**The Future of NATO** Ted Galen

Carpenter,2013-10-11 The end of the Cold War has raised questions about the future of NATO Now that the threat from the Warsaw Pact has disappeared there seems little need for a Western military alliance of such magnitude The contributions here offer various views on NATO s future

**Politics And Society In Ukraine** Paul D'anieri,2018-02-23 With NATO expanding into central Europe Ukraine has become a pivotal state for the future of European stability yet it is a country about which little is known in the west Politics and Society in Ukraine fills that gap providing the first comprehensive and detailed study of the contemporary Ukrainian political system Beginning with a discussion of the legacy of the Soviet Union the authors illuminate Ukraines regional and ethnic tensions governmental system efforts at reform and foreign policy They consider all of those issues from a comparative perspective that readers unfamiliar with Ukraine will find illuminating The authors are three of the leading authorities on Ukrainian politics and each has extensive experience in the country This book

provides much needed analysis of a crucial country. With the expansion of NATO, Ukraine is frequently described as the linchpin of security in Central Europe. And after Russia, it is the largest and most important of the post-Soviet states. Yet it is a country about which most westerners know very little, subsumed as it was for decades beneath the Russian Empire and the Soviet Union. *Ukrainian Politics and Society* is the first comprehensive study of politics in post-Soviet Ukraine and is therefore vital reading for anyone concerned with European security or with politics in the former Soviet Union. The authors' extensive experience in Ukraine allows them to explain the paradoxes of Ukrainian politics that have led to so many false predictions concerning the future of the Ukrainian state. Their examination of nationality politics shows why ethnic and regional differences have tended to recede rather than to spin out of control as they have elsewhere in the region. At the same time, these differences hamstring the country's political system, and the authors show how difficult a task it is for democratic institutions to provide effective government in a country with little consensus. By viewing economic reform in its profoundly political context, the authors expose the chasm between the theory and practice of economic reform. Understanding of how to make profits has not been lacking, but government regulation to ensure that profit-seeking behavior leads to functioning markets has been conspicuously absent. By examining in detail how Ukrainian politics has followed theoretical expectations and where it has contradicted them, the authors arrive at conclusions with implications well beyond Ukraine. Ukraine must first build a state and a nation before it can successfully reform its economy or build a genuine democracy. For Ukraine and its people, the task is daunting. For the West, whose security increasingly relies on stability in Ukraine, this book provides the knowledge necessary to approach the problem as well as good reason not to ignore it.

*Europe as the Western Peninsula of Greater Eurasia* Glenn Diesen, 2021-09-27. Will the increased economic connectivity across the Eurasian supercontinent transform Europe into the western peninsula of Greater Eurasia? The unipolar era entailed the US organising the two other major economic regions of the world, Europe and Asia, under US leadership. The rise of the rest, primarily Asia with China at the centre, has ended the unipolar era and even 500 years of Western dominance. China and Russia are leading efforts to integrate Europe and Asia into one large region. The Greater Eurasian region is constructed with three categories of economic connectivity: strategic industries built on new and disruptive technologies; physical connectivity with bimodal transportation corridors; and financial connectivity with new development banks, trading currencies, and payments systems. China strives for geoeconomic leadership by replacing the US leadership position, while Russia endeavours to reposition itself from the dual periphery of Europe and Asia to the centre of a grand Eurasian geoeconomic constellation. Europe, positioned between the trans-Atlantic region and Greater Eurasia, has to adapt to the new international distribution of power to preserve its strategic autonomy.
