Reversals Of Fortune Public Policy And Private Interests:

Reversals of Fortune Gary Mucciaroni, 1995 In this book Gary Mucciaroni examines the shifting fortunes of economic interest groups in Washington Mucciaroni compares and contrasts four policy areas tax incentives anti competitive regulations trade barriers and agricultural subsidies where it is possible for interest groups to gain substantial benefits while paying little of the costs He finds that the fortunes of these groups vary considerably across policies over time *Groups, Interests, and U.S. Public Policy* William Paul Browne, 1998 Drawing on his extensive experience researching interest groups Browne assesses the impact that special interests have long had in shaping policy He explains how they fit into the policymaking process and into society how they exercise their influence and how they adapt to changing circumstances

Routledge Handbook of Public Policy Eduardo Araral, 2013 This Handbook provides a comprehensive global survey of the policy process Written by an outstanding line up of distinguished scholars and practitioners the Handbook covers all aspects of the policy process including Theory from rational choice to the new institutionalism Frameworks network theory advocacy coalition and development models Key stages in the process formulation implementation and evaluation Agenda setting and decision making The roles of key actors and institutions This is an invaluable resource for all scholars graduate students and practitioners in public policy and policy analysis Publisher description The Tools of Government Odus V.

Elliott, 2002-02-22 The new tools of public action have come to rely heavily on third parties private businesses nonprofit organisations and other levels of government for their operation The Tools of Government is a comprehensive guide to the operation of these tools and to the management accountability policy and theoretical issues they pose **Lobbying and Policymaking** Ken Godwin, Scott H. Ainsworth, Erik Godwin, 2013 Built on interviews with over 100 lobbyists Kenneth Godwin Scott Ainsworth and Erik Godwin show that much of the research on organized interests overlooks the lobbying of regulatory agencies even though it accounts for almost half of all lobbying even though bureaucratic agencies have considerable leeway in the how they choose to implement law This groundbreaking new book argues that lobbying activity is not mainly a struggle among competing interests over highly collective goods rather it is the public provision of private goods Through a series of highly readable case studies the authors employ both neopluralist and exchange perspectives to explore the lobbying activity that occurs in the later stages of the policymaking process which are typically less partisan involve little conflict and receive scant public attention Lobbying and Policymaking The Public Pursuit of Private Interests is an ideal way to expose students to cutting edge research in an accessible fascinating package *Justice Contained* Lisa J.

Conant, 2018-10-18 In this probing analysis of the European Union's transnational legal system Lisa Conant explores the interaction between law and politics In particular she challenges the widely held view that the European Court of Justice ECJ has through bold judicial activism brought about profound policy and institutional changes within the EU's member states She argues convincingly that this court like its domestic counterparts depends on the support of powerful organized interests

to gain compliance with its rulings What Conant asks are the policy implications of the ECJ's decisions How are its rulings applied in practice Drawing on the rich scholarship on the U S Supreme Court Conant depicts the limits that the ECJ and other tribunals have to face To illuminate these constraints she traces the impact of ECJ decisions in four instances concerning market competition and national discrimination She also proposes ways of anticipating which of this court's legal interpretations are likely to inspire major reforms Justice Contained closes with a comparative analysis of judicial power identifying the ECJ as an institution with greater similarities to domestic courts than to international organizations The book advances a deeper understanding both of the court's contributions to European integration and of the political economy of litigation and reform

An All-consuming Century Gary S. Cross, 2000 The victory of consumerism in America was not a foregone conclusion The United States has traditionally been home to the most aggressive and thoughtful critics of consumption such as Puritanism and Prohibition This work offers a history of how market forces came to dominate American life

Universal Coverage Rick Mayes, 2004 Examines why the U S is the only industrialized nation without universal health insurance coverage

