## **Revealing The Economic Value Of Protecting The Great Lakes:**

Revealing the Economic Value of Protecting the Great Lakes Allegra Cangelosi, Northeast-Midwest Institute (U.S.), United States. National Oceanic and Atmospheric Administration, 2001      **Economic Valuation of River Systems** Fredrick J. Hitzhusen, 2007 the book provides a wide variety of practical examples of economic assessments of river management projects the book offers policy makers a nice range of valuation case studies and practical and illustrative guidance on the use of economic valuation results in cost benefit analysis of river management Marije Schaafsma Environmental and Resource Economics It is rare to find a book that attempts to integrate physical biological and social sciences economics to address environmental problems but this book does a great job of it It is also rare to find a book that addresses both the benefits and the costs of river restoration and again this book delivers This collection of case studies provides an informative and practical guide to conducting economic analyses of many different types of river restoration Scientists interested in quantifying the benefits and costs of river restoration will gain a very quick and thorough education from the case studies presented in this book John Loomis Colorado State University US The book applies benefit cost analysis and a wide array of non market and distribution economic valuation methods in ecologic context to determine the pay off and distribution impacts of various infrastructure and water quality improvements to eight river systems in the Great Lakes region of the US The generally positive results have important implications for public policy and future research Prime readership is the wide range of academics NGO and government agency staff and citizen action groups concerned with the management and protection of rivers and other natural resource systems      *Revealing the economic value of protecting the Great Lakes* ,2001

**Economic Valuation of Water Resources in Agriculture** R. Kerry Turner, 2004-01-01 The purpose of this report is to produce a review on water resource valuation issues and techniques specifically for the appraisal and negotiation of raw as opposed to bulk or retail water resource allocation for agricultural development projects The review considers raw water in naturally occurring watercourses lakes wetlands soil and aquifers taking an ecosystem function perspective at a catchment scale and takes account of the demands from irrigated and rainfed agriculture It is hoped that the review will have particular application to developing countries where agreed methods for reconciling competing uses are often absent but nevertheless takes account of valuation approaches that have been made in post industrial economies      **Advanced Modelling and Innovations in Water Resources Engineering** Chintalacheruvu Madhusudana Rao, K. C. Patra, D. Jhajharia, Sangeeta Kumari, 2021-11-16 This book presents select proceedings of the national conference on Advanced Modelling and Innovations in Water Resources Engineering AMIWRE 2021 and examines numerous advancements in the field of water resources engineering and management towards sustainable development of environment The topics covered includes river basin planning and development reservoir planning and management integrated water management reservoir sedimentation soil erosion and sedimentation agricultural technologies for climate change mitigation uncertainty analysis in hydrology water
