In addition to presenting the major theoretical perspectives, the book examines a range of important and controversial topics in modern debates covering both traditional military and non-military security issues such as proliferation, humanitarian intervention, food security, and environmental security. Unlike most standard textbooks, the volume also offers a wide range of case studies including chapters on the USA, China, the Middle East, Russia, Africa, the Arctic, the Middle East, Europe, and Latin America, providing detailed analyses of important global security issues. The 34 chapters contain pedagogical features such as textboxes, summary points, and recommended further reading, and are divided into five thematic sections: Conceptual and Theoretical, Military Security, Non-Military Security, Institutions, and Security Case Studies. This textbook will be essential reading for all students of security studies and highly recommended for students of critical security studies, human security, peace and conflict studies, foreign policy, and International Relations in general.

Space Support of U.S. National Security James Arnold Miller, 1988 Air Force Magazine, 2012 *The 9-11 Syndrome* Thomas Blow, 2002-09 The 9/11 Syndrome describes a problem Americans have in resolving to prepare against new and different threats before they occur. This syndrome is detailed as a pattern of societal behavior that requires murderous attacks and other elements before effective action can be taken. However, a major future challenge is on the horizon in which the pattern doesn't work: a third challenge on the order of a Pearl Harbor or a 9/11: a Pearl Harbor in space that would leave America without access to space, living beneath a virtual laser curtain. Many concrete differences in this type of challenge indicate that unless America breaks with the pattern and takes prior preventive measures, Americans may awaken to learn they have no reasonable options for recovering after the fact. If the Syndrome can be overcome, the book describes specific alternatives that will be available; otherwise, Americans may have only the ability to threaten potentially grave terrestrial wars or to do nothing of substance and watch America in terminal decline.
