considers critical and dialogic approaches to teacher education for STEM subjects and emphasises the crucial role that teachers play in improving life chances for marginalised young people and their communities STEM education is not just a way of improving a country's GDP but if taught through dialogic and transformative pedagogies it can enable teachers to empower students to improve their own lives The collaboration between these two countries is timely and comes as Mexico is developing and emerging as a key global economic nation The work presented here engages in theoretical and empirical work that has application beyond the two countries This book was originally published as a special issue of the Journal of Education for Teaching
