Last of the Wild Robert M. McClung, 1997 Profiles threatened animals around the world and discusses why they are in danger and what is being done to save them

The Divine Life of Animals Ptolemy Tompkins, 2011-06-07 A journey through 20 000 years of history and myth in search of the answer to a single question Do animals have souls Anyone who has ever mourned the loss of a cherished pet has wondered about the animal soul Do animals survive the death of the body or are they doomed to disappear completely when they leave this world behind Both scientists and religious authorities have long scoffed at the idea of animals in heaven Yet the question endures In this wise immensely readable book Ptolemy Tompkins embarks on a quest for the answer taking us on a top speed tour of the history of the animal soul Equally at home with mainstream and

alternative spiritual philosophies Tompkins takes us from the savannas of Africa to the earth's first cities to the early days of the great faith traditions of both East and West Along the way he shows that despite what many of us have been taught the world's various spiritual traditions all have profoundly meaningful things to say about the animal soul if we simply know where to look Rescuing these ancient insights and blending them with vivid stories about animals today from a dwarf rabbit named Angus to a manatee named Moose to a black bear named Little Bit The Divine Life of Animals paints a gloriously inclusive picture of the cosmos as a place made up of both matter and spirit in which animals are every bit as important spiritually speaking as the humans with whom they share the world Though it is startlingly original The Divine Life of Animals also feels strangely and instantly familiar for it reveals truths that many of us have held in our hearts already waiting only for someone to give fresh voice to one of the oldest and most trustworthy intuitions we possess The Divine Life of Animals offers a compelling and timeless vision of the relationship between humans and animals that will have you looking at the animals in your life with new eyes

All-Time Nines Don Cox,2016-02-03 Who was the best baseball team of all time This timeless question can most effectively be answered through comprehensive analysis of baseball statistics Over the course of a season winning teams tend to score more runs while allowing fewer than their opponents The greater the difference in runs per game the more a team can be expected to win Comparing this data for the top five percent of Major League nines from 1901 through 2014 this book argues that runs above league average is the best statistic for ranking teams The author sorts 220 teams by era franchise and skills hitting fielding baserunning pitching evaluates their strengths and weaknesses and assigns numerical values to each player's skills to demonstrate how they contributed to team performance

Equilibrium Christopher Wills, 2013-03-28 In *Green Equilibrium* Christopher Wills explains the rules by which ecosystems maintain a diversity of interdependent species in particular the balance of predators and prey Wills is both an eminent academic and a hugely experienced field biologist In presenting the concept of green equilibrium he draws on a fascinating range of examples including coral reefs off the densely populated Philippines the isolated and densely forested valleys of Papua New Guinea the changing Himalayan kingdom of Bhutan and a Californian ranch being allowed to return to a wild state In each case he assesses the impact of modern changes and attempts at conservation on these delicately balanced ecosystems Wills shows how human populations too are an integral part of the picture We now know from genetic evidence that over the course of history as humans spread out of Africa populations adapted as a result of environmental conditions Striking new evidence indicates that some human populations carry genes from past encounters with other hominids Neanderthals and Denisovans as well as genetic adaptations to local hazards such as malaria Wills argues that the most effective approaches to conserving green equilibria come out of evolutionary insights and from close involvement of the local communities who have lived and adapted to them

The Gnu's World Richard Estes, 2014-04-12 This is the first scholarly book on the antelope that dominates the savanna ecosystems of eastern and southern Africa It presents a synthesis of research conducted over a span of fifty years mainly on the wildebeest in the Ngorongoro and Serengeti ecosystems where eighty percent of the world's wildebeest population lives Wildebeest and other grazing mammals drive the ecology and evolution of the savanna ecosystem Richard D Estes describes this process and also details the wildebeest's life history focusing on its social organization and unique reproductive system which are adapted to the animal's epic annual migrations He also examines conservation issues that affect wildebeest including range wide population declines

Quaternary Extinctions Paul S. Martin, Richard G. Klein, 2022-01-04 What caused the extinction of so many animals at or near the end of the Pleistocene Was it overkill by human hunters the result of a major climatic change or was it just a part of some massive evolutionary turnover Questions such as these have plagued scientists for over one hundred years and are still being heatedly debated today *Quaternary Extinctions* presents the latest and most comprehensive examination of these questions *Geological Magazine* May be regarded as a kind of standard encyclopedia for Pleistocene vertebrate paleontology for years to come American Scientist Should be read by paleobiologists biologists wildlife managers ecologists archeologists and anyone concerned about the ongoing extinction of plants and animals *Science* Uncommonly readable and varied for watchers of paleontology and the rise of humankind *Scientific American* Represents a quantum leap in our knowledge of Pleistocene and Holocene palaeobiology Many volumes on our bookshelves are destined to gather dust rather than attention But not this one *Nature* Two strong impressions prevail when first looking into this epic compendium One is the judicious balance of views that range over the whole continuum between monocausal cultural or environmental explanations The second is that both the data base and theoretical sophistication of the protagonists in the

