Rival Capitalists Jeffrey A. Hart, 2018-08-06 Great Britain France Germany and Japan Surveying the development of the steel automobile and semiconductor industries in each of these countries Jeffrey A Hart illuminates the role of national policy in a changing world Hart describes the global structure of production and consumption in the five major capitalist countries and offers a rich comparative history of their industrial policymaking He concludes that variations in statesocietal arrangements and the impact these differences have on the creation and diffusion of new technologies provide the best explanation for divergences in international competitiveness In Japan state and business are allied but labor is marginalized whereas in Germany labor and business are allied and the state is decentralized Yet both countries have become increasingly competitive because they have developed institutional mechanisms for technology diffusion France s state led system in contrast is linked with only moderate competitiveness The decline of competitiveness in the United States

and Britain Hart concludes may be attributed to state societal arrangements that have allowed one actor labor in Britain business in the United States to dominate policymaking Rival Capitalists will be an invaluable source for policymakers and business analysts as well as scholars and students of political economy international relations industrial organization industrial sociology and comparative politics Telecommunications Research Resources James K.
