Organic Resistance Venus Bivar,2018-03-12 France is often held up as a bastion of gastronomic refinement and as a model of artisanal agriculture and husbandry But French farming is not at all what it seems Countering the standard stories of gastronomy tourism and leisure associated with the French countryside Venus Bivar portrays French farmers as hard nosed businessmen preoccupied with global trade and mass production With a focus on both the rise of big agriculture and the organic movement Bivar examines the tumult of postwar rural France a place fiercely engaged with crucial national and global developments Delving into the intersecting narratives of economic modernization the birth of organic farming the development of a strong agricultural protest movement and the rise of environmentalism Bivar reveals a movement as

preoccupied with maintaining the purity of the French race as of French food What emerges is a story of how French farming conquered the world bringing with it a set of ideas about place and purity with a darker origin story than we might have guessed

Urban Rivalries in the French Revolution Ted W. Margadant, 2021-05-11 The reordering of France into a new hierarchy of administrative and judicial regions in 1791 unleashed an intense rivalry among small towns for seats of authority while raising vital issues for the vast majority of the French population Here Ted Margadant tells a lively story of the process of politicization magistrates lawyers merchants and other townspeople who petitioned the National Assembly not only boasted of their own communities and denigrated rival towns but also adopted revolutionary slogans and disseminated new political ideas and practices throughout the countryside The history of this movement offers a unique vantage point for analyzing the regional context of town life and the political dynamics of bourgeois leadership during the French Revolution Margadant explores the institutional crisis of the old regime that brought about the reordering considers the rhetoric and politics of space in the first year of the Revolution and examines the fate of small towns whose districts and law courts were suppressed Combining descriptive narrative with statistical analysis and computer mapping he reveals the important consequences of the new hierarchy for the urban development of France in the post Revolutionary era

French Peasants in Revolt Ted W. Margadant, 2012-09-03 The triumphant rise of Louis Napoleon Bonaparte over his Republican opponents has been the central theme of most narrative accounts of mid nineteenth century France while resistance to the coup d tat generally has been neglected By placing the insurrection of December 1851 in a broad perspective of socioeconomic and political development Ted Margadant displays its full significance as a turning point in modern French history He argues that as the first expression of a new form of political participation on the part of the peasants resistance to the coup was of greater importance than previously supposed Furthermore it provides an appropriate testing ground for more general theories of peasant movements and popular revolts Using manuscript materials in French national and departmental archives that cover all the major areas of revolt the author examines the insurrection in depth on a national scale After a brief discussion of the main characteristics of the insurrection he analyzes its economic and social foundations the dialectic of repression and conspiracy that fostered the political crisis and the armed mobilizations violence and massive arrests that exploded as the result A final chapter considers the implications of the insurrection for larger issues in the social and political history of modern France

Sustainable Groundwater Management Jean-Daniel Rinaudo, Cameron Holley, Steve Barnett, Marielle Montginoul, 2020-03-16 This book describes and analyses the diversity of possible approaches and policy pathways to implement sustainable groundwater development based on a comparative analysis of numerous quantitative management case studies from France and Australia This unique book brings together water professionals and academics involved for several decades in groundwater policy making planning or operational management to reflect on their experience with developing and implementing groundwater management policy The data and analysis presented accordingly

makes a significant contribution to the empirical water management literature by providing novel real world insights unpublished elsewhere The originality of the contributions also lies in the different disciplinary perspectives hydrogeology economics planning and social sciences in particular adopted in many chapters The book offers a unique comparative analysis of France Australia and experiences in countries such as Chile and the US to identify similarities but also fundamental differences which are analysed and presented as alternative policy options these differences being mainly related to the role of the state the community and market mechanisms in groundwater management **Geographic**
