**Lionel Robbins Lectures** **The Kremlin Strikes Back** Steven Rosefielde, 2016-12-15 America and Europe responded to Russia's annexation of Crimea on March 18 2014 by discarding their policy of East West partnership and reverting intermittently to a policy of cold war The West believes that this on again off again second Cold War will end with Russia's capitulation because it is not a sufficiently great power while the Kremlin's view is just the opposite Vladimir Putin believes that if Moscow has strategic patience Russia can recover some of the geostrategic losses that it incurred when the Soviet Union collapsed The Kremlin Strikes Back scrutinizes the economic prospects of both sides including factors like military industrial prowess warfighting capabilities and national resolve addressing particularly hot button issues such as increasing military spending decreasing domestic spending and other policies Stephen Rosefielde aims to objectively gauge future prospects and the wisdom of employing various strategies to address Russian developments

*Economics After the Crisis* Adair Turner,2012-03-23 A noted economist challenges the fundamental economic assumptions that cast economic growth as the objective and markets as the universally applicable means of achieving it The global economic crisis of 2008 2009 seemed a crisis not just of economic performance but also of the system s underlying political ideology and economic theory But a second Great Depression was averted and the radical shift to New Deal like economic policies predicted by some never took place Perhaps the correct response to the crisis is simply careful management of the macroeconomic challenges as we recover combined with reform of financial regulation to prevent a recurrence In *Economics After the Crisis* Adair Turner offers a strong counterargument to this somewhat complacent view The crisis of 2008 2009 he writes should prompt a wide set of challenges to economic and political assumptions and to economic theory Turner argues that more rapid growth should not be the overriding objective for rich developed countries that inequality should concern us that the pre crisis confidence in financial markets as the means of pursuing objectives was profoundly misplaced

**Central Banking in Theory and Practice** Alan S. Blinder,1999-01-07 Alan S Blinder offers the dual perspective of a leading academic macroeconomist who served a stint as Vice Chairman of the Federal Reserve Board one who practiced what he had long preached and then returned to academia to write about it He tells central bankers how they might better incorporate academic knowledge and thinking into

the conduct of monetary policy and he tells scholars how they might reorient their research to be more attuned to reality and thus more useful to central bankers Based on the 1996 Lionel Robbins Lectures this readable book deals succinctly in a nontechnical manner with a wide variety of issues in monetary policy The book also includes the author's suggested solution to an age old problem in monetary theory what it means for monetary policy to be neutral **Why Are We Waiting?**

Nicholas Stern, 2016-07-29 An urgent case for climate change action that forcefully sets out in economic ethical and political terms the dangers of delay and the benefits of action The risks of climate change are potentially immense The benefits of taking action are also clear we can see that economic development reduced emissions and creative adaptation go hand in hand A committed and strong low carbon transition could trigger a new wave of economic and technological transformation and investment a new era of global and sustainable prosperity Why then are we waiting In this book Nicholas Stern explains why notwithstanding the great attractions of a new path it has been so difficult to tackle climate change effectively He makes a compelling case for climate action now and sets out the forms that action should take Stern argues that the risks and costs of climate change are worse than estimated in the landmark Stern Review in 2006 and far worse than implied by standard economic models He reminds us that we have a choice We can rely on past technologies methods and institutions or we can embrace change innovation and international collaboration The first might bring us some short term growth but would lead eventually to chaos conflict and destruction The second could bring about better lives for all and growth that is sustainable over the long term and help win the battle against worldwide poverty The science warns of the dangers of neglect the economics and technology show what we can do and the great benefits that will follow an examination of the ethics points strongly to a moral imperative for action Why are we waiting **Contemporary Authors**

Terrie M. Rooney, 2001-09 Your students and users will find biographical information on approximately 300 modern writers in this volume of Contemporary Authors R **Global Trade and Conflicting National Interests** Ralph E. Gomory, William J. Baumol, 2022-06-07 Ralph Gomory and William Baumol adapt classical trade models to the modern world economy In this book Ralph Gomory and William Baumol adapt classical trade models to the modern world economy Trade today is dominated by manufactured goods rapidly moving technology and huge firms that benefit from economies of scale This is very different from the largely agricultural world in which the classical theories originated Gomory and Baumol show that the new and significant conflicts resulting from international trade are inherent in modern economies Today improvement in one country's productive capabilities is often attainable only at the expense of another country's general welfare The authors describe why and when this is so and why in a modern free trade environment a country might have a vital stake in the competitive strength of its industries Russian Reform / International Money Yegor Gaidar, Karl Otto Pöhl, 1995-07 These lectures by Yegor Gaidar former Prime Minister of the Russian Federation and Karl Otto Pöhl former Chairman of the German Bundesbank provide insight into how these leaders assessed the risks of their situations and used basic economic analysis to chart their courses
