Vasiliki Kosta, 2015-11-05 This book attempts to systematise the present interrelationship between fundamental rights and

the EU internal market in the field of positive integration Its intention is simple to examine the way in which and the extent to which fundamental rights protection is realised through EU internal market legislation To that end the analysis is conducted around four rights or sets of rights data protection freedom of expression fundamental labour rights and the right to health The book assesses not only what substantive level of protection is achieved for these fundamental rights but it also estimates whether there is a fundamental rights culture that informs current legislative practice Finally it asks the overarching question whether the current state of harmonisation amounts to a fundamental rights policy The book offers a much more varied picture of the EU s fundamental rights policy in and through the EU internal market than perhaps initially expected Moreover it builds the case for a more conscious approach to dealing with and enhancing fundamental rights protection in and through internal market legislation and advocates a leading role for the legislature in the establishment of an internal market that is firmly based on respect for fundamental rights

Country Reports on Human Rights Practices ,2001 **Collective Management of Copyright and Related Rights** João Pedro Quintais,Daniel Gervais,2025-03-18 Over the past three decades collective management organizations CMOs have become the nerve centres of copyright licensing in virtually every country Their expertise and knowledge of copyright law and management have proven essential to making copyright work in the digital age But they have also been at the centre of debates about their effectiveness transparency and governance This book provides an in depth analysis of the various operational CMO models their rights and obligations vis vis authors other right holders and users the acquisition of the legal authority to license and most importantly the rights to license digital uses of protected material and the creation or improvement of information systems to deal with the increasingly complex tasks of rights management and licensing All chapters have been updated since the third 2015 edition and several new chapters have been added including a new chapter on the economics of collective management and a chapter on limitation based remuneration rights Factors considered include the following cases where the unavailability of adequate licensing options makes authorized use of material protected by copyright or a related right difficult or impossible taking transaction costs into account the growing importance of extended repertoire systems and different forms of collective licensing with extended effect transnational and multi territorial licensing the relationship among collective management rights to remuneration and the ways in which CMOs acquire authority to license the threat of monopolies or regional oligopolies for the management of online music rights the impact of new technologies on collective rights management and licensing and the role of families such as the International Confederation of Societies of Authors and Composers CISAC and the International Federation of Reproduction Rights Organizations IFRRO The analysis covers the 1996 WIPO Copyright Treaties the US Digital Millennium Copyright Act the Santiago Agreement relevant EU policy documents and legislative instruments including the 2014 Collective Rights Management Directive and 2019 Copyright in the Digital Single Market Directive and the work of the UN Committee on Economic Social and Cultural Rights Part I presents a

number of horizontal issues that affect collective management in almost every country Part II is organized geographically focusing on systems that are representative of the main models used in different countries and regions Each country or region specific chapter provides a historical overview and a description of existing CMOs and their activities provides financial information where available describes how CMOs are supervised or controlled by legislation and offers reflections on the challenges facing CMOs in that country or region Some of these national and regional commentaries are the only such sources of information available in English Whatever the future of copyright it is clear that users will continue to want access and the ability to legally reuse material and that authors and other rights holders will want to ensure that they can place some reasonable limits on those uses including the ability to monetize commercially relevant uses CMOs will certainly be critical intermediaries in this process The fourth edition of this important resource with its key insights into the changing nature of collective management will be of immeasurable value to anyone involved in shaping collective management policy or dealing with the increasingly complex legal issues that arise in copyright matters in the digital age and even more in the age of artificial intelligence and the training of large language models

After the Rights Revolution Cass R. Sunstein, 1990 In the twentieth century American society has experienced a rights revolution a commitment by the national government to promote a healthful environment safe products freedom from discrimination and other rights unknown to the founding generation This development has profoundly affected constitutional democracy by skewing the original understanding of checks and balances federalism and individual rights Cass Sunstein tells us how it is possible to interpret and reform this regulatory state regime in a way that will enhance freedom and welfare while remaining faithful to constitutional commitments Sunstein vigorously defends government regulation against Reaganite Thatcherite attacks based on free market economics and pre New Deal principles of private right Focusing on the important interests in clean air and water a safe workplace access to the air waves and protection against discrimination he shows that regulatory initiatives have proved far superior to an approach that relies solely on private enterprise Sunstein grants that some regulatory regimes have failed and calls for reforms that would

amount to an American perestroika a restructuring that embraces the use of government to further democratic goals but that insists on the decentralization and productive potential of private markets Sunstein also proposes a theory of interpretation that courts and administrative agencies could use to secure constitutional goals and to improve the operation of regulatory programs From this theory he seeks to develop a set of principles that would synthesize the modern regulatory state with the basic premises of the American constitutional system Teachers of law policymakers and political scientists economists and historians and a general audience interested in rights regulation and government will find this book an essential addition to their libraries

Air Passenger Rights Michal Bobek, Jeremias Adams-Prassl, 2016-01-28 Regulation 261/2004 on Air Passengers Rights has been amongst the most high profile pieces of EU secondary legislation of the past years generating controversial judgments of the Court of Justice from C-344/04 *ex parte IATA* to C-402/07 *Sturgeon* The Regulation has led to equally challenging decisions across the Member States ranging from judicial enthusiasm for passenger rights to domestic courts holding that a Regulation could not be relied upon by an individual claimant or even threatening outright to refuse to apply its provisions The economic stakes are significant for passengers and airlines alike and despite the European Commission's recent publication of reform proposals controversies appear far from settled At the same time the Regulation should according to the Treaty have uniform direct and general application in all the Member States of the Union How then can this diversity be explained What implications do the diverging national interpretations have for the EU's regulatory strategy at large This book brings together leading experts in the field to present a series of case studies from 15 different Member States as well as the extra territorial application of Regulation 261 combined with high level analysis from the perspectives of Aviation law and EU law