The Population Ecology of Interest Representation Virginia Gray, David Lowery, 1996 This examination of lobbying communities explores how interest group populations are constructed and how they influence politics and public policy By examining how populations of interest groups are comprised this work fills an important gap between existing theories of the origins of individual interest groups and studies of interest group influence The population ecology model of interest communities developed here builds on insights first developed in population biology and later employed by organizational ecologists The model's central premise is that it is the environmental forces confronting interest organizations that most directly shape the contours of interest populations After examining the demography of interest organizations in the fifty American states the population ecology model is used to account for variations in the density and diversity of their interest communities the nature of competition among similar interest organizations to establish viable niches and the impact of alternative configurations of interest communities on the legislative process and the policies it produces These empirical findings suggest that the environment of interest communities is highly constraining limiting their size composition and potential impact on politics Virginia Gray is Professor of Political Science University of Minnesota David Lowery is Burton Craige Professor of Political Science University of North Carolina at Chapel Hill

Lobbying Reconsidered Gary Andres, Paul Hermanson, 2015-11-17 Lobbying Reconsidered Politics Under the Influence reveals how lobbying is a complex process that involves more than just relationships friends access favors and influence This book offers a broader perspective on this important dimension of American public policymaking As a person who straddles the worlds of Washington insider and interest group scholar author Gary Andres hopes to use his experience and insight in the lobbying world to help readers navigate beyond the conventional wisdom and guide them to a deeper broader understanding

Encyclopedia of Interest Groups and Lobbyists in the United States Immanuel Ness, 2015-07-17 A comprehensive

general reference on major American interest groups This encyclopedia provides information on the lobbies and interest groups that dominate modern American politics It provides descriptions of 13 categories of groups followed by A Z entries on the groups within that category *The Environmental Case* Judith A. Layzer, Sara R. Rinfret, 2019-08-13 Answers to environmental issues are not black and white Debates around policy are often among those with fundamentally different values and the way that problems and solutions are defined plays a central role in shaping how those values are translated into policy The Environmental Case captures the real world complexity of creating environmental policy and this much anticipated Fifth Edition contains fifteen carefully constructed cases Through her analysis Sara Rinfret continues the work of Judith Layzer and explores the background players contributing factors and outcomes of each case and gives readers insight into some of the most interesting and controversial issues in U S environmental policymaking **Plurality of Approaches to the Study of Public Policy**, 1995 Basic Interests Frank R. Baumgartner, Beth L. Leech, 1998-03-23 A generation ago scholars saw interest groups as the single most important element in the American political system Today political scientists are more likely to see groups as a marginal influence compared to institutions such as Congress the presidency and the judiciary Frank Baumgartner and Beth Leech show that scholars have veered from one extreme to another not because of changes in the political system but because of changes in political science They review hundreds of books and articles about interest groups from the 1940s to today examine the methodological and conceptual problems that have beset the field and suggest research strategies to return interest group studies to a position of greater relevance The authors begin by explaining how the group approach to politics became dominant forty years ago in reaction to the constitutional legal approach that preceded it They show how it fell into decline in the 1970s as scholars ignored the impact of groups on government to focus on more quantifiable but narrower subjects such as collective action dilemmas and the dynamics of recruitment As a result despite intense research activity we still know very little about how groups influence day to day governing Baumgartner and Leech argue that scholars need to develop a more coherent set of research questions focus on large scale studies and pay more attention to the context of group behavior Their book will give new impetus and direction to a field that has been in the academic wilderness too long **The Politics of Automobile Insurance Reform** Edward L. Lascher Jr., 1999-07-21 American state and Canadian provincial governments have dealt with rapidly rising auto insurance rates in different ways over the last two decades a difference many attribute to variances in political pressure exerted by interest groups such as trial attorneys and insurance companies Edward L Lascher Jr argues that we must consider two additional factors the importance of politicians beliefs about the potential success of various solutions and the role of governmental institutions Using case studies from both sides of the border Lascher shows how different explanations of the problem and different political structures affect insurance reform In his conclusion Lascher moves beyond auto insurance to draw implications for regulation and policymaking in other areas *The Politics of Corporate Taxation in the European*

Union Claudio Radaelli, 2013-01-11 This study explores the formation of the European Union's tax policy and asks why member states did not raise objections to it. The author's analysis is enriched by two further levels of inquiry. Firstly, he examines the Europeanization of domestic tax policy in Italy and the UK, asking how domestic policy has changed and what is meant by Europeanization. Secondly, he puts the European Union tax policy in the wider context of tax globalization. Will the liberalization of capital movement, tax havens, and the flexibility of multinationals in managing their taxable incomes wreck the European Union's fragile tax policies?

