Los Grandes Descubrimientos Perdidos:

Los grandes descubrimientos perdidos Dick Teresi, 2004 Si piensa usted como yo creo que la ciencia floreció en la antigua Grecia entonces lea este libro de Dick Teresi para comprender la grandeza de los genios anteriores nos dice Dava Sobel autor del best seller La hija de Galileo En efecto Dick Teresi que ha realizado un inmenso trabajo de erudición nos muestra aquí lo mucho que debemos a babilonios y a egipcios a los indios a los africanos al Nuevo Mundo a las tribus oceánicas y a las civilizaciones medievales no europeas Los cimientos matemáticos de la ciencia occidental por ejemplo proceden de los indios los chinos los rabes los babilonios y los mayas la astronomía comenzó en la antigua India y floreció en el mundo árabe Los chinos observaron dataron e interpretaron los eclipses hacia 1400 a C hace cinco mil años los sumerios sostuvieron que la Tierra era esférica eruditos chinos y árabes utilizaron fósiles para estudiar científicamente la historia de nuestro planeta la quimica china fue hoy un tesoro olvidado por casi todos los indios quechuas del Perú fueron los primeros en vulcanizar el caucho asientos y cientos de ejemplos Nos cansamos de hablar de los beneficios del multiculturalismo hora es de tomárselo en serio y nada mejor que este libro para comprobar cuán firmemente y desde cuándo está instalado en la historia Los Soberanos de los Mundos Perdidos Jadwiga Pasenkiewicz, 1992 **Momentos históricos de la bacteriología en Colombia** María Eugenia González Rodríguez, Ofelia Flórez Echeverry, Germán Mauricio Vega Castro, Mercedes Salcedo Cifuentes, 2011-10-24 En la obra podemos visualizar la caracterización de las diversas modalidades históricas que dieron origen a la bacteriología en Colombia la llegada de médicos e investigadores en la época de la Colonia que sembraron la semilla de los servicios en el campo de la salud La creación de escuelas y facultades de medicina hospitales gubernamentales y laboratorios privados donde la Bacteriología se imagina crea forma y crece en el pensamiento el ansia de conocimiento y la ardua labor investigativa del cuerpo médico tanto nacional como extranjero Cilia Rojas de Molano *El país de los sueños perdidos* José Manuel Sánchez Ron, 2020-10-22 PREMIO ACCIÓN CIVICA PARA LA DEFENSA DE LAS HUMANIDADES La más ambiciosa historia de la ciencia en España imprescindible para comprender nuestro presente científico y planificar el futuro En esta obra monumental largamente necesitada el profesor y miembro de la Real Academia Española José Manuel Sánchez Ron analiza e interpreta la historia de la ciencia que se hizo en España desde el siglo VII cuando Isidoro de Sevilla escribió sus Etimologías hasta la promulgación de la denominada Ley de la Ciencia en 1986 A lo largo de los siglos no han faltado españoles capaces de apreciar el valor de la ciencia entendida como un sueño al que merece la pena dedicarse por su valor intrínseco como el mejor instrumento de que disponemos para entender todo lo que nos rodea pero también por su innegable utilidad para facilitarnos la vida Esta es la historia de todas esas personas y de las instituciones en que trabajaron que condicionadas por la situación política económica militar o social del país se dedicaron a la ciencia y vivieron momentos de esperanza pero también de frustración al comprobar que sus sueños se habían perdido que despertaban en un país que no era el que ellos habían deseado Escrito con una prosa admirable El país de los sueños perdidos nos habla del ayer pero también de

Sin nombre Sin recuerdos Sin hogar Un mar embravecido arroja a un niño a la costa del antiguo Gales Aunque no lo sabe algún día se convertirá en el mago más grande de todos los tiempos Abandonado a su suerte y decidido a averiguar quién es y a conocer la verdad sobre sus misteriosos poderes se adentra en una tierra ignota y encantada Una tierra a la que su destino está profundamente ligado *Los hijos perdidos* Manuel Fernández y González, 1866 **Historia de la agronomía**

