Agricultural Finance and Credit Infrastructure in Transition Economies Focus on South Eastern Europe - Proceedings of OECD Expert Meeting, Portoroz, Slovenia, May 2001 OECD,2001-09-24 What has been achieved in rural finance and institutional reform during more than a decade of transition and what challenges remain What are the special needs of South Eastern European countries to attract agricultural credit and finance to *Distortions to Agricultural Incentives in Europe's Transition Economies* Kym Anderson,Johan Swinnen,2008-06-05 The vast majority of the world s poorest households depend on farming for their livelihood During the 1960s and 1970s most developing countries imposed pro urban and anti agricultural policies while many high income countries restricted agricultural imports and subsidized their farmers Both sets of policies inhibited economic growth and poverty alleviation in developing countries Although progress has been made over the past two decades to reduce those policy biases many trade and welfare reducing price distortions remain between agriculture and other sectors as well as within the agricultural sector of both rich and poor countries Comprehensive empirical studies of the disarray in world agricultural markets first appeared approximately 20 years ago Since then the OECD has provided estimates each year of market distortions in high income countries but there has been no comparable

estimates for the world's developing countries This volume is the first in a series other volumes cover Africa Asia and Latin America that not only fill that void for recent years but extend the estimates in a consistent and comparable way back in time and provide analytical narratives for scores of countries that shed light on the evolving nature and extent of policy interventions over the past half century Distortions to Agricultural Incentives in Europe's Transition Economies provides an overview of the evolution of distortions to agricultural incentives caused by price and trade policies in the economies of Eastern Europe and Central Asia that are transitioning away from central planning The book includes country and subregional studies of the ten transition economies of Central and Eastern Europe that joined the European Union in 2004 or 2007 of seven other large member countries of the Commonwealth of Independent States and of Turkey Together these countries comprise over 90 percent of the Europe and Central Asia region's population and GDP Sectoral trade and exchange rate policies in the region have changed greatly since the dissolution of the Soviet Union in 1991 but price distortions remain The new empirical indicators in these country studies provide a strong evidence based foundation for evaluating policy options in the years ahead

Rural Adaptation in Russia Stephen K. Wegren, 2022-05-19 The current dominant approach to Russian peasant behaviour emphasizes rural resistance to reform in broad terms and to the introduction of market forces in particular Bringing together some of the finest scholars on rural Russia this groundbreaking volume examines this perception with an analysis of both historical and contemporary patterns of rural adaptation in Russia Four articles included analyze peasant responses in the post Soviet era and focus on the relationship between poverty and rural adaptation the social origins of private farmers in southern Russia and Ukraine response patterns by large farms formerly collective and state farms household adaptation using a standardized set of criteria This fascinating book gives an illuminating picture of the ways in which peasants respond to new environmental conditions and stimuli created by reform The substantive material included draws on fieldwork and survey data collected from rural Russia from the Stolypin reforms in the pre Soviet era and collectivisation of agriculture during the 1930s in the Soviet era This book was previously as a special issue of The Journal of Peasant Studies

Food Security in the Russian Federation David J. Sedik, Serge? Sotnikov, Doris Wiesmann, Food and Agriculture Organization of the United Nations, 2003-01-01 The Russian Federation experienced a fall in GDP per capita of nearly 50 per cent during the 1990s and following the sudden fall in value of the rouble in 1998 international concerns grew over to the rising level of food insecurity and poverty in the country This report has been produced as part of a FAO technical assistance project and examines the state of food security in the Russian Federation and the prospects for addressing these challenges in the future Issues discussed include the changes in agricultural production during the 1990s the main indicators of food availability and access to food by the population public nutrition and diet and the outlook for improvements in the future

Policies in China after WTO Accession OECD, 2002-09-12 This book presents the proceedings of an OECD conference reflecting on how China can best manage its reform process under WTO integration [How Reform Worked in China](#) Yingyi Qian, 2017-11-24 A noted Chinese economist examines the mechanisms behind China's economic reforms arguing that universal principles and specific implementations are equally important As China has transformed itself from a centrally planned economy to a market economy economists have tried to understand and interpret the success of Chinese reform As the Chinese economist Yingyi Qian explains there are two schools of thought on Chinese reform the School of Universal

Principles which ascribes China's successful reform to the workings of the free market and the School of Chinese Characteristics which holds that China's reform is successful precisely because it did not follow the economics of the market but instead relied on the government. In this book Qian offers a third perspective taking certain elements from each school of thought but emphasizing not why reform worked but how it did. Economics is a science but economic reform is applied science and engineering. To a practitioner it is more useful to find a feasible reform path than the theoretically best way. The key to understanding how reform has worked in China, Qian argues, is to consider the way reform designs respond to initial historical conditions and contemporary constraints. Qian examines the role of transitional institutions, not best practice institutions but incentive compatible institutions in Chinese reform: the dual track approach to market liberalization, the ownership of firms, viewed both theoretically and empirically, government decentralization, offering and testing hypotheses about its link to local economic development, and the specific historical conditions of China's regional based central planning.

