state of transformation reconsideration in the light of the past and reorientation with a view to the future To a large extent this is due to the tumultuous developments in the last 20 years developments which are unparalleled in the history of medicine and the consequences of which cannot yet be completely evaluated Unfortunately however the current situation is not devoid of its unpleasant and even tragic aspects aspects which fall outside the research worker s sphere or influence Those connected with drug research be they in industry in universities or in clinics are aware of these problems and as a result of this awareness are all the more in need of an aid which will assist them in ascertaining the current position and in fixing future goals
