Route of Tomorrow is about how a small group of intelligent people can change the world for better or worse Jon and Roy were brilliant hardworking young men with a strong commitment to making the world better for everyone Their inventions made them rich and famous One of their inventions was the Zoomer which traveled as a lightning bolt and could circle the earth in minutes as it carried its cargo of people and things to their destination They made the Zoomer available to everyone on Earth making it possible to live in one part of the world work in another part thousands of miles away do a little shopping at the end of the day and still be home for supper Mims and Ro were also brilliant and inventive but they were very self centered in their goals and creations The purpose for their talent was not help the poor or ordinary people who were sick or injured Both Mims and Ro were very wealthy and had little or no concern for things like helping the poor or sick or anyone in need if they were ordinary people Their specialty was to help the talented the smart and especially the rich The ordinary was for the ordinary and certainly not clients that Mims served Their favorite clients were the rich who never complained as long as the service was excellent and the patient was cured and returned to good health Yes Mims loved money and Ro loved cloths and both loved surgery in their own way Square Root to Tomorrow is designed for anyone from middle school to adult However the content addresses ideas and actions that will open the readers mind to a broad range of ideas about possible changes in the future and the effects these may have on us in the future