Russia's Uncertain Economic Future John P. Hardt, Robert F. Bennett, 2015-04-15. The contributors to this volume analyze the present state of the Russian economy and its future prospects which now seem brighter than at any previous time in the country's history. The Russian economy is now showing positive GDP growth and a positive balance of payments portending a trend of sustained growth. The record of the Putin presidency with respect to the establishment of market friendly legal and administrative environments is substantially positive. On the other side of the ledger the contributors identify the persistence of monopolies in energy, transportation, and agriculture, distortions resulting from corruption, infrastructural inadequacies, and the maldistribution of political power and decision making authority. Demographic decline and the erosion of human capital as manifested in the health, education, and welfare of the population. Russia's successful development as a democratic society with a market economy is of great importance to its neighbors and to the global economy and specifically to the United States, which is why the U.S. Congress commissioned these studies by expert analysts. This edition includes a comprehensive subject index making the volume user friendly.

From Marx and Mao to the Market Johan F. M. Swinnen, Scott Rozelle, 2006-01-26. The emergence of China as a global economic powerhouse, the uncertain path of Russia towards a market economy, and the integration of ten Central and Eastern European countries into the European Union (EU) have occupied the minds and agendas of many policy makers, business leaders, and scholars from around the world at the end of the twentieth and the beginning of the twenty first century. Twenty years ago these developments were unimaginable. The impact of these changes is so vast that the importance of understanding the forces that unleashed this process, how these changes became possible, and what the lessons are for other developing countries cannot be overestimated. This book is the first effort to analyze the economics and politics of agricultural reforms by comparing the reform processes, their causes, and their effects across this vast region. The authors draw on a vast set of studies and new data which compare reforms and economic impacts in more than 25 countries to come up with a series of conclusions and implications on the role of economic reforms in growth.

and the importance of initial conditions and political constraints in explaining the choices that were made and their effects. The book analyzes some of the most successful sets of agricultural policies in history that have lifted people out of poverty, raising productivity and incomes by staggering amounts. At the same time, the book explains the reasons behind dramatic failures in policy processes and reforms that caused hunger, poverty, and which had devastating effects on economic growth and development for millions of other people.

GM Food Systems and Their Economic Impact Tatjana Brankov, Koviljko Lovre, 2018-11-09. This book includes 6 chapters examining the relevance of transgenic crops in food production, prices, and the environment. It initially describes the historical evolution of biotechnology and defines key terms before moving on to explore transgenic technology and food regime concepts. It analyses genetically modified organism (GMO) policy as part of overall agrarian policy, considering neoregulation in the USA, the EU, Brazil, Russia, China, India, South Africa, and Serbia, as well as discussing agricultural performance, support, and trade relations. The effect of transgenic food production on world food prices is also examined, along with food security at global and regional levels and the links between GMOs and world hunger. The environmental implications of transgenic technology are considered through analysis of pesticide and fertilizer usage and efficiency and pesticide consumption in GMO and non-GMO producing countries. Finally, the book considers the entry of transgenic ingredients into the food chain and lists GMOs approved for use in foods and products contaminated with unapproved GMOs. The key features of this book include a detailed analysis of economic data, a comparison of international trends including BRICS countries (Brazil, Russia, India, China, and South Africa), and Serbia, evaluation of environmental and food security implications, and a glossary of important terms. This book is intended for a wide range of professionals and researchers whose interests relate to all aspects of the global food system, including policy makers, policy advisers, and analysts, NGOs, students, and other interest groups.

Agriculture in Transition Zvi Lerman, Csaba Csáki, Gershon Feder, 2004-01-01. In *Agriculture in Transition: Land Policies and Evolving Farm Structures in Post-Soviet Countries*, authors Zvi Lerman, Csaba Csáki, and Gershon Feder study the land policies and farming structures of these newly emerging nations as components of institutional change in the rural sector, change from a centralized rural economy to a market-oriented economy.

Agricultural Policies in Non-OECD Countries 2007: Monitoring and Evaluation OECD, 2007-05-29. This report monitors agricultural policy developments in Brazil, Bulgaria, China, India, Romania, Russia, South Africa, and Ukraine, following the same approach applied to OECD countries, providing a common benchmark for evaluating reforms and for facilitating international dialogue.
