Revolution News:

The News Revolution in England Charles John Sommerville, 1996 The News Revolution in England Cultural Dynamics of Daily Information is the first book to analyze the essential feature of periodical media which is their periodicity Having to sell the next issue as well as the present one changes the relation between authors and readers or customers and subtly shapes the way that everything is reported whether politics the arts and science or social issues So there are certain biases that are implicit in the dynamics of news production or commodified information quite apart from the intentions of journalists With the birth of the commercial periodical in late seventeenth century England news became a commodity What constituted news how it was presented and received and how people responded to it underwent a fundamental change Rather than any democratic print revolution in which the masses suddenly had access to cheap and accessible information C John Sommerville shows that the arrival of the commercial press was in fact restrictive dictating what was discussed and ultimately how it was discussed The News Revolution in England looks at the history of journalism from an entirely different angle the effect of the medium rather than the intentions of the journalists It will be of interest to historians of England journalism and news along with anyone interested in how the media shapes our world and how we come to relate to it
