Sculpture Since 1945:

Sculpture Since 1945 Andrew Causey, 1998 This fresh account of post war sculpture examines innovative and avant garde works SCULPTURE SINCE ~1945œ (NINETEEN HUNDRED AND FORTY-FIVE). Edward Lucie-Smith, 1987

Sculpture Since 1945 Edward Lucie-Smith, 1987 In *Sculpture since 1945* Edward Lucie Smith classifies the full range of movements and provides an explanation of their development and how they are related to one another He begins by reflecting on the work of the early modernists Auguste Rodin Pablo Picasso Marcel Duchamp and Jacob Epstein and proceeds to look at the succeeding influences and revolutions in sculpture from the Constructivist and neo classical works of the immediate post war years to the Minimalism Pop Conceptual and Land Art of the sixties and seventies and the return to figurative imagery of the 1980 s Many of the new sculptors Henry Moore Alberto Giacometti Marino Marini David Smith are dealt with at length and altogether some 200 artists are discussed **BOOK JACKET** **Portraiture** Shearer West, 2004-04-08 This fascinating new book explores the world of portraiture from a number of vantage points and asks key questions about its nature How has portraiture changed over the centuries How have portraits represented their subjects and how have they been interpreted Issues of identity modernity and gender are considered within a cultural and historical context Shearer West uncovers much intriguing detail about a genre that has often been seen as purely representational featuring examples from African tribes to Renaissance princes and from stars such as David and Victoria Beckham to ordinary people In the process she shows us how to communicate with the past in an exciting new way British Sculpture Since 1945 Dennis Farr, 1967 History of Art Horst Woldemar Janson, Anthony F. Janson, 2004 For forty years this widely acclaimed classic has remained unsurpassed as an introduction to art in the Western world boasting the matchless credibility of the Janson name This newest update features a more contemporary more colorful design and vast array of extraordinarily produced illustrations that have become the Janson hallmark A narrative voice makes this book a truly enjoyable read and carefully reviewed and revised updates to this edition offer the utmost clarity in contributions based on recent scholarship Extensive captions for the book s incredible art program offer profound insight through the eyes of twentieth century art historians speaking about specific pieces of art featured throughout Significantly changed in this edition is the chapter on The Late Renaissance in which Janson offers a new perspective on the subject tracing in detail the religious art tied to the Catholic Reform movement whose early history is little known to many readers of art history Janson has also rearranged early Renaissance art according to genres instead of time sequence and he has followed the reinterpretation of Etruscan art begun in recent years by German and English art historians With a truly humanist approach this book gives written and visual meaning to the captivating story of what artists have tried to express and why for more than 30 000 years *Joe Fafard* Terrence Heath, National Gallery of Canada, 2007 Few contemporary artists have worked in the sheer variety of styles that Joe Fafard has perfected and won such acclaim for their efforts Born in 1942 in a remote farming hamlet in Saskatchewan

the idiosyncratic artist early on chose a radically different direction from the prevailing modernistic aesthetic of the early 1960s boldly exploring new media and new imagery Gaining fame initially as a ceramic sculptor of oversize animals and people in the early 1980s he turned to laser steel and bronze work along the way adding painting to his repertoire This dual biography and critical study features a wealth of illustrations from Fafard s long career generously sampling both the monumental sculptures done as public and private commissions and the more intimate studies of people and prairie that reside in museums worldwide and in the private collections of Oprah Winfrey Bill Cosby and others Materials and Processes of Contemporary Sculpture Mahmoud Farag,2020-01-17 Creating a successful sculpture requires an imaginative concept and a sound design that utilize the potential and avoid the limitations of the material and the process used in making it Prior to a few decades ago most sculptors were restricted to carving stone and wood or casting plaster ceramics and bronze for their creations Contemporary sculptors however are no longer bound by the limitations of these traditional materials and processes and can now create works in sizes forms and textures that could not have been achieved previously Many modern sculptures are now made from materials ranging from steel and aluminum to plastics and composites using processes ranging from welding and adhesive bonding to molding and 3D printing To fully utilize the full potential of such new materials the sculptor needs to understand their points of strength their limitations and the most effective way of shaping them to achieve a given design Although this book is written by a materials engineer the subject matter is presented from the point of view of the sculptor with emphasis on the strengths and weaknesses of different materials their resistance to weather conditions natural color and possible surface textures possible methods of shaping and joining tools and equipment needed and safety measures to take Whenever possible case studies are used to illustrate the sequence of processes and the cost elements involved in shaping a given material to create an actual work of sculpture *Medieval Architecture* Nicola Coldstream,2002 Medieval architecture comprises much more than the traditional image of Gothic cathedrals and the castles of chivalry A great variety of buildings synagogues halls and barns testify to the diverse communities and interests in western Europe in the centuries between 1150 and 1550 This book looks at their architecture from an entirely fresh perspective shifting the emphasis away from such areas as France towards the creativity of other regions including central Europe and Spain Treating the subject thematically Coldstream seeks out what all buildings both religious and secular have in common and how they reflect the material and spiritual concerns of the people who built and used them Furthermore the author considers how and why after four centuries of shaping the landscapes and urban patterns of Europe medieval styles were superseded by classicism *Byzantine Art* Robin Cormack,2018-02-27 The opulence of Byzantine art with its extravagant use of gold and silver is well known Highly skilled artists created powerful representations reflecting and promoting this society and its values in icons illuminated manuscripts and mosaics and wallpaintings placed in domed churches and public buildings This complete introduction to the whole period and range of Byzantine art combines

