**The Making of Singapore Sociology** Tong Chee-Kiong, Lian Kwen-Fee, 2021-11-08 This book presents a collection of essays of how the city state of Singapore's societal dynamics have evolved from the time of its birth as a nation in 1965 to the present. Key areas of Singapore society are explored contributing to the understanding of the social organisation of the city. This study reveals a shift from the modernisation studies in the 1970s to a more political economic turn as a consequence of the influence of dependency and world systems theories. Topics covered include urban studies, family, education, medical care, class and social stratification, work, language, ethnic groups, religion, and crime and deviance. **The Oxford Handbook of**

**Digital Technology and Society** Simeon Yates, Ronald E. Rice, 2020-06-01 Required reading for anyone interested in the profound relationship between digital technology and society. Digital technology has become an undeniable facet of our social lives, defining our governments, communities, and personal identities. Yet with these technologies in ongoing evolution, it is difficult to gauge the full extent of their societal impact, leaving researchers and policy makers with the challenge of staying up to date on a field that is constantly in flux. The Oxford Handbook of Digital Technology and Society provides students, researchers, and practitioners across the technology and social science sectors with a comprehensive overview of the foundations for understanding the various relationships between digital technology and society. Combining robust computer-aided reviews of current literature from the UK Economic and Social Research Council's commissioned project 'Ways of Being in a Digital Age' with newly commissioned chapters, this handbook illustrates the upcoming research questions and challenges facing the social sciences as they address the societal impacts of digital media and technologies across seven broad categories: citizenship and politics, communities and identities, communication and relationships, health and well-being, economy and sustainability, data and representation, and governance and security. Individual chapters feature important practical and ethical explorations into topics such as technology and the aging, digital literacies, work-home boundary machines in the workforce, digital censorship and surveillance, big data, governance and regulation, and technology in the public sector. The Oxford Handbook of Digital Technology and Society will equip readers with the necessary starting points and provocations in the field so that scholars and policy makers can effectively assess future research practice and policy.

**Rationalizing Religion** Chee Kiong Tong, 2007 Disputing the secularization hypothesis, this book examines the relationship between religion and modernity, detailing and explaining religious conversion, revivalism, and religious competition in Singapore. There is intellectualization of religion, a shift from unthinking acceptance to rationalized religions.

Handbook of Marriage and the Family Suzanne K. Steinmetz, Marvin B. Sussman, 2013-11-11 The lucid, straightforward Preface of this Handbook by the two editors and the comprehensive perspectives offered in the Introduction by one of them leave little for a Foreword to add. It is therefore limited to two relevant but not intrinsically related points: vis-à-vis research on marriage and the family in the interval since the first Handbook (Christensen 1964) appeared, namely the impact on this

research of the politicization of the New Right and of the Feminist Enlightenment beginning in the mid sixties about the time of the first Handbook In the late 1930s Willard Waller noted Fifty years or more ago about 1890 most people had the greatest respect for the institution called the family and wished to learn nothing whatever about it Everything that concerned the life of men and women and their children was shrouded from the light Today much of that has been changed Gone is the concealment of the way in which life begins gone the irrational sanctity of the home The aura of sentiment which once protected the family from discussion clings to it no more We want to learn as much about it as we can and to understand it as thoroughly as possible for there is a rising recognition in America that vast numbers of its families are sick from internal frustrations and from external buffeting We are engaged in the process of reconstructing our family institutions through criticism and discussion 1938 pp 3 4

**Social Capital in Singapore** Vincent Chua, Gillian Koh, Ern Ser Tan, Drew Shih, 2020-12-27 How can social cohesion be achieved in a meritocratic and multicultural global city state Meritocracy poses a paradox On one hand it integrates individuals through frameworks of equal treatment equal justice and opportunity regardless of race language or religion On the other hand individuals are then segregating through academic sorting they are rewarded based on credentials and performance which also results in elite identification and bonding After a generation without mitigation action social stratification can result Distinctive circles differentiating social elites from non elites the professional classes from non professional classes emerge The remedy the authors propose is network diversity which is the organic forming of ties across class and other social boundaries built on deliberate policies programmes and platforms designed to facilitate that This social mixing forged in social infrastructure such as schools workplaces and voluntary associations pays off by producing the collective goods of national identity and trust This hypothesis has been tested in the case of Singapore society and the empirical results from the research on the power of network diversity and bridging social capital are found in this volume An insightful read for scholars and practitioners in public policy and social network analysis looking to understand the challenges faced by and the experiences that have emerged from the case of Singapore with its multicultural and cosmopolitan setting

*Managing Diversity In Singapore: Policies And Prospects* Mathews Mathew, Wai Fong Chiang, 2016-05-11 Singapore society is increasingly becoming diverse During the first few decades of nation building policies were designed to homogenise aspects of Singaporean society while enshrining principles to allow restricted amounts of diversity Fast forward to the present and fifty years after independence the number of areas where diversity is profoundly apparent remains copious and its manifestations more varied This book provides an updated account on the tensions posed by diversity in Singapore and how this is being managed primarily by the state through policies and programmes but also by communities who attempt to negotiate these tensions Such an enquiry is crucial especially at this juncture when the nation is finding ways to embrace the different forms of diversity brought about through external impetuses as well as manage internal reactions from the various communities The book chapters highlight important considerations if Singapore s

diversity management strategies will hold promise for the future

### **Knowledge, Control and Critical Thinking in**
