## **Retraining Cognition:**

**Retraining Cognition** Rick Parenté, Douglas J. Herrmann, 1996 Summarizes many of the techniques developed over the past two decades for restoring a person's mental processes after injury to the brain and the theoretical underpinnings in cognitive psychology neuropsychology and speech and language therapy The topics include the neuropsychology of thinking

**Training Cognition** Alice F. Healy, Lyle E. Bourne, Jr., 2012-08-21 Training is both a teaching and a learning experience and just about everyone has had that experience Training involves acquiring knowledge and skills This newly acquired training information is meant to be applicable to specific activities tasks and jobs In modern times where jobs are increasingly more complex training workers to perform successfully is of more importance than ever The range of contexts in which training is required includes industrial corporate military artistic and sporting at all levels from assembly line to executive function The required training can take place in a variety of ways and settings including the classroom the laboratory the studio the playing field and the work environment itself The general goal of this book is to describe the current state of research on training using cognitive psychology to build a complete empirical and theoretical picture of the training process The book focuses on training cognition as opposed to physical or fitness training It attempts to show how to optimize training efficiency durability and generalizability The book includes a review of relevant cognitive psychological literature a summary of recent laboratory experiments a presentation of original theoretical ideas and a discussion of possible applications to real world training settings

*Retraining Cognition* Rick Parenté, Douglas J. Herrmann, 2003 To date all of the books on cognitive restructuring have addressed only one component memory skills such as attention concentration rehearsal strategies This book covers these in detail but also provides the techniques for problem solving decision making concept learning organization planning other reasoning skills External aids prosthetic devices other techniques activities for improving memory reasoning skills are also covered

Cognitive Retraining Using Microcomputers Veronica A. Bradley, John L. Welch, Clive E. Skilbeck, 1993 The last decade has seen considerable development in the field of neuropsychological rehabilitation following brain damage and the use of computerized methods has attracted attention and stimulated controversy This practically oriented text reviews representative examples from the literature relating to the training of cognitive systems with the emphasis on studies describing the use of computerized methods The topic is discussed in context and the contents include sections on cognitive change in neurological disorders assessment techniques the interaction between cognition and behaviour and the advantages and disadvantages of the use of microcomputers The authors describe the evaluation of a computerized cognitive retraining programme run at the Regional Neurological Centre in Newcastle upon Tyne and draw on their experience of running such programmes to give practical guidance to those wishing to set up cognitive retraining programmes

**Retraining Cognition Techniques Applications** Rick Parente, 1995-12-01

**Learning and Cognition in the Mentally Retarded** Penelope H. Brooks, Richard Sperber, Charley

McCauley,1984 First published in 1984 Routledge is an imprint of Taylor Francis an informa company      **The Neuropsychology Handbook** Arthur MacNeill Horton,Danny Wedding,2008 Print CourseSmart      *The Rehabilitation of Cognitive Disabilities* Charles J. Long,J.M. Williams,2012-12-06 The rehabilitation of intellectual impairment resulting from brain injury has become a major professional activity of clinical neuropsychologists In recent years neuropsychology has developed from a professional role stressing assessment and diagnosis to one that now includes treatment and rehabilitation activities Such trends are also manifested in two new research interests of neuropsychologists the study of the generalizability of neuropsychological test findings to everyday abilities often referred to as the ecological validity of tests and outcome studies of cognitive retraining treatments Discovering the relationships between traditional neuropsychological tests and everyday behavior is important because the referral questions posed to neuropsychologists have changed Now the neuropsychologist is asked to comment on the patient s functional intellectual abilities as they relate to the everyday demands of home work and educational settings Of course the development of cognitive retraining theory and procedures allows neuropsychologists to intervene in the treatment of the cognitive problems that the neuropsychological evaluation has documented Since these approaches are still in their formative stages they have been the subject of clinical lore great controversy and little systematic research This situation prompted one of our presenters to lament Either you believe Cognitive Retraining is divinely inspired or the work of the devil There is apparently little middle ground Given this state of affairs the program committee of the Mid South Conference on Human Neuropsychology decided to focus on the role of neuropsychologists in rehabilitation      **Handbook of Autism and Pervasive Developmental Disorders, Diagnosis, Development, Neurobiology, and Behavior** Fred R. Volkmar,Rhea Paul,Ami Klin,Donald J. Cohen,2005-04-29 Now expanded to two volumes this invaluable reference work provides a comprehensive review of all information presently available about these disorders drawing on findings and clinical experience from a number of related disciplines such as psychiatry psychology neurobiology pediatrics etc The Handbook covers descriptive and diagnostic characteristics biological contributions intervention techniques legal and social issues The Third Edition is updated to include the newest work in animal models genetics neuropsychological processes screening and assessment methods      **Cognitive Technology** W. Richard Walker,Douglas J. Herrmann,2010-07-27 Rapidly growing cognitive technologies such as word processors web browsers cell phones and personal data assistants aid learning memory and problem solving and contribute to every part of modern life from interviewing crime witnesses to learning a foreign language to calling one s mother This collection of essays on cognitive technology examines the interaction between the human mind and the tools people create to enhance it studying which technologies assist cognition the most and what features are most effective It also considers the point at which the technological enhancement of human ability begins to restrict that very ability such as the risk of some cognitive technologies impairing cognition or creating disadvantages for individuals or groups This collection of 11 essays discusses