MAROTO BORREGO, JOSE VICENTE, 2014-01-01 El nacimiento de la Agricultura y el desarrollo de las técnicas agrarias han jugado un papel primordial en la propia historia social y cultural de la Humanidad En este libro se ha tratado de estudiar la evolución de las técnicas y ciencias agrarias desde su nacimiento hasta la actualidad siguiendo un enfoque cronológico basado en el análisis de las distintas etapas y civilizaciones históricas en un principio desde una perspectiva más generalista y globalizadora y posteriormente más centrada en el contexto europeo y sus proyecciones culturales con una especial atención a la Agricultura española En la exposición se ha pretendido conseguir un sincretismo entre la propia evolución de las técnicas agrarias las distintas aportaciones básicas de la Ciencia a la Agricultura y su propia proyección tecnológica cultural social y económica en cada uno de los períodos históricos contemplados hasta llegar a la aparición de la Agronomía como Ciencia analizando sus avances y comentando asimismo algunos de los debates suscitados ante el importante progreso conseguido Entre los aspectos que son abordados en este libro pueden destacarse los relacionados con el origen de la Agricultura su consolidación como técnica y su influencia en los modelos más antiguos de civilización la descripción de los sistemas agrarios en las principales civilizaciones históricas y sus conexiones con otras ciencias en los distintos períodos históricos el afianzamiento de la Agronomía en los últimos doscientos cincuenta años como Ciencia Aplicada y su espectacular repercusión en la sociedad contemporánea como motor del desarrollo económico y social todo ello junto con las controversias de todo tipo principalmente las medioambientales que se plantean a principios del siglo XXI frente a una concepción agraria marcadamente productivista y movilizadora de grandes insumos en las sociedades más avanzadas La nueva edición de esta obra ha sido considerablemente ampliada y actualizada con respecto a la anterior 1491 Charles C. Mann, 2022-06-20 En este innovador trabajo de ciencia historia y arqueología Mann altera radicalmente nuestra visión de las Américas antes de la llegada de Colón Al contrario de lo que muchos estadounidenses aprenden en la escuela los indios precolombinos no se establecieron escasamente en un desierto virgen más bien había un gran número de indios que moldearon e influenciaron activamente la tierra a su alrededor La asombrosa capital azteca de Tenochtitlán tenía agua corriente y calles impecablemente limpias y era más grande que cualquier ciudad europea contemporánea Las culturas mexicanas crearon maíz en un proceso de mejoramiento especializado que se considera la primera hazaña de ingeniería genética del hombre De hecho los indios estaban diseñando y manipulando su mundo de una manera que solo ahora estamos comenzando a entender Con una mirada desafiante y sorprendente a un mundo rico y fascinante que creemos conocer Mann desvela los misterios

empleados para llegar a estas nuevas visiones de la América precolombina y el modo en que estas afectan a nuestra concepción de la historia y a nuestra comprensión del medio ambiente Verbedíns - La profecía de los lienzos perdidos

Caminos de incertidumbre Albino Prada Blanco, 2020-07-30 Este ensayo tiene como norte argumental diferenciar entre riesgo e incertidumbre Hay riesgo al apostar cara o cruz con una moneda pero cuando la moneda desaparece nos hallamos en un escenario completamente imprevisible el de la incertidumbre La pandemia del coronavirus ha expuesto a nuestras sociedades a circunstancias impensables lo que nos obliga a indagar sobre otros peligros que nos amenazan en este siglo XXI desde las superbacterias asociadas a nuestro modelo alimentario a la inteligencia artificial y el big data la temeridad nuclear el colapso climático la manipulación genética la robotización o la exclusión social Prada indaga en las disyuntivas que nos han traído hasta aquí en las sendas que escogimos y en las que dejamos atrás opciones que hoy podrían darnos tiles para evitar colapsos si abandonamos la confianza ciega de que avanzamos en la opción correcta
