Ethnohistorical study of Native American histories and cultures has become, in the last generation, not only a growing academic field of scholarship and teaching in its own right, but has become indispensable to the practice of more general fields of study such as American Studies, American and global history, comparative religion, and art history -- and a more Native-centric approach has dramatically transformed studies in anthropology and archaeology, and political and legal history as well. This new centrality of Native perspectives, which is transforming so many humanities disciplines, is not a matter of political correctness, but of scholarly commitment to pursue more complete, more inclusive, and more nuanced research and teaching.

Our eight Visiting Faculty Scholars will share with the Summer Scholars their groundbreaking ethnohistorical research and legal/legislative historical research in a series of seminars on topics concerning Native American issues of land, sovereignty, culture and identity. Their work focuses on the negotiations, arrangements, and accommodations that different Native American groups have historically made, first with representatives of the European colonial enterprises of Early America, and then, in the national era, with the federal, state, and provincial governments of the U.S., Canada, and Mexico. In these studies, they also take into account the lesser-known stories of the trade, treaties, and negotiations that Native groups have made among themselves. The work our Visiting Faculty will present spans in time the 16th century contact era to the present, and ranges from studies of national scope, to

Walford's Guide to Reference Material: Science and technology Albert John Walford,Library Association,1996 Spirits of the Air Shepard Krech,2009 Before the massive environmental change wrought by the European colonization of the South hundreds of species of birds filled the region s flyways in immeasurable numbers Before disease war and displacement altered the South s earliest human landscape Native Americans hunted and ate birds and made tools and weapons from their beaks bones and talons More significant to Shepard Krech III Indians adorned themselves with feathers invoked avian powers in ceremonies and dances and incorporated bird imagery on pottery carvings and jewelry Krech a renowned authority on Native American interactions with nature reveals as never before the omnipresence of birds in Native American life From the time of the earliest known renderings of winged creatures in stone and earthworks through the nineteenth century when Native southerners took part in decimating bird species with highly valued fashionable plumage *Spirits of the Air* examines the complex and changeable influences of birds on the Native American worldview We learn of birds for which places and people were named birds common in iconography and oral traditions birds important in ritual and healing and birds feared for their links to witches and other malevolent forces Still other birds had no meaning for Native Americans Krech shows us these invisible animals too enriching our understanding of both the Indian bird dynamic and the incredible diversity of winged life once found in the South A crowning work drawing on Krech s distinguished career in anthropology and natural history *Spirits of the Air* recovers vanished worlds and shows us our own anew *Technology, Disease, and Colonial Conquests, Sixteenth to Eighteenth Centuries* George Raudzens,2003 This study consists of eight essays critical of the currently dominant guns and germs theories in the historiography of European colonial conquest causes Other methods of conquest notably communication control were as vital as firepower and disease importation and motives were often more important than methods **Archaeology of Bruce Trigger** Ronald F. Williamson,Michael S. Bisson,2006-08-24 The life and work of a renowned archaeologist *Medicine that Walks* Maureen K. Lux,2001-12-15 In this seminal work Maureen Lux takes issue with the biological invasion theory of the impact of disease on Plains Aboriginal people She challenges the view that Aboriginal medicine was helpless to deal with the diseases brought by European newcomers and that Aboriginal people therefore surrendered their spirituality to Christianity Biological invasion Lux argues was accompanied by military cultural and economic invasions which combined with the loss of the bison herds and forced settlement on reserves led to population decline The diseases killing the Plains people were not contagious epidemics but the grinding diseases of poverty

malnutrition and overcrowding *Medicine That Walks* provides a grim social history of medicine over the turn of the century It traces the relationship between the ill and the well from the 1880s when Aboriginal people were perceived as a vanishing race doomed to extinction to the 1940s when they came to be seen as a disease menace to the Canadian public Drawing on archival material ethnography archaeology epidemiology ethnobotany and oral histories Lux describes how bureaucrats missionaries and particularly physicians explained the high death rates and continued ill health of the Plains people in the quasi scientific language of racial evolution that inferred the survival of the fittest The Plains people s poverty and ill health were seen as both an inevitable stage in the struggle for civilization and as further evidence that assimilation was the only path to good health The people lived and coped with a cruel set of circumstances but they survived in large part because they consistently demanded a role in their own health and recovery Painstakingly researched and convincingly argued this work will change our understanding of a significant era in western Canadian history Winner of the 2001 Clio Award Prairies Region presented by the Canadian Historical Association and the 2002 Jason A Hannah Medal *International Journal of Canadian Studies* ,1995 When the Spirit Calls Edward J. Hedican,2023-03-30 In January 1832 in the most southern part of Ontario s James Bay an elderly Cree man by the name of Quapakay was told by the spirits of the shaking tent that in order to survive the winter he was required to spoil the post at Hannah Bay a Hudson s Bay Company goose hunting station Following the directions of the spirits Quapakay and his sons carried out this ill fated task resulting in the deaths of sixteen occupants of the Hannah Bay post Now known as the Hannah Bay Massacre the victims included fur trader William Corrigan the postmaster and his wife and seven other Indigenous people *When the Spirit Calls* explores the social cultural and historical context in which the Hannah Bay tragedy took place as gleaned from the Hudson Bay Company s archival records and elucidations by Cree oral traditions The research is the culmination of over forty years of investigation by Edward J Hedican in Indigenous communities from the mid 1970s to the present day In the book Hedican aims to uncover the circumstances behaviours and attitudes that led to the slaughter *When the Spirit Calls* sheds light on the racist attitudes held by the white settler population towards Indigenous people attitudes that were prevalent in our colonial past and that continue to this very day
