Myths And Realities Of Academic Administration:

Myths and Realities of Academic Administration Patricia Plante, Robert Caret, 1990-03 Do new administrators really experience a honeymoon period Is a confrontation with a hostile faculty a certainty With an eye toward the ideal but a foot planted firmly in reality this book views the crumbling of ten major myths about academic administration Over 125 executives from colleges of all types and sizes were polled and responded with their experiences of today s most prevalent misconceptions Myths explored and exploded include how administrators inherit untouchables yearn for the classroom equivocate and are torn by conflicting constituencies This volume with its candid comments ventures to transcend the silence surrounding the intimate concerns pressures ideals and realities of the chief executive position while effecting new debate and personal reflection Resources in Education ,2001-04 *Conceiving the Christian College* Duane Litfin,2004-09-24

This book is designed to help those who are interested in Christian higher education explore anew the unique features opportunities and contemporary challenges of one distinct type of educational institution the Christian college What distinguishes *Conceiving the Christian College* from the many other books on this subject is its incisive discussion of a set of crucial ideas widely misunderstood in the world of Christian higher education Now serving in his eleventh year as president of one of the nation s foremost Christian colleges Duane Litfin is well placed to ask pressing questions regarding faith based education What is unique about Christian colleges What is required to sustain them How do they maintain their bearing in the tumultuous intellectual seas of the twenty first century Litfin s themes are large but they are meant to refocus the conceptual challenges to Christian education in ways that will strengthen both the academic environment of today s Christian colleges and their impact on culture at large Gender Issues in Society: Myths, Reality and Responsibility Mr. Jantu Das,

Policy, Leadership and Professional Knowledge in Education Michael Strain, Dr William F Dennison, Dr Janet Ouston, Dr Valerie Hall, 1998-11-25 For those who want to wallow in the past this is a comfortable book that sets one s own experiences in context For those who will still be working into the next century here are the issues we must face as leaders For those PhD and EdD students seeking topics to research there are all the controversial issues here that still need investigation and it has a stunning list of references a roll call of all the great and the good in the last 25 years of educational administration *International Studies in Educational Administration* The book is a challenge to everyone concerned with the present and future state of public education in the UK and the rest of the developed world The issues are of special concern to those who are expected to provide leadership in schools and colleges and for those with public and political responsibilities How should our conception of learning and its contribution to a Learning Society be defined How can education and other aspects of social care and nurturing enhance our lives as people irrespective of our performance capabilities What is the role of teachers who also manage learning This book contributes formatively to current debate What can educationists do about the discontinuous changes which threaten parents and professionals alike Must education submit

to the stranglehold of economic rationalism It is hoped that this book will assist all those working to promote education s humane and learning aspirations in society *The Professoriate: Challenges and Promises* Paul V. Bredson, Jay Paredes Scribner, 1998-04-28 The 1995 NCPEA Yearbook is organized into five major sections The first The Landscapes of Change Challenges for Professors of Educational Administration contains four chapters that frame the major themes and issues of the 1994 conference In Section 2 Educational Leadership and Development Program Theoretical Perspectives the authors explore theoretical lenses for examining the preparation of educational leaders and the development of educational administration programs Section 3 Responding to New Realities Program Development in Educational Administration contains detailed descriptions of emerging educational realities that have begun to trigger program changes and innovations in departments of educational leadership at six institutions Rethinking and Revisioning Teaching and Learning to prepared Educational Leaders Section 4 offers five excellent vignettes of changes and challenges for professors in creating new teaching and learning environments for themselves and their students In the final section Policies Programs and Practices Investigations in Educational Administration six chapters relate the finds of researchers using very different research designs and methods The implications for professors of educational administration and for all educational stakeholders are discussed

Myth, Reality, and Reform Cláudio de Moura Castro, Daniel C. Levy, 2000 Myth Reality and Reform bridges these critiques by balancing the importance of the four key functions of higher education academic leadership professional development technological training and development and general higher education The book suggests how to consolidate the strengths of higher education systems while fundamentally reforming their weaker features **The Myths of Technology** Judith Burnett, Peter Senker, Kathy Walker, 2009 This book questions whether technologies are the rational tangible scientific forward thinking neutral objects they are so often perceived to be exploring instead how powerful mythic ideas about technologies drive our social understanding and our expectations of them Against a rising tide of information we encounter significant technological scientific and medical advances which promise to create an educated humane and equal world This book explores that promise deconstructing technologies to conclude that though they do afford us significant and empowering advances they remain largely cloaked in mystery and often promise more than they can deliver Contributors from diverse intellectual backgrounds and political and epistemological stances spanning sociology and psychosocial investigations innovation studies and scientists combine philosophical inquiry and empirical case studies to create a book which is at once provocative innovative and exciting in the challenges it poses Routledge Library Editions: Education Management Various, 2021-07-29 Reissuing works originally published between 1975 and 1997 this collection includes books covering all aspect of managing schools from primary to further education With an international selection of authors some volumes present case studies while others address wider areas of concern in the management of educational institutions Individual volumes concern special schools and specific types such as the grant maintained system in the UK Topics cross

over from finance to staff development to politics and governance to innovation This is an excellent varied set for any education management bookshelf **Jsl Vol 8-N2** JOURNAL OF SCHOOL LEADERSHIP,1998-03-01 The Journal of School Leadership is broadening the conversation about schools and leadership and is currently accepting manuscripts We welcome manuscripts based on cutting edge research from a wide variety of theoretical perspectives and methodological orientations The editorial team is particularly interested in working with international authors authors from traditionally marginalized populations and in work that is relevant to practitioners around the world Growing numbers of educators and professors look to the six bimonthly issues to deal with problems directly related to contemporary school leadership practice teach courses on school leadership and policy use as a quality reference in writing articles about school leadership and improvement
