Maciunas Learning Machines From Art History To A Chronology Of Fluxus:

Maciunas' Learning Machines George Maciunas, Astrit Schmidt-Burkhardt, 2003 Below the level of the musical note lies the realm of microsound of sound particles lasting less than one tenth of a second Recent technological advances allow us to probe and manipulate these pinpoints of sound dissolving the traditional building blocks of music notes and their intervals into a more fluid and supple medium The sensations of point pulse series of points line tone and surface texture emerge as particle density increases Sounds coalesce evaporate and mutate into other sounds Composers have used theories of microsound in computer music since the 1950s Distinguished practitioners include Karlheinz Stockhausen and Iannis Xenakis Today with the increased interest in computer and electronic music many young composers and software synthesis developers are exploring its advantages Covering all aspects of composition with sound particles Microsound offers composition theory historical accounts technical overviews acoustical experiments descriptions of musical works and aesthetic reflections The book is accompanied by an audio CD of examples

Machine Art in the Twentieth Century Andreas Broeckmann, 2016-12-23 An investigation of artists' engagement with technical systems tracing art historical lineages that connect works of different periods Machine art is neither a movement nor a genre but encompasses diverse ways in which artists engage with technical systems In this book Andreas Broeckmann examines a variety of twentieth and early twenty-first century artworks that articulate people's relationships with machines In the course of his investigation Broeckmann traces historical lineages that connect art of different periods looking for continuities that link works from the end of the century to developments in the 1950s and 1960s and to works by avant garde artists in the 1910s and 1920s An art historical perspective he argues might change our views of recent works that seem to be driven by new media technologies but that in fact continue a century old artistic exploration Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s and then turns to specific domains of artistic engagement with technology algorithms and machine autonomy looking in particular at the work of the Canadian artist David Rokeby vision and image and the advent of technical imaging and the human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically Finally Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the meaning of technology which has brought with it a rethinking of human subjectivity He examines a range of artworks including those by the Japanese artist Seiko Mikami whose work exemplifies the shift

Fluxus Administration Colby Chamberlain, 2024-07-09 George Maciunas is typically associated with the famous art collective Fluxus of which he is often thought to have been the leader In this book critic and art historian Colby Chamberlain wants us to question two things first the idea that Fluxus was a group in any conventional sense and second that Maciunas was its leader Instead Chamberlain shows us how Maciunas used the paper materials of bureaucracy in his art cards certificates charts files and plans among others to subvert his own status as a figurehead of this collective and even as a biographical entity Each of the book's chapters situates Maciunas's artistic practice in relation to a different domain education communication production housing and health We learn about his use of the postal service to make Fluxus into an international network his manipulation of US copyright law to pursue a Soviet ideal of collective authorship his intervention in Manhattan's zoning restrictions as founder and manager of the Fluxhouse artists' lofts in SoHo and his performances protesting against normative ideals of health and family focusing on his own ultimately failed medical self-management *Fluxus Administration* is not a biography but it does delve more deeply than any other book into Maciunas's life and work showing the lengths to which the

artist himself went to disrupt any easy account of himself

The Methuen Drama Companion to Performance Art

Bertie Ferdman, Jovana Stokic, 2020-02-20 The Methuen Drama Companion to Performance Art offers a comprehensive guide to the major issues and interdisciplinary debates concerning performance in art contexts that have developed over the last decade. It understands performance art as an institutional cultural and economic phenomenon rather than as a label or object. Following the ever increasing institutionalization and mainstreaming of performance, the book's chapters identify a marked change in the economies and labor practices surrounding performance art and explore how this development is reflective of capitalist approaches to art and event production. Embracing what we perceive to be the oxymoronic status of performance art where it is simultaneously precarious and highly profitable, the essays in this book map the myriad gestures and radical possibilities of this extreme contradiction. This Companion adopts an interdisciplinary perspective to present performance art's legacies and its current practices. It brings together specially commissioned essays from leading innovative scholars from a wide range of approaches including art history, visual and performance studies, dance and theatre scholarship in order to provide a comprehensive and multifocal overview of the emerging research trends and methodologies devoted to performance art.

