Search For Identity:

Collective Search for Identity Orrin Edgar Klapp, 1969 From the Preface This book is about identity seeking movements of modern society It deals with such things as fashions fads poses ritual cultic movements recreation heroes and celebrities and crusades from the point of view of what they tell about the identity search of a mass society My view briefly is that a collective identity search is symptomatic of the fact that some modern social systems deprive people of psychological payoffs the lack of which expressed by terms such as alienation meaninglessness identity problem motivates a mass groping for activities and symbols with which to restore or find new identity People grope because they do not really know what is wrong especially when there is physical prosperity yet a sense of being cheated When mass movements become concerned with identity they develop certain characteristics such as ego screaming concern with costume and self ornamentation style rebellion concern with emotional gestures rather than practical effects adulation of heroes cultism and the like with which I shall deal Such signs show that ordinary economic and political solutions are not what is wanted People feel the futility and irrelevance of such measures yet do not know quite what else to do

Strauss, 2017 Identity as a concept is as elusive as everyone's sense of his own personal identity It is connected with appraisals made by oneself and by others Each person sees himself mirrored in the judgments of others The masks he presents to the world are fashioned upon his anticipations of judgments In Mirrors and Masks Anselm Strauss uses the notion of identity to organize materials and thoughts about certain aspects of problems traditionally intriguing to social psychologists The problems Strauss considers to be intriguing traditionally are those encountered when studying group membership motivation personality development and social interaction The topics covered include the basic importance of language for human action and identity the perpetual indeterminacy of identities in constantly changing social contexts the symbolic and developmental character of human interaction the theme of identity as it affects adult behavior relations between generations and their role in personality development and the symbolic character of membership in groups By focusing on symbolic behavior with an emphasis on social organization Strauss presents a fruitful systematic perspective from which to view traditional problems of social psychology He opens up new areas of thought and associates matters that are not ordinarily considered to be related Strauss believes that psychiatrists and psychologists underestimate immensely the influence of social organization upon individual behavior and individual structure and that sociologists whose major concern is with social organization should employ some kind of social psychology in their