immense breadth with interesting historical detail Robin Cormack overturns the myth that Byzantine art remained constant from the inauguration of Constantinople its artistic centre in the year 330 until the fall of the city to the Ottomans in 1453 He shows how the many political and religious upheavals of this period produced a wide range of styles and developments in art This updated colour edition includes new discoveries a revised bibliography and in a new epilogue a rethinking of Byzantine Art for the present day *Renaissance Architecture* Christy Anderson, 2013-02-28 The Renaissance was a diverse phenomenon marked by innovation and economic expansion the rise of powerful rulers religious reforms and social change Encompassing the entire continent Renaissance Architecture examines the rich variety of buildings that emerged during these seminal centuries of European history Although marked by the rise of powerful individuals both patrons and architects the Renaissance was equally a time of growing group identities and communities and architecture provided the public face to these new identities Religious reforms in northern Europe spurred on by Martin Luther rejected traditional church function and decoration and proposed new models Political ambitions required new buildings to satisfy court rituals Territory nature and art intersected to shape new landscapes and building types Classicism came to be the international language of an educated architect and an ambitious patron drawing on the legacy of ancient Rome Yet the richness of the medieval tradition continued to be used throughout Europe often alongside classical buildings Examining each of these areas by turn this book offers a broad cultural history of the period as well as a completely new approach to the history of Renaissance architecture The work of well known architects such as Michelangelo and Andrea Palladio is examined alongside lesser known though no less innovative designers such as Juan Guas in Portugal and Benedikt Ried in Prague and Eastern Europe Drawing on the latest research it also covers more recent areas of interest such as the story of women as patrons and the emotional effect of Renaissance buildings as well as the impact of architectural publications and travel on the emerging new architectural culture across Europe As such it provides a compelling introduction to the subject for all those interested in the history of architecture society and culture in the Renaissance and European culture in general *Architecture in the United States* Dell Upton, 1998 From Native American sites in New Mexico and Arizona to the ancient earthworks of the Mississippi Valley to the most fashionable contemporary buildings of Chicago and New York American architecture is incredibly varied In this revolutionary interpretation Upton examines American architecture in relation to five themes community nature technology money and art 109 illustrations 40 linecuts Map *Provocative Plastics* Susan Lambert, 2021-01-07 Plastics have now been our most used materials for over fifty years This book adopts a new approach exploring plastics contribution from two perspectives as a medium for making and their value in societal use The first approach examines the multivalent nature of plastics materiality and their impact on creativity through the work of artists designers and manufacturers The second perspective explores attitudes to plastics and the different value systems applied to them through current research undertaken by design materials and socio cultural historians The book addresses the environmental impact of plastics and

