The World in Which We Occur

Neil W. Browne, 2007-10-31 Understanding our environment American philosopher John Dewey considered all human endeavors to be continuous with the natural world In his writings particularly *Art as Experience* 1934 Dewey insists on the primacy of the environment in aesthetic experience Dewey's conception of environment includes both the natural and the man made Neil Browne highlights this notion in order to define what he terms pragmatist ecology a practice rooted in the interface of the cultural and the natural which he finds to be a significant feature of some of the most important ecological writing of the last century To fully understand human involvement in the natural world Browne argues disciplinary boundaries must be opened up This is primarily important between the arts and science with profound implications for the practice of democracy The degradation of the physical environment and democratic decay for Browne are rooted in the same problem our persistent belief that humans are somehow separate from their physical environment Browne probes the work of a number of major American writers through the lens of Dewey's philosophy Among other texts he examines John Muir's *My First Summer in the Sierra* 1911 *Sea of Cortez* 1941 by John Steinbeck and Edward Ricketts Rachel Carson's three books about the sea *Under the Sea Wind* 1941 *The Sea Around Us* 1951 and *The Edge of the Sea* 1955 John Haines's *The Stars the Snow the Fire* 1989 Tarry Lopez's *Arctic Dreams* 1986 and Terry Tempest Williams's *Refuge* 1991 Together these texts with their combinations of scientific observation and personal meditation challenge the dichotomies to which we've become accustomed and affirm the values of a pragmatist ecology one in which ecological and democratic values go hand in hand

Lynch, 2023-11-23 Benford's Law is a probability distribution for the likelihood of the leading digit in a set of numbers This book seeks to improve and systematize the use of Benford's Law in the social sciences to assess the validity of self-reported data The authors first introduce a new measure of conformity to the Benford distribution that is created using permutation statistical methods and employs the concept of statistical agreement In a switch from a typical Benford application this book moves away from using Benford's Law to test whether the data conform to the Benford distribution to using it to draw conclusions about the validity of the data The concept of Benford validity is developed which indicates whether a dataset is valid based on comparisons with the Benford distribution and in relation to this diagnostic procedure that assesses the impact of not having Benford validity on data analysis is devised
