**The sacred tree, or, The tree in religion and myth** Mrs. Isaline PHILPOT, 1897 **The Sacred Tree** Carole M. Cusack, 2011-05-25 The fundamental nature of the tree as a symbol for many communities reflects the historical reality that human beings have always interacted with and depended upon trees for their survival Trees provided one of the earliest forms of shelter along with caves and the bounty of trees nuts fruits and berries gave sustenance to gatherer hunter populations This study has concentrated on the tree as sacred and significant for a particular group of societies living in the ancient and medieval eras in the geographical confines of Europe and sharing a common Indo European inheritance but sacred trees are found throughout the world in vastly different cultures and historical periods Sacred trees feature in the religious frameworks of the Ghanaian Akan Arctic Altaic shamanic communities and in China and Japan The power of the sacred tree as a symbol is derived from the fact that trees function as homologues of both human beings and of the cosmos This study concentrates the tree as axis mundi hub or centre of the world and the tree as imago mundi picture of the world The Greeks and Romans in the ancient world and the Irish Anglo Saxons continental Germans and Scandinavians in the medieval world all understood the power of the tree and its derivative the pillar as markers of the centre Sacred trees and pillars dotted their landscapes and the territory around them derived its meaning from their presence Unfamiliar or even hostile lands could be tamed and made meaningful by the erection of a monument that replicated the sacred centre Such monuments also linked with boundaries and by extension with law and order custom and tradition The sacred tree and pillar as centre symbolized the stability of the cosmos and of society When the Pagan peoples of Europe adopted Christianity the sacred trees and pillars visible signs of the presence of the gods in the landscape were popular targets for axe wielding saints and missionaries who desired to force the conversion of the landscape as well as the people Yet Christianity had its own tree monument the cross on which Jesus Christ was crucified and which came to signify resurrected life and the conquest of eternal death for the devout As European Pagans were converted to Christianity their tree and pillar monuments were

changed into Christian forms the great standing crosses of Anglo Saxon northern England played many of the same roles as Pagan sacred trees and pillars Irish and Anglo Saxons Christians often combined the image of the Tree of Life from the Garden of Eden with Christ on the cross to produce a Christian version of the tree as imago mundi *The Sacred Tree Or the Tree in Religion and Myth - Scholar's Choice Edition* J. Haberman, 2013-04-25 This is a book about religious conceptions of trees within the cultural world of tree worship at the tree shrines of northern India Sacred trees have been worshipped for millennia in India and today tree worship continues there among all segments of society In the past tree worship was regarded by many Western anthropologists and scholars of religion as a prime example of childish animism or decadent popular religion More recently this aspect of world religious cultures is almost completely ignored in the theoretical concerns of the day David Haberman hopes to demonstrate that by seriously investigating the world of Indian tree worship we can learn much about not only this prominent feature of the landscape of South Asian religion but also something about the cultural construction of nature as well as religion overall The title People Trees relates to the content of this book in at least six ways First although other sacred trees are examined the pipal arguably the most sacred tree in India receives the greatest attention in this study The Hindi word pipal is pronounced similarly to the English word people Second the personhood of trees is a commonly accepted notion in India Haberman was often told This tree is a person just like you and me Third this is not a study of isolated trees in some remote wilderness area but rather a study of trees in densely populated urban environments This is a study of trees who live with people and people who live with trees Fourth the trees examined in this book have been planted and nurtured by people for many centuries They seem to have benefited from human cultivation and flourished in environments managed by humans Fifth the book involves an examination of the human experience of trees of the relationship between people and trees Haberman is

interested in people's sense of trees And finally the trees located in the neighborhood tree shrines of northern India are not controlled by a professional or elite class of priests Common people have direct access to them and are free to worship them in their own way They are part of the people's religion Haberman hopes that this book will help readers expand their sense of the possible relationships that exist between humans and trees By broadening our understanding of this relationship he says we may begin to think differently of the value of trees and the impact of deforestation and other human threats to trees
