**Birth and Death of Meaning** Ernest Becker, 2010-05-11 Uses the disciplines of psychology anthropology sociology and psychiatry to explain what makes people act the way they do *Sociology and the Real World* Stephen Lyng, David D. processes of socialization It argues that socialization does not represent a fixed trajectory into a static social order and that different disciplines meet the challenges of complex developmental processes and changing environments in different ways Socialization is a fundamental concept in sociology but sociology has only to a limited degree sought to produce a coherent understanding of the processes of socialization which has to encompass the interplay of societal psychological and genetic factors This book draws the threads together and by doing so offers a general framework for our understanding of the socialization process At the centre of this process is the child as a subject in an interplay with the patterns and significant others of the micro environment as well as with the macro conditions of the modern knowledge based economies *General Nonfiction Award 1962 - 1993* Heinz-D.
