Maureen Perrie, D. C. B. Lieven, Ronald Grigor Suny, 2006-08-17 A definitive new history of Russia from early Rus to the collapse of the Soviet Union *All Russia Is Burning!* Cathy A. Frierson, 2012-11-10 Rural fires were an even more persistent scourge than famine in late imperial Russia as Cathy Frierson shows in this first comprehensive study Destroying almost three billion rubles worth of property in European Russia between 1860 and 1904 accidental and arson fires acted as a brake

on Russia's economic development while subjecting peasants to perennial shocks to their physical and emotional condition. The fire question captured the attention of educated progressive Russians who came to perceive it as a key obstacle to Russia's becoming a modern society in the European model. Using sources ranging from literary representations and newspaper articles to statistical tables and court records, Frierson demonstrates the many meanings fire held for both peasants and the educated elite. To peasants it was an essential source of light and warmth as well as a destructive force that regularly ignited their cramped villages of wooden thatch-roofed huts. Absent the rule of law, they often used arson to gain justice or revenge or to exert social control over those who would violate village norms. Frierson shows that the vast majority of arson cases in European Russia were not peasant against gentry acts of protest but peasant against peasant acts of self-help, law or plain spite. Both the state and individual progressives set out to resolve the fire question and to educate, cajole or coerce the peasantry into the modern world. Fire insurance, building codes, scientific village layouts and volunteer firefighting brigades reduced the average number of buildings consumed in each blaze but none of these measures succeeded in curbing the number of fires each year. More than anything else, this history of fire and arson in rural European Russia is a history of their cultural meanings in the late imperial campaign for modernity. Frierson shows the special associations of women with fire in rural life and in elite understanding of fire in the Russian countryside. Her study of the fire question demonstrates both peasant agency in fighting fire and educated Russians hardening conviction that peasants stood in the way of Russia's advent into the company of prosperous, rational, civilized nations.

Russia and Eastern Europe, 1789-1985 Raymond Pearson, 1989
Portrait of a Russian Province Catherine Evtuhov, 2011-11-13

Several stark premises have long prevailed in our approach to Russian history. It was commonly assumed that Russia had always labored under a highly centralized and autocratic imperial state. The responsibility for this lamentable state of affairs was ultimately assigned to the profoundly agrarian character of Russian society. The countryside, home to the overwhelming majority of the nation's population, was considered a harsh world of cruel landowners and ignorant peasants, and a strong hand was required for such a crude society. A number of significant conclusions flowed from this understanding. Deep and abiding social divisions obstructed the evolution of modernity as experienced naturally in other parts of Europe, so there was no Renaissance or Reformation, merely a derivative Enlightenment and only a distorted capitalism. And since only despotism could contain these volatile social forces, it followed that the 1917 Revolution was an inevitable explosion resulting from these intolerable contradictions, and so too were the blood-soaked realities of the Soviet regime that came after. In short, the sheer immensity of its provincial backwardness could explain almost everything negative about the course of Russian history. This book undermines these preconceptions. Through her close study of the province of Nizhnii Novgorod in the nineteenth century, Catherine Evtuhov demonstrates how nearly everything we thought we knew about the dynamics of Russian society was wrong. Instead of peasants ground down by poverty and ignorance, we find skilled farmers, talented artisans and craftsmen.

and enterprising tradespeople Instead of an exclusively centrally administered state we discover effective and participatory local government Instead of pervasive ignorance we are shown a lively cultural scene and an active middle class Instead of a defining Russian exceptionalism we find a world recognizable to any historian of nineteenth century Europe Drawing on a wide range of Russian social environmental economic cultural and intellectual history and synthesizing it with deep archival research of the Nizhnii Novgorod province Evtuhov overturns a simplistic view of the Russian past Rooted in but going well beyond provincial affairs her book challenges us with an entirely new perspective on Russia's historical trajectory

Serfdom, Society, and the Arts in Imperial Russia Richard Stites, 2008-02-22 Richard Stites explores the dramatic shift in the history of visual and performing arts that took place in the last decades of serfdom in Russia in the 1860s and revisualises the culture of that flamboyant era

The Body Soviet Tricia Starks, 2009-01-06 In 1918 the People's Commissariat of Public Health began a quest to protect the health of all Soviet citizens but health became more than a political platform or a tactical decision The Soviets defined and categorized the world by interpreting political orthodoxy and citizenship in terms of hygiene The assumed political social and cultural benefits of a regulated healthy lifestyle informed the construction of Soviet institutions and identity Cleanliness developed into a political statement that extended from domestic maintenance to leisure choices and revealed gender ethnic and class prejudices Dirt denoted the past and poor politics health and cleanliness signified mental acuity political orthodoxy and modernity Health though essential to the revolutionary vision and crucial to Soviet plans for utopia has been neglected by traditional histories caught up in Cold War debates The Body Soviet recovers this significant aspect of Soviet thought by providing a cross disciplinary comparative history of Soviet health programs that draws upon rich sources of health care propaganda including posters plays museum displays films and mock trials The analysis of propaganda makes The Body Soviet more than an institutional history it is also an insightful critique of the ideologies of the body fabricated by health organizations A masterpiece that will thoroughly fascinate and delight readers Starks's understanding of propaganda and

Diagnosing Literary Genius Irina Sirotkina, 2003-04-30 Winner of the Aldo and Jeanne Scaglione Prize for Studies in Slavic Languages and Literatures from the Modern Language Association The vital place of literature and the figure of the writer in Russian society and history have been extensively studied but their role in the evolution of psychiatry is less well known In Diagnosing Literary Genius A Cultural History of Psychiatry in Russia 1880 1930 Irina Sirotkina explores the transformations of Russian psychiatric practice through its relationship to literature During this period psychiatrists began to view literature as both an indicator of the nation s mental health and an integral part of its well being By aligning themselves with writers psychiatrists argued that the aim of their science was not dissimilar to the literary project of exploring the human soul and reflecting on the psychological ailments of the age Through the writing of pathographies medical biographies
