Reflections John Cottingham,2008-09-11 John Cottingham explores central areas of Descartes's rich and wide ranging philosophical system including his accounts of thought and language of freedom and action of our relationship to the animal domain and of human morality and the conduct of life He also examines ways in which his philosophy has been misunderstood The Cartesian mind/body dualism that is so often attacked is only a part of Descartes's account of what it is to be a thinking sentient human creature and the way he makes the division between the mental and the physical is considerably more subtle and philosophically more appealing than is generally assumed Although Descartes is often considered to be one of the heralds of our modern secular worldview the new philosophy which he launched retains many links with the ideas of his predecessors not least in the all pervasive role it assigns to God something that is ignored or downplayed by many modern readers and the character of the Cartesian outlook is multifaceted sometimes anticipating Enlightenment ideas of human autonomy and independent scientific inquiry but also sometimes harmonizing with more traditional notions of human nature as created to find fulfillment in harmony with its creator **World More Beautiful**
