgenstein

**On the Nature of Philosophy and Other Philosophical Essays** Nicholas Rescher, 2013-05-02 This book continues Rescher s longstanding practice of publishing groups of philosophical essays Notwithstanding their thematic diversity these discussions exhibit a uniformity of method in addressing philosophical

issues via a mixture of historical contextualization analytical scrutiny and common sensical concern Their interest such as it is lies not just in what they do but in how they do it **The Darwinian Heritage** David Kohn,2014-07-14 Representing the present rich state of historical work on Darwin and Darwinism this volume of essays places the great theorist in the context of Victorian science The book includes contributions by some of the most distinguished senior figures of Darwin scholarship and by leading younger scholars who have been transforming Darwinian studies The result is the most comprehensive survey available of Darwin s impact on science and society Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

What the Philosophy of Biology Is M. Ruse,2012-12-06 Philosophers of science frequently bemoan or cheer the fact that today with the supposed collapse of logical empiricism there are now 10 grand systems However although this mayor may not be true and if true mayor may not be a cause for delight no one should conclude that the philosophy of science has ground to a halt its problems exhausted and its practioners dispirited In fact in this post Kuhnian age the subject has never been more alive as we work with enthusiasm on special topics historical and conceptual And no topic has grown and thrived quite like the philosophy of biology which now has many students in the field producing high quality articles and monographs The success of this subject is due above all to the work and influence of one man David Hull In his own writings and in the support he has given to others he has shown true leadership in the best Platonic sense It is now twenty years since Hull fnt gave his seminal paper What the philosophy of biology is not and to mark that point and to show our respect gratitude and affection to its author a number of us who owe much to Hull decided to produce a volume of essays on and around themes to which Hull has spoken In Defense of Mentalism R. Marres,1989 In Defense of Mentalism René Marres,2025-02-10

**Evolutionary Epistemology and its Implications for Humankind** Franz M. Wuketits,1990-01-01 This books aims to outline the scientific biological foundations of evolutionary epistemology and to discuss its implications for humankind Wuketits covers all aspects of evolutionary epistemology including its empirical foundations and its philosophical and anthropological consequences providng an accessible introduction with a minimum of jargon *Economics and Evolution* Geoffrey Martin Hodgson,1996 How evolutionary ideas can be used to reconstruct economics Crime, Punishment and Disease in a Relativistic Universe Antony Flew,2018-02-06 In Crime Punishment and Disease Antony Flew makes clear both the meaning and the implications carried by the application of the expression mental disease He aims to discourage its use in conditions that provide the victims of such diseases with an excuse for failing to perform what would have been their imperative duties had they enjoyed good mental health Flew attacks the gross over extensions of the notion of mental disease

on both sides of the Atlantic He defends human dignity and responsibility against the suggestion that we are all or most of us sick sick sick In particular he challenges the paternalist pretensions of people who claim a right to control and manipulate others because they are allegedly sick and consequently not responsible for what they do In a typical ordinary disease Flew notes it is the patient who complains of the disease rather than someone else who complains about the patient But those who claim that some crime or all crime is symptomatic of mental disease and those who identify disorders such as attention deficit hyperactivity disorder ADHD as conditions requiring psychiatric attention are taking the disfavored behavior rather than the distress of their patients as the warrant for supposedly medical interventions They should instead first consider how what they propose to call mental disease does and does not resemble syphilis measles and other communicable diseases Flew sees his work as complementary to Thomas Szasz s He applies a philosophical perspective to problems Szasz discusses as a psychiatrist This work will be of particular interest to students of philosophy and politics in that it relates modern discussion of mental illness to the Plato of The Republic Flew also takes note in this context of Samuel Butler s Erewhon This work will be of direct relevance to criminologists as well as those interested in social welfare philosophy of education and new developments in psychiatry

**Aesthetical and Philosophical Essays** Friedrich Schiller,1902 Christianity & Western Thought Colin Brown,Steve Wilkens,Alan G. Padgett,1990 From Socrates and the Sophists to Kant from Augustine to Aquinas and the Reformers Colin Brown traces the turbulent often tension filled always fascinating story of the thinkers ideas and movements that have shaped our intellectual landscape Is philosophy the handmaiden of faith or the doctrine of demons Does it clarify the faith or undermine the very heart of Christian belief Brown writes This book is about the changes in preconceptions world views and paradigms that have affected the ways in which people have thought about religion in general and Christianity in particular in the Western world It is a historical sketch written to help students and anyone else who might be interested to get a better grasp of the love hate relationship between philosophy and faith that has gone on for close to two thousand years Students pastors and thoughtful Christians will benefit from this rich resource The first in a proposed three volume work Brown s easy to read hard to put down introduction to Christianity and Western thought focuses on developments from the ancient world to the Age of Enlightenment Government: Servant Or Master? Gerard Radnitzky,Hardy Bouillon,2023-03-13 The Harvard Classics: Literary and philosophical essays, French, German and Italian Charles William Eliot,1910 V 49 Epic and saga **Aesthetical, philosophical essays** Friedrich Schiller,1902

The Philosophical Roots of the Ecological Crisis Joshtrom Isaac Kureethadam,2018-06-11 The Philosophical Roots of the Ecological Crisis Descartes and the Modern Worldview traces the conceptual sources of the present environmental degradation within the worldview of Modernity and particularly within the thought of Ren Descartes universally acclaimed as the father of modern philosophy The book demonstrates how the triple foundations of the Modern worldview in terms of an exaggerated anthropocentrism a mechanistic conception of the natural world and the metaphysical dualism between

humanity and the rest of the physical world can all be largely traced back to Cartesian thought with direct ecological consequences
