Revisiting Marxism A Bourgeois Reassessment:

Revisiting Marxism Tibor R. Machan, 2006 For some time there has been no direct critique of Marx's ideas from those who value the position he most harshly attacked bourgeois capitalism. The few who did criticize Marx were economists such as Thomas Sowell, Eugen Böhm-Bawerk and Ludwig von Mises. Others attacked Marx's ideas but did not actually defend the concept of capitalism. In 1987, shortly before the fall of the Soviet Union, David Conway published his *Farewell to Marx* which offered a philosophical critique of Marx. This work however developed in part from a position that uncritically embraces economism or what the author calls the homo economicus conception of human life. In *Revisiting Marxism* Tibor Machan contrasts Marx's historicist collectivism with a neo-Aristotelian individualism as presented by among others David L. Norton and Ayn Rand. It criticizes Marxism based on this position, the one he most directly disparaged. Also included in this volume is an exchange between the author and the late Sidney Hook, perhaps the most sympathetic social democratic champion of Marx's ideas.

Revisiting Marx's Critique of Liberalism Igor Shoikhet, 2019-12-26 *Revisiting Marx's Critique of Liberalism* offers a theoretical reconstruction of Karl Marx's new materialist understanding of justice, legality and rights through the vantage point of his widely invoked but generally misunderstood critique of liberalism. The book begins by reconstructing Marx's conception of justice and rights through close textual interpretation and extrapolation. The central thesis of the book is firstly that Marx regards justice as an essential feature of any society including the emancipated society of the future and secondly that standards of justice and right undergo transformation throughout history. The book then tracks the enduring legacy of Marx's critique of liberal justice by examining how leading contemporary political theorists such as John Rawls, Jürgen Habermas, Axel Honneth and Nancy Fraser have responded to Marx's critique of liberalism in the face of global financial capitalism and the hollowing out of democratically enacted law. The Marx that emerges from this book is therefore a thoroughly modern thinker whose insights shed valuable light on some of the most pressing challenges confronting liberal democracies today.

American Anarchism Steve J. Shone, 2013-09-05 *American Anarchism* by Steve J. Shone is a work of political theory and history that focuses on nineteenth century American Anarchism together with two European anarchists who influenced some of the Americans. The nine thinkers discussed are Alexander Berkman, Voltairine de Cleyre, Samuel Fielden, Luigi Galleani, Peter Kropotkin, Lucy Parsons, Max Stirner, William Graham Sumner and Benjamin Tucker. Shone emphasizes the value of using ideas from nineteenth century American Anarchism to solve contemporary political problems.

Art, Politics and Society in Britain (1880-1914) Trevor Harris, 2009-10-02 The oldest word in politics is new. The oldest word in the writing of history may well be modern. It is without doubt one of the most overworked adjectives in the English language. But the indeterminacy is perhaps just another way of saying that the difficulties raised are of a kind which simply will not go away. This collection of eight essays on aspects of modernity and modernism takes up the challenge of examining the complex but fascinating convergence of aesthetics, politics and a quasi-spiritual dimension which

is perhaps typical of British modernist thinking about modernity This may have produced figures whom we now dismiss as eccentrics or aesthetes it none the less produced figures whom many still think of as in some sense embodying the national identity what after all could be more English than a William Morris wallpaper design Rather than towards socialism in any of its scientific guises what the British modernist approach to modernity may have been pushing at was yet another mutation of liberalism a libertarian humanitarian hybrid in which indigenous radical and Evangelical legacies keep scientific socialism in check where fellowship and domesticity edge out a larger scale more abstract fraternity and where citizenry or civisme give way to what George Orwell was later to define simply as decency

