FX SWAP

A **foreign exchange swap** is a simultaneous purchase and sale, or vice versa, of identical amounts of one currency for another with two different value dates (normally **spot** to forward). The two parties agree a currency exchange on one day and simultaneously agree to unwind or reverse that deal on a date in the future. Effectively, each party is given the use of an amount of foreign currency for a specific time. Each party is taking a view on the relative movements of currencies and interest rates between those two dates, in comparison with their current relative prices. The price of a swap is quoted in forward points. The deal locks in the price of holding or taking delivery of an amount of foreign currency at a future date, or allows **arbitrage** between spot and forward rates.

Death of Corporate Reputation Jonathan Macey,2013-03-20 Why did the financial scandals really happen Why are they continuing to happen In *The Death of Corporate Reputation* Yale s Jonathan Macey reveals the real non intuitive reason and offers a new path forward For over a century law firms investment banks accounting firms credit rating agencies and companies seeking regular access to U S capital markets made large investments in their reputations They treated customers well and sometimes endured losses in transactions or business deals in order to sustain and nurture their reputations as faithful brokers and gate keepers This has changed completely The existing business model among leading participants in today s capital markets no longer treats customers as valued clients whose trust must be earned and nurtured but as one off counter parties to whom no duties are owed and no loyalty is required The rough and tumble norms of the market place have replaced the long standing reputational model in U S finance This book describes the transformation in American finance from the old reputational model to the existing laissez faire model and argues that the change came as a result of three factors 1 the growth of reliance on regulation rather than reputation as the primary mechanism for protecting customers and 2 the increasing complexity of regulation which made technical expertise rather than reputation the primary criterion on which customers choose who to do business with in today s markets and 3 the rise of the cult of personality on Wall Street
