

The background of the book cover is a photograph of a vast, open landscape. In the foreground, there is a field of dry, reddish-brown grass. In the middle ground, there are rolling hills or mountains with a mix of green and brown vegetation. The sky is filled with large, white, fluffy clouds. Four birds, possibly geese or swans, are shown in flight, their wings spread wide, flying across the sky from left to right. The overall mood is one of wild, natural beauty.

"This is one of the most important books of the decade, and it should be required reading for all who love the outdoors." —Fern Kaufman, author of *Kaufman Field Guides*

## **Return To Wild America A Yearlong Search For The Continents Natural Soul:**

Return to Wild America Scott Weidensaul, 2006-10-31 On the eve of the 50th anniversary of the publication of *Wild America* naturalist Scott Weidensaul retraces Roger Tory Peterson's and James Fisher's steps to tell the story of wild America today

**Return to Wild America** Scott Weidensaul, 2024-03-26 In 1953 birding guru Roger Tory Peterson and noted British naturalist James Fisher set out on what became a legendary journey a one hundred day trek over 30 000 miles around North America They traveled from Newfoundland to Florida deep into the heart of Mexico through the Southwest the Pacific Northwest and into Alaska's Pribilof Islands Two years later *Wild America* their classic account of the trip was published On the eve of that book's fiftieth anniversary naturalist Scott Weidensaul retraces Peterson and Fisher's steps to tell the story of wild America today How has the continent's natural landscape changed over the past fifty years How have the wildlife the rivers and the rugged untouched terrain fared The journey takes Weidensaul to the coastal communities of Newfoundland where he examines the devastating impact of the Atlantic cod fishery's collapse on the ecosystem to Florida where he charts the virtual extinction of the great wading bird colonies that Peterson and Fisher once documented to the Mexican tropics of Xilitla which have become a growing center of ecotourism since Fisher and Peterson's exposition And perhaps most surprising of all Weidensaul finds that much of what Peterson and Fisher discovered remains untouched by the industrial developments of the last fifty years Poised to become a classic in its own right *Return to Wild America* is a sweeping survey of the natural soul of North America today

Avenging Nature Eduardo Valls Oyarzun, Rebeca Gualberto Valverde, Noelia Malla Garcia, María Colom Jiménez, Rebeca Cordero Sánchez, 2020-09-28 Nature thou art my goddess Edmund's bold assertion in *King Lear* could easily inspire and at the same time function as a lamentation of the inadequate respect of nature in culture In this volume international experts provide multidisciplinary exploration of the insubordinate representations of nature in modern and contemporary literature and art The work foregrounds the need to reassess how nature is already and has been for a while striking back against human domination From the perspective of literary studies art history media studies ethics and philosophy and ethnology and anthropology *Avenging Nature* highlights the need of assessing insurgent discourses that converging with counter discourses of race gender or class realize the empowerment of nature from its subaltern position Acknowledging the argument that cultural representations of nature establish a relationship of domination and exploitation of human discourse over nonhuman reality and that in consequence our regard for nature as humanist critics is instrumental and anthropocentric the present volume advocates for the view that the time has come to finally perceive nature's vengeance and to critically probe into nature's ongoing revenge against the exploitation of culture

**A Message from Martha** Mark Avery, 2014-07-17 The story of Passenger Pigeon and what we can learn from its demise 100 years ago September 1st 2014

marked the centenary of one of the best documented extinctions in history the demise of the Passenger Pigeon From being the commonest bird on the planet 50 years earlier the species became extinct on that fateful day with the death in Cincinnati Zoo of Martha the last of her kind This book tells the tale of the Passenger Pigeon and of Martha and of author Mark Avery's journey in search of them It looks at how the species was a cornerstone of the now much diminished ecology of the eastern United States and how the species went from a population that numbered in the billions to nil in a terrifyingly brief period of time It also explores the largely untold story of the ecological annihilation of this part of America in the latter half of the 19th century a time that saw an unprecedented loss of natural beauty and richness as forests were felled and the prairies were ploughed with wildlife slaughtered more or less indiscriminately Despite the underlying theme of loss this book is more than another depressing tale of human greed and ecological stupidity It contains an underlying message that we need to reforge our relationship with the natural world on which we depend and plan a more sustainable future Otherwise more species will go the way of the Passenger Pigeon We should listen to the message from Martha