The Chinese Reassessment of Socialism, 1976-1992 Yan Sun,1995-08-21 A momentous debate has been unfolding in China over the last fifteen years only intermittently in public view concerning the merits of socialism as a philosophy of social justice and as a program for national development Just as Deng Xiaoping s better advertised experiment with market based reforms has challenged Marxist Leninist dogma on economic policy the years since the death of Mao Zedong have seen a profound reexamination of a more basic question to what extent are the root problems of the system due to Chinese socialism and Marxism generally Here Yan Sun gathers a remarkable group of primary materials drawn from an unusual range of sources to present the most systematic and comprehensive study of post Mao reappraisal of China s socialist theory and practice Rejecting an assumption often made in the West that Chinese socialist thought has little bearing on politics and policymaking Sun takes the arguments of the post Mao era seriously on their own terms She identifies the major factions in the debate reveals the interplay among official and unofficial forces and charts the development of the debate from an initially parochial concern with problems raised by Chinese practice to a grand critique of the theory of socialism itself She concludes with an enlightening comparison of the reassessments undertaken by Deng Xiaoping with those of Gorbachev linking them to the divergent outcomes of reform and revolution in their respective countries

Rethinking Marxist Approaches to Transition Onur Acaroglu,2020-09-25 In Rethinking Marxist Theories of Transition Onur Acaroglu traces the concept of transition across the tracts of Classical and Western Marxism Rarely directly invoked transition between different societies appears as an imminent social reality and a useful conceptual tool for critical social theory Transitions as qualitative shifts between societies are often considered as eventual historical stages or effaced altogether Theorising transition in a new direction Onur Acaroglu elaborates a theory of temporal dislocation Considering transition through a framework of out of joint temporalities the notion comes through as an undervalued tendency in social reproduction

Socialist Practice Victor Wallis,2020-02-18 The level of popular discontent in the United States as elsewhere has shown a dramatic increase in recent years but has yet to crystallize into a cohesive anti capitalist political

force Socialist Practice aims to contribute to a popular movement for socialism It does so by 1 revisiting under present conditions longstanding questions of Marxist theory and revolutionary history and 2 illustrating the range of issues activities and forms of expression that can both inform and be informed by a Marxist approach Essays spanning a range of national experiences address the crying need to generate a society wide awakening grounded in purposeful discussion among all those the vast majority whose interests are ill served by continuation of the status quo Rethinking Marx Sakari Hänninen, Leena Paldán, 1984 Rethinking the French Revolution George C. Comninel, 1987 Historians generally and Marxists in particular have presented the revolution of 1789 as a bourgeois revolution one which marked the ascendance of the bourgeois as a class the defeat of a feudal aristocracy and the triumph of capitalism Recent revisionist accounts however have raised convincing arguments against the idea of the bourgeois class revolution and the model on which it is based In this provocative study George Comninel surveys existing interpretations of the French Revolution and the methodological issues these raise for historians He argues that the weaknesses of Marxist scholarship originate in Marx's own method which has led historians to fall back on abstract conceptions of the transition from feudalism to capitalism Comninel reasserts the principles of historical materialism that found their mature expression in *Das Kapital* and outlines an interpretation which concludes that while the revolution unified the nation and centralized the French state it did not create a capitalist society

Resisting Neoliberal Capitalism in Chile Juan Pablo Rodríguez, 2019-12-18 This book explores the relationship between recent theoretical debates around the fate of critique of neoliberal capitalism and critical theory on the one hand and the critical theories generated in and by social movements in Chile on the other By taking the idea of social critique as a field that encompasses both critical social theories and the practices of social criticism carried out by social movements *Resisting Neoliberal Capitalism in Chile* explores how the student and the Pobladores movements map resist and contest neoliberal capitalism in commodified areas such as education and housing in Chile one of the first neoliberal experiments in Latin America and the world Henryk Grossman and the Recovery of Marxism Rick Kuhn, 2007 The first comprehensive English language Grossman biography **Rethinking German History (Routledge Revivals)** Richard J. Evans, 2015-08-11 In *Rethinking German History* first published in 1987 Richard J. Evans argues for a social historical approach to the German past that pays equal attention to objective social structures and subjective values and experiences If German history has been seen as an exception to the normal development of Western society this is not least because historians have until recently largely failed to look beyond the world of high politics institutions organizations and ideologies to broader historical problems of German society and German mentalities By applying and adapting approaches learned from French and British social history as they have been developed over the last quarter of a century it is possible to achieve a rethinking of German history which does away with many of the textbook myths that have encrusted the historiography of Germany for so long This book will be valuable for students of German history and politics and brings together essays widely

used in teaching Its broad coverage of social history will also be useful to all those interested in contemporary historiography or the comparative study of European history

