Making Time Gavin Lucas, 2021-04-25 Making Time grapples with a range of issues that have crystallized in the wake of 15 years of discussion on time in archaeology since the author's seminal volume The Archaeology of Time synthesizing them for a new generation of scholars The general understanding of time held by both archaeologists and non archaeologists is often very simple a linear notion where time flows along a single path from the past into the future This book sets out to complicate this image to draw out the key problems and issues with time that impact archaeological interpretation Using concrete examples drawn from different periods and places the book challenges the reader to think again Ultimately the book will suggest that if we want to understand what archaeological time is then we need to accept that things do not exist in time they make time The crucial question then becomes what kinds of time do archaeological materialities produce Written for upper level undergraduates and researchers in archaeology the book is also accessible to non academics with an interest in the topic The book is relevant for cognate disciplines especially history heritage studies and philosophy

Millenarianism and Messianism in Early Modern European Culture J.E. Force,R.H. Popkin,2013-04-17 Thanks to the work of legions of scholars the millenarian expectations within large segments of the population in Cromwellian England have been carefully examined The widespread belief that England with its messianic leader 1 Cromwell heralded the millennium is well known Less well examined perhaps has been the cultural conceptions of the role of millenarian and messianic ideas in the long eighteenth century Especially during the stable

Hanoverian era until the American and French Revolutions the common place millennial expectations of the English Civil War appeared to recede By the end of the eighteenth century with the Napoleonic wars millenarian views and interpretations underwent a minor renaissance but with nothing like the fervor it is commonly thought of the Puritan era when so many believed that the end was near By the end of the eighteenth century so the official story goes the religious sceptics and deists of Enlightened England such as David Hume had done too well their work of tarring such religious radicalism with the brush of enthusiasm Happily this official interpretation of the events of the early modern period in which scholars have too often taken their cue from writers such as Hume and simply ignored millenarian contexts and expectations in the Age of Reason has undergone a marked shift in the past twenty years

Millenarianism and Messianism in Early Modern European Culture Matt Goldish,R.H. Popkin,J.E. Force,2001-07-31 The influence of millenarian thinking upon Cromwell s England is well known The cultural and intellectual conceptions of the role of millenarian ideas in the long 18th century when so the official story goes the religious sceptics and deists of Enlightened England effectively tarred such religious radicalism as enthusiasm has been less well examined This volume endeavors to revise this official story and to trace the influence of millenarian ideas in the science politics and everyday life of England and America in the 17th and 18th centuries

Standardization in the Middle Ages Line Cecilie Engh,Svein Harald Gullbekk,Hans Jacob Orning,2024-08-19 We live in a world riven through with standards To understand more of their deep rich past is to understand ourselves better The two volumes Standardization in the Middle Ages Volume 1 The North and Standardization in the Middle Ages Volume 2 Europe turn to the Middle Ages to give a deeper understanding of the medieval ideas and practices that produced and were produced by standards and standardization At first glance the Middle Ages might appear an unlikely place to look for standardization The editors argue that on the contrary generating predictability is a precondition for meaningful cultural interaction in any historical period and that we may look to the Middle Ages to learn more about the historical social and cognitive processes of standardization This multidisciplinary venture which includes medievalists from the fields of history intellectual history art history philology numismatics and more as well as scholars of cognitive science informatics and anthropology interrogates how medieval people and groups envisioned and enforced predictability uniformity

and order and how they attempted to obtain and maintain standards across vast distances and heterogeneous social and cultural structures