**The American Bird Conservancy Guide to Bird Conservation** Daniel J. Lebbin, Michael J. Parr, George H. Fenwick, 2010-10-15 Whether we live in cities in the suburbs or in the country birds are ubiquitous features of daily life so much so that we often take them for granted But even the casual observer is aware that birds don't fill our skies in the number they once did That awareness has spawned conservation action that has led to notable successes including the recovery of some of the nation's most emblematic species such as the Bald Eagle Brown Pelican Whooping Crane and Peregrine Falcon Despite this a third of all American bird species are in trouble in many cases they're in imminent danger of extinction The most authoritative account ever published of the threats these species face The American Bird Conservancy Guide to Bird Conservation will be the definitive book on the subject The Guide presents for the first time anywhere a classification system and threat analysis for bird habitats in the United States the most thorough and scientifically credible assessment of threats to birds published to date as well as a new list of birds of conservation concern Filled with beautiful color illustrations and original range maps the Guide is a timely important and inspiring reference for birders and anyone else interested in conserving North America's avian fauna But this book is far more than another shout of crisis The Guide also lays out a concrete and achievable plan of long-term action to safeguard our country's rich bird life Ultimately it is an argument for hope Whether you spend your early weekend mornings crouched in silence with binoculars in hand hoping to check another species off your list or you've never given much thought to bird conservation you'll appreciate the visual power and intellectual scope of these pages

*Returning North with the Spring* Harris, John R, 2016-03-15 At winter's end in 1947 driven by the devastating loss of a son killed in World War II naturalist Edwin Way Teale followed the dawning spring season northward in an amazing 17 000 mile odyssey from the Everglades to Maine He wrote about the adventure in *North with the Spring* Its sequel *Wandering Through Winter* won the Pulitzer Prize Retracing Teale's route writer John Harris reveals a vastly changed natural world In *Returning North with the*

Spring he stops at the very places where Teale once stood trekking through the Okefenokee wetland the Great Smoky Mountains the Great Dismal Swamp the New Jersey Pine Barrens and Cape Cod He is stunned to see how climate change invasive species and other factors have affected the landscapes and wildlife Yet he also discovers that many of the sites Teale described have been newly rewilded or permanently protected by the government Homage to the past report on the present glimpse into the future this book honors what has been lost in the years since Teale s famous journey and finds hope in the small tenacities of nature

A World on the Wing: The Global Odyssey of Migratory Birds Scott Weidensaul, 2021-03-30 New York Times Bestseller Finalist for the Los Angeles Times Book Prize A Library Journal Best Science and Technology Book of the Year An exhilarating exploration of the science and wonder of global bird migration In the past two decades our understanding of the navigational and physiological feats that enable birds to cross immense oceans fly above the highest mountains or remain in unbroken flight for months at a stretch has exploded What we ve learned of these key migrations how billions of birds circumnavigate the globe flying tens of thousands of miles between hemispheres on an annual basis is nothing short of extraordinary Bird migration entails almost unfathomable endurance like a sparrow sized sandpiper that will fly nonstop from Canada to Venezuela the equivalent of running 126 consecutive marathons without food water or rest avoiding dehydration by drinking moisture from its own muscles and organs while orienting itself using the earth s magnetic field through a form of quantum entanglement that made Einstein queasy Crossing the Pacific Ocean in nine days of nonstop flight as some birds do leaves little time for sleep but migrants can put half their brains to sleep for a few seconds at a time alternating sides and their reaction time actually improves These and other revelations convey both the wonder of bird migration and its global sweep from the mudflats of the Yellow Sea in China to the remote mountains of northeastern India to the dusty hills of southern Cyprus This breathtaking work of nature writing

from Pulitzer Prize finalist Scott Weidensaul also introduces readers to those scientists researchers and bird lovers trying to preserve global migratory patterns in the face of climate change and other environmental challenges Drawing on his own extensive fieldwork in *A World on the Wing* Weidensaul unveils with dazzling prose the miracle of nature taking place over our heads

**RiverTime** Mary A. Hood,2008-03-20 In this engaging travelogue of our world s rivers great and small poet and biologist Mary A Hood reflects on rivers as creators of place Recounting her journeys along portions of the Mississippi the Danube the Amazon the Yangtze the Ganges the Nile and a dozen small U S rivers Hood weaves together natural history current environmental and conservation issues encounters with endangered plants and animals and tells some interesting tales along the way Like a river the book begins small with essays that are narrowly focused on themes of environment and place such as the need to write our world Three Rivers how fires and corporations control the West the Flathead the effect of wind farms on a small town in western New York the Conhocton the giant redwoods and how they were preserved the Klamath and the search for moose in the great north woods the Penobscot The second section expands the themes of environment and place and looks at great world rivers their long histories their biological diversity the effects of human use and tourism and the paradox of human reverence and destruction From endangered species to invasive species from corporate control of national parks to wind farms from urban sprawl to efforts at conservation and restoration *RiverTime* offers insights into our relationship to the environment in the twenty first century