Cultures in Motion Daniel T. Rodgers, Bhavani Raman, Helmut Reimitz, 2017-05-09 In the wide ranging and innovative essays of *Cultures in Motion* a dozen distinguished historians offer new conceptual vocabularies for understanding how cultures have trespassed across geography and social space From the transformations of the meanings and practices of charity during late antiquity and the transit of medical knowledge between early modern China and Europe to the fusion of Irish and African dance forms in early nineteenth century New York these essays follow a wide array of cultural practices through the lens of motion translation itinerancy and exchange extending the insights of transnational and translocal history *Cultures in Motion* challenges the premise of fixed stable cultural systems by showing that cultural practices have always been moving crossing borders and locations with often surprising effect The essays offer striking examples from early to modern times of intrusion translation resistance and adaptation These are histories where nothing dance rhythms alchemical formulas musical practices feminist aspirations sewing machines streamlined metals or labor networks remains stationary In addition to the editors the contributors are Celia Applegate Peter Brown Harold Cook April Masten Mae Ngai Jocelyn Olcott Mimi Sheller Pamela Smith and Nira Wickramasinghe

Reassessing Cold War Europe Sari Autio-Saraso, Katalin Miklóssy, 2010-10-18 This book presents a comprehensive reassessment of Europe in the Cold War period 1945-91 Contrary to popular belief it shows that relations between East and West were based not only on confrontation and mutual distrust but also on collaboration The authors reveal that despite opposing ideologies there was in fact considerable interaction and exchange between different Eastern and Western actors such states enterprises associations organisations and individuals irrespective of the Iron Curtain This book challenges both the traditional understanding of the East West juxtaposition and the relevancy of the Iron Curtain Covering the full period and taking into account a range of spheres including trade scientific technical co operation and cultural and social exchanges it reveals how smaller countries and smaller actors in Europe were able to forge and implement their agendas within their own blocs The book suggests that given these lower level actors engaged in mutually beneficial cooperation often running counter to the ambitions of the bloc leaders the rules of Cold War interaction were not in fact exclusively dictated by the superpowers

Recovering Bookchin Andy Price, 2023-04-04 *Recovering Bookchin* holds social ecologist Murray Bookchin's ideas and legacy alive Starting in the early 1960s Murray Bookchin 1921-2006 shaped a political and ethical response to the emerging ecological crisis which he called social ecology As Bookchin continued to publish and inspire the green movements of the 1980s and 1990s he found himself embroiled in debates that increasingly had less to do with his ideas and became a pastime for detractors who devised a crude caricature of him as a hopeless sectarian In *Recovering Bookchin* Andy Price dives into these debates and walks readers through the coherent and

consistent program of social ecology laid out by Bookchin This engaging intellectual biography will inspire readers in our age of government and corporate inaction as new feminist anticapitalist and people centered ecological movements are built

Gender, Generations, and Communism in Central and Eastern Europe and Beyond Anna Artwińska, Agnieszka Mrozik, 2020-06-03 Communism in twentieth century Europe is predominantly narrated as a totalitarian movement and or regime This book aims to go beyond this narrative and provide an alternative framework to describe the communist past This reframing is possible thanks to the concepts of generation and gender which are used in the book as analytical categories in an intersectional overlap The publication covers twentieth century Poland Czechoslovakia Czech Republic the Soviet Union Russia former Yugoslavia Turkish communities in West Germany Italy and Cuba as a comparative point of reference It provides a theoretical frame and overview chapters on several important gender and generation narratives about communism anticommunism and postcommunism Its starting point is the belief that although methodological reflection on communism as well as on generations and gender is conducted extensively in contemporary research the overlapping of these three terms is still rare The main focus in the first part is on methodological issues The second part features studies which depict the possibility of generational gender interpretations of history The third part is informed by biographical perspectives The last part shows how the problem of generations and gender is staged via the medium of literature and how it can be narrated