the most recent psychological research in cognitive technology showcasing the paradigms and theories that have driven the development of new cognitive technologies It explores the impact of technology on cognitive psychology the classroom and social interaction and group problem solving Topics covered include the distracting characteristics of new technologies such as the effects of cell phone use on driving ability and of distracting advertisements on problem solving the study of mass media through assessing memories for media experiences the media s role in advancing gender and racial prejudices and the misuse of cognitive technology through identity theft and cyberterrorism Each essay concludes with a bibliography

*The Handbook of Memory Disorders* Alan D. Baddeley, Michael D. Kopelman, Barbara A. Wilson, 2003-04-11 The eagerly awaited 2nd edition of this classic handbook is a critical thorough account of memory disorders relating to neurological processes and to developmental and acquired brain damage and presents comprehensive sections on theory assessment treatment and management of memory disorders Written by a truly international team of experts this completely updated edition offers an authoritative review of the key areas of research and development in this field Completely updated and expanded New sections and chapters reflect many of the biggest growth areas in the field in recent years such as confabulation false memory and the frontal lobes Written by an international team of experts

**Memory Distortions and Their Prevention** Deborah L. Best, Margaret J. Intons-Peterson, 2013-05-13 This volume explores the well documented phenomena of memory distortion in a variety of settings as well as how it can be ameliorated or prevented altogether The editors have recruited some of the very best researchers in the applied cognitive field to address these issues These authors examine distortion from several angles fuzzy trace theory face identification memory deficits with age collaborative influences on distortion sociocultural influences on memory retention of procedural and declarative information and ignorance of medical and other information The final chapter addresses the issue of cognitive technology in general Because of the surge of interest in applied cognitive psychology and in the memory distortion issue in particular this book will be valuable to many applied and basic researchers

*Mnemonology* James B. Worthen, R. Reed Hunt, 2011-02-25 This book bridges the gap between basic memory research and mnemonic applications through a careful analysis of the processes that underlie effective memory aids The book traces the history of mnemonics examines popular techniques and discusses the current relevance of mnemonics to both psychological researchers and those seeking to improve their memory Using a unique approach termed mnemonology the authors seek not necessarily to promote specific mnemonic techniques but to provide information which will allow one to improve memory by creating their own mnemonics

*Motivating Students to Learn* Jere E. Brophy, 2010-05-26 Written specifically for teachers this book offers a wealth of research based principles for motivating students to learn Its focus on motivational principles rather than motivation theorists or theories leads naturally into discussion of specific classroom strategies Throughout the book these principles and strategies are tied to the realities of contemporary schools and classrooms The author employs an eclectic approach to motivation that shows how to effectively integrate the use of extrinsic

and intrinsic strategies Guidelines are provided for adapting motivational principles to group and individual differences and for doing repair work with students who have become discouraged or disaffected learners      Cognition and Addiction