**Of a Feather** Scott Weidensaul,2008-09-15 Beyond Audubon A quirky lively and illuminating account of bird watching s history including rivalries controversies and bad behavior The Washington Post Book World From the moment Europeans arrived in North America they were awestruck by a continent awash with birds great flocks of wild pigeons prairies teeming with grouse woodlands alive with brilliantly colored songbirds *Of a Feather* traces the colorful origins of American birding the frontier ornithologists who collected eggs between border skirmishes the society matrons who organized the first effective conservation movement and the luminaries with checkered pasts such as Alexander Wilson a convicted blackmailer and the endlessly self mythologizing John James Audubon Naturalist Scott Weidensaul also recounts the explosive growth of modern birding that began when an awkward schoolteacher named Roger Tory Peterson published *A Field Guide to the Birds* in 1934 Today birding counts iPod wearing teens and obsessive listers among its tens of millions of participants making what was once an eccentric hobby into something so completely mainstream it s now almost cool This compulsively readable popular history will surely find a roost on every birder s shelf Weidensaul is a charming guide You don t have to be a birder to enjoy this look at one of today s fastest growing and increasingly competitive hobbies The Arizona Republic

*Homesick and Happy* Michael Thompson,2012-05-01 An insightful and powerful look at the magic of summer camp and why it is so important for children to be away from home if only for a little while In an age when it s the rare child who walks to school on

his own the thought of sending your little ones off to sleep away camp can be overwhelming for you and for them But parents first instinct to shelter their offspring above all else is actually depriving kids of the major developmental milestones that occur through letting them go and watching them come back transformed In Homesick and Happy renowned child psychologist Michael Thompson PhD shares a strong argument for and a vital guide to this brief loosening of ties A great champion of summer camp he explains how camp ushers your children into a thrilling world offering an environment that most of us at home cannot an electronics free zone a multigenerational community meaningful daily rituals like group meals and cabin clean up and a place where time simply slows down In the buggy woods icy swims campfire sing alongs and daring adventures children have emotionally significant and character building experiences they often grow in ways that surprise even themselves they make lifelong memories and cherished friends Thompson shows how children who are away from their parents can be both homesick and happy scared and successful anxious and exuberant When kids go to camp for a week a month or the whole summer they can experience some of the greatest maturation of their lives and return more independent strong and healthy

*A Road Running Southward* Dan Chapman, 2022-05-26 Engaging hybrid part lyrical travelogue part investigative journalism and part jeremiad all shot through with droll humor The Atlanta Journal Constitution In 1867 John Muir set out on foot to explore the botanical wonders of the South keeping a detailed journal of his adventures as he traipsed from Kentucky southward to Florida One hundred and fifty years later on a similar whim veteran Atlanta reporter Dan Chapman distressed by sprawl driven environmental ills in a region he loves recreated Muir's journey to see for himself how nature has fared since Muir's time Channeling Muir he uses humor keen observation and a deep love of place to celebrate the South's natural riches But he laments that a treasured way of life for generations of Southerners is endangered as long simmering struggles intensify over misused and dwindling resources Chapman seeks to discover how Southerners might balance surging population growth with protecting the natural beauty

Muir found so special Each chapter touches upon a local ecological problem at risk species in Mammoth Cave coal ash in Kingston Tennessee climate change in the Nantahala National Forest water wars in Georgia aquifer depletion in Florida that resonates across the South Chapman delves into the region s natural history moving between John Muir s vivid descriptions of a lush botanical paradise and the myriad environmental problems facing the South today Along the way he talks to locals with deep ties to the land scientists hunters politicians and even a Muir impersonator who describe the changes they ve witnessed and what it will take to accommodate a fast growing population without destroying the natural beauty and a cherished connection to nature A Road Running Southward is part travelogue part environmental cri de coeur and paints a picture of a South under siege It is a passionate appeal a call to action to save one of the loveliest and most biodiverse regions of the world by understanding what we have to lose if we do nothing **Onearth** ,2004 Science John Michels (Journalist),2005 A weekly record of scientific progress **Nature Conservancy** ,2006 The Nature Conservancy Magazine ,2006 **Arctic Wings** Stephen Charles Brown,2006 Two hundred color images celebrating the birds that journey to the Arctic National Wildlife Refuge each year are accompanied by essays by noted biologists and conservationists