The Business of America is Lobbying Lee Drutman, 2015-03-19 Corporate lobbyists are everywhere in Washington. Of the 100 organizations that spend the most on lobbying, 95 represent business. The largest companies now have upwards of 100 lobbyists representing them. How did American businesses become so invested in politics? And what does all their money buy? Drawing on extensive data and original interviews with corporate lobbyists, *The Business of America is Lobbying* provides a fascinating and detailed picture of what corporations do in Washington, why they do it, and why it matters. Prior to the 1970s, very few corporations had Washington offices. But a wave of new government regulations and declining economic conditions mobilized business leaders. Companies developed new political capacities, and managers soon began to see public policy as an opportunity, not just a threat. Ever since, corporate lobbying has become increasingly more pervasive, more proactive, and more particularistic. Lee Drutman argues that lobbyists drove this development, helping managers to see why politics mattered and how proactive and aggressive engagement could help companies bottom-line. All this lobbying doesn't guarantee influence. Politics is a messy and unpredictable bazaar, and it is more competitive than ever. But the growth of lobbying has driven several important changes that make business more powerful. The status quo is harder to dislodge; policy is more complex, and as Congress increasingly becomes a farm league for K Street, more and more of Washington's policy expertise now resides in the private sector. These and other changes increasingly raise the costs of effective lobbying to a level only businesses can typically afford. Lively and engaging, rigorous and nuanced, *The Business of America is Lobbying* will change how we think about lobbying and how we might reform it.

A Republic No More Jay Cost, 2016-07-12 After the Constitutional Convention, Benjamin Franklin was asked, "Well, Doctor, what have we got: a Republic or a Monarchy?" Franklin's response: "A Republic, if you can keep it." This book argues we couldn't keep it. A true republic privileges the common interest above the special interests. To do this, our Constitution established an elaborate system of checks and balances that disperses power among the branches of government, which it places in conflict with one another. The Framers believed that this would keep grasping, covetous factions from acquiring enough power to dominate government. Instead, only the people would rule. Proper institutional design is essential to this system. Each branch must manage responsibly the powers it is granted, as well as rebuke the other branches when they go astray. This is where subsequent generations have run into trouble: we have overloaded our government with more power than it can handle. The Constitution's checks and balances have broken down because the institutions created in 1787 cannot exercise responsibly

the powers of our sprawling immense twenty first century government The result is the triumph of special interests over the common interest James Madison called this factionalism We know it as political corruption Corruption today is so widespread that our government is not really a republic but rather a special interest democracy Everybody may participate yes but the contours of public policy depend not so much on the common good as on the push and pull of the various interest groups encamped in Washington DC **The Organization Ecology of Interest Communities** Darren Halpin,David

Lowery,Virginia Gray,2016-04-29 This volume summarizes the origins and development of the organization ecology approach to the study of interest representation and lobbying and outlines an agenda for future research Multiple authors from different countries and from different perspectives contribute their analysis of this research program **Encyclopedia of Government and Politics** M. E. Hawkesworth,Maurice Kogan,2004 This is a brand new edition of the critically acclaimed Encyclopedia of Government and Politics which has been fully revised and updated to provide a systematic account of politics and political studies at the beginning of the new millennium Providing a penetrating analysis of government and politics at a global regional and nation state level the Encyclopedia assesses both traditional and contemporary approaches and projects the paths of future research The articles provide a degree of critical analysis far beyond a simple descriptive outline of the subject Internationally respected contributors have been carefully selected to present contending approaches to related topics both to clarify the political implications of the various methodologies and to enrich the portrayal of political life With its expanded revised and updated coverage Encyclopedia of Government and Politics is more than ever an indispensable tool for students teachers professional analysts and policy makers
