Dynamics of Residential Water Demand and Supply in India A. Munian,2010 **Revitalizing the State** Pradip N. Khandwalla,1999 Power in the 21st Century Tanguy Struye de Swielande,Dorothee Vandamme,2015-12-23 This book results from a symposium organized by Genesys Network which took place on April 29th 2015 in Louvain la Neuve Belgium The organizers invited contributors to think about the concept of power in the context of the evolving international system and what it implied for the study of the concept in IR academic field Indeed if the end of the Cold War was characterized by a unipolar moment as defined by Krauthammer in 1991 this period is starting to come to an end While the United States remains arguably a global superpower its position is more and more disputed by other actors Likewise new centers of power have emerged Today s world is complex and transitional characterized by both short and long term challenges interactions among these powers remain to be apprehended and understood In the last decade we have also observed an economic and partially political shift or redistribution of power from the West to the Rest on the classical state power chessboard The beginning of the 21st century thus constitutes an important challenge for the super and emerging or resurgent powers The new global state of affairs is characterized by conditions that are more complex than in the past In these circumstances and in the face of these worldwide trends the concept of power has evolved and the need to redefine or think the concept has become a necessity The present book thus aims at presenting the diversity of views on the concept of power but also perhaps more importantly their complementarity Transforming Asian Governance M Ramesh,Scott Fritzen,2009-01-13 There are a multitude of hazards that confront attempts to change institutional or political orders in pursuit of good governance Even seemingly technical prescriptions run up against local political and social realities which make their adoption difficult and if adopted require significant modification of the original prescriptions Moreover the technical rationalist and or normative language employed in the good governance discourse masks contests over power rights resources and actors conflicting interests There is a definite need to situate the good governance debate in the local context rather than reflexively adopting a universalistic positing of the fact or desirability of governance convergence across countries and sectors because the reality is that the world wide deployment of good governance rhetoric is not accompanied by convergence in thinking or practices across nations Transforming Asian Governance asks How do good governance principles translate into local settings How do local settings influence the conception of what is good governance and how the debate over good governance is deployed as a political or administrative strategy Using case studies in governance from Thailand the Philippines Pakistan Malaysia India Indonesia Korea and Japan this book will be essential reading for anyone interested in the public and social policy of Asia and international and comparative governance more generally Indian Administration Hoshiar Singh,Pankaj Singh,2011 Indian Administration is a critical and analytical guide to all the important aspects of public administration in India Based on books journals notes files and government reports in the field it examines the government and the administration at every level and

tier Its wide coverage includes all the major landmarks in the evolution of Indian administration panchayati raj and urban local government after the constitutionalization of local government in India as well as district planning and the District Planning Committee It also addresses the issues plaguing our bureaucracy making full use of reports from the Administrative Reforms Commission and various other committees Comprehensive and well researched this book will fulfil the needs of students of political science and public administration as well as candidates for civil service examinations and will also be a valuable resource to scholars administrators and the general reader interested in the subject

Governance and the Depoliticisation of Development Wil Hout, Richard Robison, 2008-11-24 This book is about the way governance has become the new orthodoxy of development following earlier failed attempts at building working market economies through policy reform in developing countries Considering how its proponents define good governance the contributors to this volume assess why programmes of governance building in developing countries have proven to be no less problematic than the previous agendas of market reform Governance and the Depoliticisation of Development challenges ideas that deeper political and social problems of development may be addressed by institutional or governance fixes It examines the principles and prescriptions of good governance as part of larger conflicts over power and its distribution The volume provides a series of case studies from Latin America Middle East and Asia a link to current theorising on neoliberalism and the post Washington Consensus a focus on governance at the global and national levels from a comparative perspective The collection will be essential reading for researchers and scholars of international political economy governance studies and political science
