Return To Black America

Return To Black America:

Return to Black America William Gardner Smith, 1970 *How Trump is Making Black America Great Again* Horace Cooper, 2020-07-07 The election of President Donald Trump has been portrayed in the mainstream media as a doomsday event especially for America's racial minorities. And yet reality has proven quite the contrary. Not only are African Americans employed at a greater rate than any other time since the late 1950s, Black business formation is at an all-time high. In this groundbreaking book, longtime academic and political commentator Horace Cooper explains how Trump's economic policies, including lowering taxes, eliminating stifling regulation, and renegotiating trade agreements, are producing an unforeseen boon to Black America. This book provides a philosophical framework through which Trump's presidency can be viewed as a benefit to Black America rather than a stumbling block.

Pan Africanism in the African Diaspora Ronald W. Walters, 1997 This groundbreaking volume analyzes important case studies of Black political movements since the 1960s and the impact of the movements on the African American community. Previous studies on this subject have been largely historical in nature, focusing on the thought of nineteenth-century Pan-Africanists or early twentieth-century formal Pan-African movements such as those led by W. E. B. Du Bois and Marcus Garvey. In this book, Walters analyzes heretofore largely unaddressed cases in which African American societies forged connections with others in the Diaspora within the framework of significant political movements. He applies social science theory to the analysis of the cases based on the proposition that Pan-African studies, a subject within the broad field of Africana Studies, is itself very diverse and lends itself to analysis by an unlimited number of modern disciplinary approaches and perspectives. Walters uses the tools of comparative politics for examining similar Black and white social institutions and organizations in the United States and other countries and for creating a tailored Pan-African perspective as a criteria with which to describe the interactive relationships between the American Black community and Blacks in Britain, South Africa, Brazil, and the Caribbean. He fashions a unique and radically new perspective and model for addressing the age-old question of the African continuum by advancing the notion that Pan-Africanism can be about the struggle for community, a struggle not incompatible with efforts to change the State. This is a twenty-first-century view of race relations and classes in the post-modern era of capitalism. Pan-Africanism in the African Diaspora is broadly a work of political science in that it is concerned with political phenomena and applies methods of analysis from that field. Nevertheless, it is also interdisciplinary in content, perspective, and analytical approach. Walters' new data transcends the notions previously put forth and forms a significant contribution to political theory in African and African American studies.

Business is War-The Unfinished Business of Black America Darren J. Perkins, *Immigration and the Remaking of Black America* Tod G. Hamilton, 2019-05-15 Winner of the 2020 Otis Dudley Duncan Award for Outstanding Scholarship in Social Demography Honorable Mention for the 2020 Thomas and Znaniecki Award from the International Migration Section of the American Sociological Association Over the last four decades immigration from the Caribbean and sub Saharan Africa to the U S has increased rapidly In several states African immigrants are now major drivers of growth in the black population While social scientists and commentators have noted that these black immigrants social and economic outcomes often differ from those of their native born counterparts few studies have carefully analyzed the mechanisms that produce these disparities In *Immigration and the Remaking of Black America* sociologist and demographer Tod Hamilton shows how immigration is reshaping black America He weaves together interdisciplinary scholarship with new data to enhance our understanding of the causes of socioeconomic stratification among both the native born and newcomers Hamilton demonstrates that immigration from the Caribbean and sub Saharan Africa is driven by selective migration meaning that newcomers from these countries tend to have higher educational attainment than those who stay behind As a result they arrive in the U S with some advantages over native born blacks and in some cases over whites He also shows the importance of historical context prior to the Civil Rights Movement black immigrants socioeconomic outcomes resembled native born blacks much more closely regardless of their educational attainment in their country of origin Today however certain groups of black immigrants have better outcomes than native born black Americans such as lower unemployment rates and higher rates of homeownership in part because they immigrated at a time of expanding opportunities for minorities and women in general Hamilton further finds that rates of marriage and labor force participation among native born blacks that move away from their birth states resemble those of many black immigrants suggesting that some disparities within the black population stem from processes associated with migration rather than from nativity alone Hamilton argues that failing to account for this diversity among the black population can lead to incorrect estimates of the social progress made by black Americans and the persistence of racism and discrimination He calls for future research on racial inequality to disaggregate different black populations By richly detailing the changing nature of black America *Immigration and the Remaking of Black America* helps scholars and policymakers to

