Moving Sculptures Aleksandra Lipińska, 2015-01-27 The Low Countries are generally considered to be the land of painting Consequently sculpture especially that of the 16th century has been insufficiently explored In Moving Sculptures Aleksandra Lipińska presents a little known chapter of the history of Netherlandish sculpture the serial production of small scale alabaster reliefs altarpieces and statuettes in the workshops of Mechelen and Antwerp between c 1525 and 1650 She

gives the reader an insight into the rules of this craft the specificity of the material and the marketing methods employed But the innovative element of this study lies in the fact that Lipi ska analyses the phenomenon from the perspective of its distant recipients in Central and Northern Europe on the basis of works largely unknown to the broader public For sample pages click on Google Books button