elucidates the ways in which they can and must be part of the solution The individual viewpoints are provocative and controversial but together they present a balanced and scholarly unpicking of the debate that surrounds this ubiquitous group of materials The book is essential reading for a wide academic readership interested in the Arts and Humanities especially Design and Design History Anthropology and Cultural Material and Social Histories **Art After the Bomb** Darrell D. Davisson, 2008 This book is requisite reading material for any person claiming to be an educated and informed member of the global community Our understanding in the West of the Eastern cultures specially the different cultures involving the Muslims is alarmingly low The book strives to offer a view from the ground a keyhole perspective that offers the readers a close and personal peek into some of the ethical underpinnings and the philosophical guiding parameters that inform the Muslim and the Eastern mind There are over 1.3 billion Muslims in the world It would be a serious intellectual fallacy to assume that they are all homogenous or to be more preposterous assume they are all terrorists It is extremely tragic that it took the Iranian hostage crisis to teach us about Shia Islam and 9/11 to teach us about Wahabi Islam Properly acquired knowledge not just what we learn from the media will allow us to be anticipatory and rational rather than being reactive and emotional For the Muslim reader specially the children and the youth the book strives to offer a deeper understanding of Islam beyond the boundaries of ritual Islam into the wide open space of spiritual and intellectual Islam To inspire them to appreciate and live up to the wonderful legacy of Islam and not to be mired down into some deviant interpretations of people with questionable motives The book is designed to encourage the process of tearing down walls and building bridges We share common dreams aspirations and challenges We share a common globe and a common destiny The author believes that there are no clashes of civilizations just clashes of ignorance and misunderstanding **Area Handbook for North Korea** Rinn-Sup Shinn, American University (Washington, D.C.). Foreign Area Studies, 1969 **The Grove Encyclopedia of Materials and Techniques in Art** Gerald W. R. Ward, 2008 The Grove Encyclopedia of Materials and Techniques deals with all aspects of materials techniques conservation and restoration in both traditional and nontraditional media including ceramics sculpture metalwork painting works on paper textiles video digital art and more Drawing upon the expansive scholarship in The Dictionary of Art and adding new entries this work is a comprehensive reference resource for artists art dealers collectors curators conservators students researchers and scholars Similar in design to The Grove Encyclopedia of Decorative Arts this one volume reference work contains articles of various lengths in alphabetical order The shorter more factual articles are combined with larger multi section articles tracing the development of materials and techniques in various geographical locations The Encyclopedia provides unparalleled scope and depth and it offers fully updated articles and bibliography as well as over 150 illustrations and color plates The Grove Encyclopedia of Materials and Techniques offers scholarly information on materials and techniques in art for anyone who studies creates collects or deals in works of art The entries are written to be accessible to a wide range of readers and the work is designed as a reliable and convenient

resource covering this essential area in the visual arts Roman Architecture Janet DeLaine, 2024-05-09 Roman Architecture casts new light not only on many familiar monuments of the city of Rome but also on less well known examples from across the Roman empire Rome and its empire were fundamental to the development of western architecture and its forms and motifs remain significant elements of our own built environments Roman Architecture places the varied architecture of ancient Rome from its humble apartment blocks to its grand public structures within the broader context of Roman society It takes as its starting point the writings of the Roman architect Vitruvius as one voice in a broader contemporary debate about the nature and value of architecture What did the Romans themselves think architecture was for What was built by whom and why How was architecture represented in text and image The interplay of type and variation that are the hallmark Roman architecture are here traced back to the human actions and choices from which they originated Janet DeLaine explores how the desires of patrons for novelty and individuality were met by architects and builders working within the practical constraints of available materials and the moral prescriptions of religious and social norms to create new forms Ranging from early Rome to the late empire this volume casts new light on many familiar monuments of the city of Rome but also on less well known examples from across the empire Through an examination of the key types of buildings at the heart of Roman society and their decoration it reveals the symbolic meaning of architecture in terms of competitive power displays and commemoration and it explores how architecture helped to define being Roman at different times and in different places of the empire **Varieties of Modernism** Paul Wood, 2004-01-01 This work discusses the art of the middle third of the twentieth century It consists of a short general introduction and four parts each concentrating on a key aspect of the art of the period Design in the USA Jeffrey L. Meikle, 2005-07-28 From the Cadillac to the Apple Mac the skyscraper to the Tiffany lamp the world in which we live has been profoundly influenced for over a century by the work of American designers But the product is only the end of a story that is full of fascinating questions What has been the social and cultural role of design in American society To produce useful things that consumers need Or to persuade them to buy things they don't need Where does the designer stand in all of this And how has the role of design in America changed over time since the early days of the young Republic Jeffrey Meikle explores the history of American design from the hand crafted furniture and artifacts of the early nineteenth century through the era of industrialization and the mass production of the machine age to the information based society of the present covering everything from the Arts and Crafts movement to Art Deco modernism to post modernism the MOMA to the Tupperware bowl Beautifully illustrated Design in the USA also includes suggestions for further reading a timeline and a list of relevant museums and web sites It is an excellent source of information for anyone seeking to uncover the imagination and industry behind American design Public Sculpture of Staffordshire and the Black Country George Thomas Noszlopy, Fiona Waterhouse, 2005-01-01 The Black Country is an area historically known as the cradle of the Industrial Revolution a thriving region built around deep coal seams conjuring up images of fiery red furnaces

by night and black sooty citadels by day Yet today the resource rich region also features many striking public sculptures This volume provides a comprehensive catalog to all of the historic sculptures and public monuments in Staffordshire and the Black Country George Noszlopy and Fiona Waterhouse catalog each individual sculpture in detail including information about the sculptor the sculpture s historical and artistic significance the commissioning agent and the date of installation The volume also features 350 black and white photographs that document the diverse and rich beauty of the region s public monuments The ninth volume in the widely acclaimed award winning Public Sculpture of Britain series Public Sculpture of Staffordshire and the Black Country is an invaluable resource for British historians art scholars and travelers alike
