**Power and the Sacred in Revolutionary Russia** Glenn Young, 2010-11 After the 1917 Revolution in Russia the Bolsheviks launched a massive assault on religion Although we know a great deal about how the Bolsheviks went about doing this propaganda persecution of clergy and laity seizing church property scholars have not devoted much attention to the other side of the story the people who were being persecuted and how they responded to their persecutors Glenn Young shows how ordinary Russian peasants devised ways of asserting their religious faith during the difficult period of New Economic Policy 1921-28 when the Party state was ideologically obsessed with eradicating religion Faced with persecution torture and the creation of antireligious organizations such as the League of the Godless Orthodox clergy and laity organized themselves against the Bolsheviks They revived factional politics even using the village soviets the intended cornerstone of Soviet power in the countryside to defend their religious interests When they achieved some degree of success in their resistance the Bolsheviks were forced to respond and adapt their strategies a conclusion that scholars have not put forward previously Based on extensive research in archives and published sources Young's book will force historians of Soviet Russia to confront religious issues as central to rural politics Her work also draws upon cultural anthropology and theories of peasant politics making it of great interest to any scholars studying the processes of secularization and desacralization in other cultures

**Power Restructuring In China And Russia** Mark Lupher, 2018-02-12 The massive economic transformations and political upheavals that have been sweeping China and the Soviet Union in the final decades of the twentieth century are among the great dramas of our time Yet the origins of these revolutionary changes are murky and their outcomes unclear Have we witnessed the demise of an archaic authoritarian order and the rise of pluralism and democracy or are the tumultuous events of the post Mao era and the period of perestroika more usefully viewed in light of broader patterns of power and politics in Chinese and Russian history Considering these questions with a new interpretation of power relations and political processes in China and Russia Mark Lupher explores the imperial era the communist period and the current situation in both countries Rather than speaking of reform which too often is understood as liberalization along Western lines his discussion is focused on power restructuring the ebb and flow of state power the centralization and decentralization of political and economic power and the three way struggles between central rulers various elites and

nonprivileged groups that drive these processes. Lupher's power restructuring analysis is noteworthy in combining broad comparative historical analysis and conceptualization with a closely focused discussion and reinterpretation of the Chinese Cultural Revolution. The core of his book. By comparing and bringing new light to bear on a series of pivotal episodes in Chinese and Russian history, he furthers our understanding and assessment of processes that will continue to unfold in China, Russia, and the former Soviet republics.

**Iconography of Power** Victoria E. Bonnell, 1998-02-05. Masters at visual propaganda: the Bolsheviks produced thousands of vivid and compelling posters after they seized power in October 1917. Intended for a semi-literate population that was accustomed to the rich visual legacy of the Russian autocracy and the Orthodox Church, political posters came to occupy a central place in the regime's effort to imprint itself on the hearts and minds of the people and to remold them into the new Soviet woman and man. In this first sociological study of Soviet political posters, Victoria Bonnell analyzes the shifts that took place in the images, messages, styles, and functions of political art from 1917 to 1953. Everyone who lived in Russia after the October revolution had some familiarity with stock images of the male worker, the great communist leaders, the collective farm woman, the capitalist, and others. These were the new icons: standardized images that depicted Bolshevik heroes and their adversaries in accordance with a fixed pattern. Like other invented traditions of the modern age, iconographic images in propaganda art were relentlessly repeated, bringing together Bolshevik ideology and traditional mythologies of pre-Revolutionary Russia. Symbols and emblems featured in Soviet posters of the Civil War and the 1920s gave visual meaning to the Bolshevik worldview dominated by the concept of class. Beginning in the 1930s, visual propaganda became more prescriptive, providing models for the appearance, demeanor, and conduct of the new social types, both positive and negative. Political art also conveyed important messages about the sacred center of the regime, which evolved during the 1930s from the celebration of the heroic proletariat to the deification of Stalin. Treating propaganda images as part of a particular visual language, Bonnell shows how people read them, relying on their habits of seeing and interpreting folk, religious, commercial, and political art, both before and after 1917, as well as the fine art traditions of Russia and the West. Drawing on monumental sculpture and holiday displays as well as posters, the study traces the way Soviet propaganda art shaped the mentality of the Russian people; the legacy is present even today and was itself shaped by popular attitudes and assumptions. **Iconography of Power** includes posters dating from the final decades of the old regime to the death of Stalin, located by the author in Russian, American, and English libraries and archives. One hundred exceptionally striking posters are reproduced in the book; many of them never before published. Bonnell places these posters in a historical context and provides a provocative account of the evolution of the visual discourse on power in Soviet Russia.

**Nomads and Soviet Rule** Alun Thomas, 2018-06-14. The nomads of Central Asia were already well accustomed to life under the power of a distant capital when the Bolsheviks fomented revolution on the streets of Petrograd. Yet after the fall of the Tsar, the nature, ambition, and potency of that power would change dramatically, ultimately resulting in the near eradication of Central

Asian nomadism Based on extensive primary source work in Almaty Bishkek and Moscow Nomads and Soviet Rule charts the development of this volatile and brutal relationship and challenges the often repeated view that events followed a linear path of gradually escalating violence Rather than the sedentarisation campaign being an inevitability born of deep rooted Marxist hatred of the nomadic lifestyle Thomas demonstrates the Soviet state s treatment of nomads to be far more complex and pragmatic He shows how Soviet policy was informed by both an anti colonial spirit and an imperialist impulse by nationalism as well as communism and above all by a lethal self confidence in the Communist Party s ability to transform the lives of nomads and harness the agricultural potential of their landscape This is the first book to look closely at the period between the revolution and the collectivisation drive and offers fresh insight into a little known aspect of early Soviet history In doing so the book offers a path to refining conceptions of the broader history and dynamics of the Soviet project in this key period

**Popular Perceptions of Soviet Politics in the 1920s** O. Velikanova, 2013-01-28 This is the first study of popular opinions in Soviet society in the 1920s These voices which made the Russian revolution characterize reactions to mobilization politics patriotic militarizing campaigns the tenth anniversary of the revolution and state attempts to unite the nation around a new Soviet identity

*Works in Progress* Jenny Leigh Smith, 2014-10-28 This book is the first to investigate the gap between the plans and the reality of the Soviet Union s mid twentieth century project to industrialize and modernize its agricultural system Historians agree that the project failed badly agriculture was inefficient unpredictable and environmentally devastating for the entire Soviet period Yet assigning the blame exclusively to Soviet planners would be off the mark The real story is much more complicated and interesting Jenny Leigh Smith reveals in this deeply researched book Using case studies from five Soviet regions she acknowledges hubris and shortsightedness where it occurred but also gives fair consideration to the difficulties encountered and the successes however modest that were achieved