Networking Tatiana Bazzichelli, 2009-02 Networking means to create nets of relations where the publisher and the reader, the artist and the audience act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet during the past twenty years, a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s, first and foremost Fluxus, but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the 1980s, even before the Internet even existed, and then moved on to Hackmeetings, to Telestreet and networking art by different artists such as 0100101110101101.ORG, epidemicC, Jaromil, Giacomo Verde, Giovanotti, Mondani, Meccanici, Correnti, Magnetiche, Candida, TV, Tommaso, Tozzi, Federico, Bucalossi, Massimo, Contrasto, Mariano, Equizzi, Pigreca, Molleindustria, Guerriglia, Marketing, Sexyshock, Phag, Off and many others.

Shock and the Senseless in Dada and Fluxus Dorothee Brill, 2010 A groundbreaking analysis of two movements of the historical avant-garde.

Art and Graphic Design Benoit Buquet, 2021-01-01 An innovative exploration of the intersection of graphic design and American art of the 1960s and 1970s. This fascinating study of the role that graphic design played in American art of the 1960s and 1970s focuses on the work of George Maciunas, Ed Ruscha and Sheila Levrant de Bretteville.

Examining how each of these artists utilized typography materiality and other graphic design aesthetics Benoit Buquet reveals the importance of graphic design in creating a sense of coherence within the disparate international group of Fluxus artists an elusiveness and resistance to categorization that defined much of Ruscha's brand of Pop Art and an open and participatory visual identity for a range of feminist art practices Rigorous and compelling scholarship and a copious illustration program that presents insightful juxtapositions of objects some of which have never been discussed before combine to shed new light on a period of abundant creativity and cultural transition in American art and the intimate though often overlooked entwined relationship between art and graphic design

Fluxus

Natasha Lushetich, 2014-06-01 Focusing on the most definition resistant art movement in history and departing from its two chief characteristics intermediality and interactivity this book develops an original theory of practice the experiential philosophy of non duality which is the philosophy of dynamic co constitutivity This is done by tracing the performativity of intermedial works works that fall conceptually between the art and the life media such as Bengt af Klintberg's event score Eat an orange as if it were an apple in five key areas of human experience language temporality the sensorium social rites and rituals and systems of economic exchange The main argument woven with the aid of the Derridian blind tactics the Gramscian production of social life and the Zen derived interexpression of Kitaro Nishida is that the practical philosophy of co constitutivity arises from the logic of the intermedium In pursuing this argument the book does three things 1 it theorises an oeuvre that has remained under theorised due to its fundamentally non discursive nature and in doing so reinstates Fluxus as an influential cultural rather than a merely artistic paradigm 2 it serves as a companion to thinking by doing since most Fluxus intermedia are ready made and as such readily available in the everyday environment and 3 it establishes the counter hegemonic logic of fluxing while tracing its legacy in contemporary practices as diverse as the culture jamming activism of The Yes Men the paradoxical performance work of Song Dong and the pervasive game worlds of Blast Theory Natasha Lushetich is an artist researcher and Lecturer in Performance at the University of Exeter UK Her specialist areas

include intermedia live art performance and philosophy and questions of identity and ideology Her recent writings have appeared in Babilonia Performance Research TDR Theatre Journal Total Art Journal as well as in a number of edited collections **The Palgrave Handbook of Intermediality** Jørgen Bruhn, Asun López-Varela Azcárate, Miriam de Paiva Vieira, 2023-12-01 This handbook provides an extensive overview of traditional and emerging research areas within the field of intermediality studies understood broadly as the study of interrelations among all forms of communicative media types including transmedial phenomena Section I offers accounts of the development of the field of intermediality its histories theories and methods Section II and III then explore intermedial facets of communication from ancient times until the 21st century with discussion on a wide range of cultural and geographical settings media types and topics by contributors from a diverse set of disciplines It concludes in Section IV with an emphasis on urgent societal issues that an intermedial perspective might help understand **Social Networks in the History of Innovation and Invention** Francis C.

Moon, 2013-11-19 This book integrates history of science and technology with modern social network theory Using examples from the history of machines as well as case studies from wireless radio and chaos theory the author challenges the genius model of invention Network analysis concepts are presented to demonstrate the societal nature of invention in areas such as steam power internal combustion engines early aviation air conditioning and more Using modern measures of network theory the author demonstrates that the social networks of invention from the 19th and early 20th centuries have similar characteristics to modern 21st C networks such as the World Wide Web The book provides evidence that exponential growth in technical innovation is linked to the growth of historical innovation networks **George Maciunas the Dream of**