better understand the complexity of racial disparities in the twenty first century **A Crisis of Leadership and the Role of Citizens in Black America** Stephen C.W. Graves,2016-05-12 A theoretical examination of the concepts of the citizen citizenship and leadership A Crisis of Leadership and the Role of Citizens in Black America Leaders of the New School proposes to develop a prototype or model of effective Black leadership Furthermore it examines citizenship habits of the Black community based on their economic standing educational attainment participation in the criminal justice system and health and family structure It tracks data in these four categories from 1970 to today measuring effective leadership by the improvement or decline in the majority of African Americans standing in these four categories This book concludes that African Americans have negative perceptions of themselves as U S citizens which thus produce bad citizenship habits Additionally ineffective Black leaders since the Civil Rights era have been unwilling to demonstrate the purpose and significance of service particularly to the poor and disadvantaged members of the Black community Contemporary Black leaders post Civil Rights Era have focused primarily on self promotion careerism and middle class interests A new type of leader is needed one that stresses unity and reinforces commitment to the group as a whole by establishing new institutions that introduce community building **Portrait of an Expatriate** Buelette E. Hodges,1985-11-14 LeRoy S Hodges Jr has

written a lively and informative biography of a Black writer of merit whose works have not enjoyed the wide readership they deserve Interweaving discussion and criticism of William Gardner Smith s literary work with an account of his life Hodges provides summaries and critical evaluations of Smith s novels and his nonfiction He gives us insight into the experience of Black writers who chose to live abroad and looks searchingly at the problem of alienation **We Will Shoot Back** Akinyele Omowale Umoja,2014-08-22 The notion that the civil rights movement in the southern United States was a nonviolent movement remains a dominant theme of civil rights memory and representation in popular culture Yet in dozens of southern communities Black people picked up arms to defend their leaders communities and lives In particular Black people relied on armed self defense in communities where federal government officials failed to safeguard activists and supporters from the violence of racists and segregationists who were often supported by local law enforcement In We Will Shoot Back Armed Resistance in the Mississippi Freedom Movement Akinyele Omowale Umoja argues that armed resistance was critical to the efficacy of the southern freedom struggle and the dismantling of segregation and Black disenfranchisement Intimidation and fear were central to the system of oppression in Mississippi and most of the Deep South To overcome the system of segregation Black people had to overcome fear to present a significant challenge to White domination Armed self defense was a major tool of survival in allowing some Black southern communities to maintain their integrity and existence in the face of White supremacist terror By 1965 armed resistance particularly self defense was a significant factor in the challenge of the descendants of enslaved Africans to overturning fear and intimidation and developing different political and social relationships between Black and White Mississippians This riveting historical narrative relies upon oral history archival

material and scholarly literature to reconstruct the use of armed resistance by Black activists and supporters in Mississippi to challenge racist terrorism segregation and fight for human rights and political empowerment from the early 1950s through the late 1970s Publisher's website

Race and U.S. Foreign Policy from 1900 Through World War II Michael L. Krenn, 2020-12-17 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and

racial hierarchies in law literature and culture How racialcategories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinaryresource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider ranger of periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source Authoritative commentary The series editor has put together a balanced selection of the most significant works accompanied by expert commentary A general introduction gives important background information and outlines fundamental issues current scholarship and scholarly controversies Introductions to individual volumes put the articles in context and draw attention to germinal ideas and major shifts in the field After reading the material even a beginning student will have an excellent grasp of the basics of the subject
