Russias Virtual Economy:

Russia's Virtual Economy Clifford G. Gaddy, Barry William Ickes, 2002 Clifford Gaddy and Barry Ickes thesis that Russia's economy is based on illusion or pretense about nearly every important economic yardstick including prices sales wages and budgets has forced broad recognition of the inadequacies of the intended market reform policies in Russia and provided a coherent framework for understanding how and why so much of Russia's economy has resisted reform *Russia's Virtual Economy* Clifford G. Gaddy, Barry William Ickes, 2002 Clifford Gaddy and Barry Ickes thesis that Russia's economy is based on illusion or pretense about nearly every important economic yardstick including prices sales wages and budgets has forced broad recognition of the inadequacies of the intended market reform policies in Russia and provided a coherent framework for understanding how and why so much of Russia's economy has resisted reform *Testing Russia's Virtual Economy* Vlad Ivanenko, 2003 In the aftermath of sovereign default of August 1998 the hypothesis of virtual economy in Russia developed by Gaddy and Ickes has gained popularity The hypothesis states that the country has not moved towards free market economy but developed a system of implicit price subsidization similar to what had existed before Non viable sectors that the state supported with subsidies before survive by over pricing their output Customers pass the bill back to the government by reducing their tax liabilities We test the proposition that the distribution of the value added across sectors is biased because of price distortions and estimate the distribution at world prices The results support the claim that Russian price structure is different from the world level and three out of fifteen sectors for which we construct price indices become value destroying We investigate the reasons behind price differentials and find that difference in processing and the use of barter explain a large part of it **A Model of Russia's "Virtual Economy"** R.E. Ericson, 2000 **A Model of Russia's 'Virtual Economy'** Richard E. Ericson, 2007 The Russian Economy has evolved into a hybrid form a partially monetized quasi market system that has been called the virtual economy In the virtual economy barter and non monetary transactions play a key role in transferring value from productive activities to the loss making sectors of the economy We show how this transfer takes place and how it can be consistent with the incentives of economic agents We analyze a simple partial equilibrium model of the virtual economy and show how it might prove an obstacle to industrial restructuring and hence marketizing transition