debate have improved by a quantum leap since 1967 American Anthropologist *The Neo-Sophia of the 21st Century* Rikem J Philippe, 2021-06-28 This book of inspirations was more likely dictated by the Lord in its most contents It is a book to help the youth the elders the kids likewise the ministers the Christians to know Jah better and penetrate his presence filled of reverence to come out with power and visions This book is to lift up the guts of humanity to open and show the importance that human shares in living on this planet It is to encourage to appreciate life to consider the future with light and site of wisdom freedom liberty and wealth This is to learn while we re sharing the existence to learn that your real world isn t here but you are not to die but to live eternal life in your world to come To show that we came on Earth each one of us for special mission or missions well determined and expect to report our passes as well as our future You came nicked you re here for a special purpose and you re going back nicked broken off guts humiliated and sad Sometimes filled of regret nostalgia and agony This book will explain how we ve been made by Jah our Creator and His different names according to the miraculous circumstances It will also open how bad human behavior stands for how obligated unfaithful we remain It will make the youth acting sensitively righteous conscientious well stand loyal and honest It will identify mankind protection as a responsibility of his neighbor like vice versa mutually to make a balance in between creatures of different spices and of humanity To be wise enough to be faithful and recognize to teach humankind humility to reach to the puzzle of their needs to learn our Creator s duty to know His value in our lives to avoid being envious jealous and criminals Before you judge you should penetrate the facts and the essence of knowledge Sometimes you need the filling of thoughts that was occasionally announced the circumstance of the manner of saying You need a spirit of compassion and mercy to encourage the thinker while at the same time your critics can built expertism This book will make you develop your senses of value to think your destiny s parallelogram to the others destiny s Though we may be born and raised from different parents different countries different climates different cultures and uses we are all children of the same Jah from different mothers In one word we are brothers and sisters of different mothers Our signatures remain the same We breathe the same we eat we drink we grow and we flush the same way We behave the same we act we emotion we ambition we share the same and we partage the same envy realistically Therefore we come to realize that we are human no matter what color height weight and educations We are all thesame minks so let s minx *When the Last Lion Roars* Sara Evans, 2018-06-14 The illegal killing of Cecil a famous and magnificent black maned Zimbabwean lion by an American big game hunter in 2015 sparked international outrage More significantly it drew the world s attention to the devastating plight of Africa s lions A century ago there were more than 200 000 wild lions living in Africa Today with that population reduced by more than 90 per cent many experts believe that without effective conservation plans Africa s remaining wild lions could be completely wiped out by the mid half of this century When the Last Lion Roars explores the historic rise and fall of the lion as a global species and examines the reasons behind its catastrophic decline Interwoven with vivid personal encounters of Africa s last lions Sara Evans questions what is

being done to reverse or at least stem this population collapse and she considers the importance of human responsibility in this decline and more crucially in their conservation From the Lion Guardians in Kenya to the Living Walls of Tanzania and the Hwange Lion Research Project in Zimbabwe Sara meets both lions and their champions people who are fighting to bring this iconic species back from the brink of extinction Worlds in One Country Denis Hirson,2011 Worlds in one country is a compact inclusive history of writing in South Africa from the nineteenth century to 1994 that crosses boundaries of language and colour including prose poetry and theatre **The Body is Sacred Volume I** Ladie Baltimore,2021-03-15 Hey my name is Arie Leach and I want to take you down a timeline We are going on a journey from the late eighties into the nineties This timeline is my perception of what happened to my family friends and me when the crack epidemic hit Baltimore City The timeframe parallels the corner boys and the wiretap phenomenon This experience is based on a true story and the first of a series So let s sit down as friends while I narrate my story Thinking Through Style Michael Dominic Hurley,Marcus Waithe,2018 What is style and how does it relate to thought in language It has often been treated as something merely linguistic independent of thought ornamental stylishness for its own sake Or else it has been said to subserve thought by mimicking delineating or heightening ideas that are already expressed in the words This ambitious and timely book explores a third more radical possibility in which style operates as a verbal mode of thinking through Rather than figure thought as primary and pre verbal and language as a secondary delivery system style is conceived here as having the capacity to clarify or generate thinking The book s generic focus is on non fiction prose and it looks across the long nineteenth century Leading scholars survey twenty authors to show where writers who have gained reputations as either stylists or as thinkers exploit the interplay between the what and the how of their prose The study demonstrates how celebrated stylists might after all have thoughts worth attending to and that distinguished thinkers might be enriched for us if we paid more due to their style More than reversing the conventional categories this innovative volume shows how style and thinking can be approached as a shared concern At a moment when especially in nineteenth century studies interest in style is re emerging this book reevaluates some of the most influential figures of that age re imagining the possible alliances interplays and generative tensions between thinking thinkers style and stylists **The Insurmountable Darkness of Love** Douglas E. Christie,2022 This book is a reflection on the meaning of spiritual darkness especially those difficult places in human experience where meaning seems to elude us where we are emptied out and are compelled to dig deeper into who we truly are Douglas E Christie takes up this facet of experience in ordinary human experience but also in relation to the Christian contemplative and mystical traditions where such experience is often understood to be both painful and transformative allowing the mind and heart to open in love **The Sacred Combe** Simon Barnes,2016-01-14 Reflections on the natural world and our place within it from one of our finest natural history writers nature writing at its very best We ve all got one A secret special place Hidden Enclosed A little greener and more fertile than the world outside Here the birds are slightly more exotic slightly more

confiding the grass greener and the fruit sweeter To know such a place to love such a place is part of being human
Sometimes it s a place of myth like the Garden of Eden Sometimes it exists in fictional form like Narnia or Shangri La
Sometimes it comes in memories of a golden day in childhood or in a glorious doomed love affair Sometimes it s a real place
that we daren t go back to for fear that it or we had changed And just occasionally it s a real place A place where you leave a
small piece of your heart and return as often as you can so as not to lose it It s a place of privilege Simon Barnes found such a
place when he woke in his first morning in the Luangwa Valley in Zambia to find elephants eating the roof of his hut It was a
homecoming and he has been faithful to that passion ever since Here he has known peace danger discomfort fear and a
profound sense of oneness with the Valley with all nature and with the world With the Valley he found completion This book
explores the special places of the mind and the world with special reference to the Luangwa Valley and the glorious support
of the Valley s great artist Pam Carr It s a book about the quest for paradise and the eternal human search to find such a
paradise everywhere **Library of the World's Best Literature: Songs, hymn and lyrics** Charles Dudley
