Yardley,2008 U S Navy surface combatant ship crew training involves a combination of shore based onboard pier side and underway training Underway training is expensive however and it increases wear and tear on operating equipment Furthermore constrained budgets and increasing recapitalization costs have forced the Navy to examine various methods such as increased use of simulators to reduce the annual operating costs of the fleet Technological improvements have increased the fidelity and realism of simulators and simulation is being used more widely for training within the U S Navy in other navies and in commercial shipping companies Although the Navy s surface combatant community currently uses simulators in its training regimen an increased use of simulation could potentially improve training efficiency sustain training readiness and reduce underway days Focusing on the DDG 51 Arleigh Burke class of surface combatants RAND examines the training requirements of surface forces determines where credit is granted for the use of simulation estimates what training is done underway examines simulation technology and identifies areas where simulation could be substituted for underway training without any decrease in readiness The authors find that although most exercises are done underway many could be done in port with or without the use of simulators Accordingly the Navy should consider 1 investing in shore based engineering simulators 2 directing that exercises that can be done in port be done in port and 3 accelerating the upgrades that are slowly providing DDG 51 class ships with an embedded engineering training capability publisher s website [DDG-51 Engineering Training](#) Roland J. Yardley,2009 Much of the training for the engineering watchstanders of Arleigh Burke class destroyers that is currently done underway could be done in port Training could also be done on simulators at considerable savings in time money fuel and ship wear and tear This monograph discusses how training simulator use could improve engineering watchstanders proficiency before ships go to sea reserving time at sea for fine tuning the training *The Cumulative Book Index* ,1996 A world list of books in the English language [NTIS Products](#) United States.
