globalisation and technological advancement have become even more varied and prominent. Accompanying these developments there has been a rise in scholarly interest in interdisciplinary research addressing the important challenges of an ever changing physical and human environment. Drawing on articles and books from international business and economics as well as economic geography, political economy and strategic management, a systematic overview of the developments in scholarly thinking is presented.

Multinational Enterprises and the Global Economy John H. Dunning, 1993 **Aspects of Multinational Enterprises in the Global Economy** Andrea Ascani, 2015 **The Global Factory** Peter J. Buckley, 2018-02-23

This key new book synthesises Peter Buckley's work on the global factory: the modern networked multinational enterprise. The role of interfirm networks, entrepreneurship and cooperation in the creation and management of global factories leads to a discussion of their governance, internal knowledge transfer strategies and performance, including their role in potentially combating societal failures. Emerging country multinationals are examined as a special case of global factories, with a focus on Indian and Chinese multinationals, their involvement in tax havens and offshore financial centres, the performance and processes of their acquisition strategies, all seen as key aspects of globalisation.

Multinational Firms in the World Economy Giorgio Barba Navaretti, Anthony Venables, Frank Barry, 2004

Presenting a debate on multinationals that is grounded in sound economic arguments, the authors explain their conclusion that multinational enterprises are generally a force for the promotion of prosperity in the world economy.

Multinationals and Economic Geography Simona Iammarino, Philip McCann, 2013-01-01

The world economy is subject to a rapidly increasing globalization and multinational enterprises are their major driving force. This brand new book on multinationals and economic geography by two world leading economic geographers is a landmark that provides an integrated and dynamic perspective on the economic geography of the multinational enterprise. To fully understand this process of globalization, the book explains forcefully and persuasively that one needs a dynamic perspective on multinational enterprises that brings together disparate literatures on economic geography, knowledge and innovation, global network cities and international business and management. Embedding it in modern theory of innovation and geography, the book provides not only a state of the art of theories and empirics on the location of multinationals but goes far beyond that. This book is an absolute must read for any scholar and any student that is interested in multinationals and their location.

Ron Boschma, Utrecht University, The Netherlands and Lund University, Sweden

Despite often playing second fiddle to clusters in the economic geography literature, multinationals are fundamental drivers of economic development. As generators and diffusers of knowledge, they have played an essential role in shaping the new world economic order. No book captures this better than Simona Iammarino and Philip McCann's *Multinationals and Economic Geography*, a must read for anyone eager to fully understand the new economic geography of globalisation.

Andrés Rodríguez Pose, London School of Economics, UK

After more than fifty years of systematic research on multinational

enterprises MNEs what is apparent is that there is as yet no unified or dominant theory of the MNE The objective of this book is to bring into focus one particular dimension of MNE behaviour and activity that has been relatively under researched namely the geography of the multinational enterprise as understood through the lens of innovation and technological change The authors clearly demonstrate that geography is becoming increasingly important for MNEs and in turn MNEs are becoming progressively more important for economic geography The pivot on which this vital relationship turns is the creation diffusion and management of new knowledge This unique book will prove a fascinating read for academics students and researchers across a broad range of areas including geography economic geography regional science international business and management innovation studies economic development Professionals such as corporate managers and policymakers in these fields would also find this book to be of great interest

Multinational Enterprises and the Global Economy Surendra Pratap Singh, 2019-11 Multinational Enterprises and The Global Economy provides the readers with the information on the various multinational enterprises and the relation of with the global economy and explains them the emergence of international production It provides the readers with all the information they seek on the subject of multinational enterprises and the effect these have on the global economy for the better understanding of the readers This book also discusses about the role of foreign direct investment in the multinational enterprises and the related economic development the role of technology in the multinational enterprises and its inputs to the global economy the role of human resources in the multinational industry the role of government in the activities in multinational enterprises and future of multinational enterprises in view of the global economy

The Globalization of Multinational Enterprise Activity and Economic Development N. Hood, S. Young, 1999-10-21 This book explores and analyzes the effects of the globalization strategies of multinational enterprises MNEs on national and local development and highlights the implications of these effects for policy makers Containing contributions from leading international business scholars the text addresses this previously little explored but critically important issue for the future of the world economy

China and the Multinationals R. Pearce, 2012 This original and important book explores how the interaction between China and multinational enterprises MNEs has the potential to affect the future of the Chinese economy the global economy and international business It examines the interaction of two of the most important forces affecting the development of the global economy in recent decades firstly the opening and massive growth of the Chinese economy and secondly the rise in foreign direct investment per se and the consequent strategic restructuring of major MNEs The expert contributors begin by investigating precisely how leading MNEs with well honed international practices and commitments have drawn their subsidiaries in China into their established networks They suggest that MNEs operations are increasingly embedded in the growth and sustainability of the Chinese economy itself rather than merely serving as a supply base for their global markets The second part of the book examines the emergence of new MNEs from China itself It shows how these MNEs are seen as integral to China s

development and how their ability to expand reflects strengths from China's growth as well as revealing the growing needs required for sustainability. This timely study will be of great interest not just to those following one of the world's key economies but also to researchers and students of the fast-paced changes in international business strategy. Small and Medium-Sized Enterprises in the Global Economy Zoltan J. Acs, Bernard Yeung, 1999-04-28 DIVE explores how and why small and medium-sized businesses are flourishing in the global marketplace. **Handbook on Small Nations in the Global Economy** D. van den Bulcke, Alain Verbeke, Wenlong Yuan, 2009. These studies of the international competitiveness of small open economies demonstrate the critical importance of foreign direct investment as an engine of economic development. Multinational enterprises are the key drivers of international competitiveness. Alan M. Rugman, University of Reading, UK. Globalization has made every country small. The global economic crisis has made sure that every country has increasingly realised that it is open and vulnerable as well. This volume is both timely and relevant. Small country studies should become mainstream for scholars in business economics and politics. Rob van Tulder, RSM Erasmus University, the Netherlands. This book provides a fresh and clear-eyed view of the relationship between multinationals and location advantages of countries. It is one of the first attempts to build a constructive bridge between the theory of international business and the outstanding contribution of Michael Porter about the drivers of competitiveness. The authors address crucial issues demanding the attention of teachers, researchers, practitioners and political leaders. Philippe Gugler, University of Fribourg, Switzerland. This unique, extensive Handbook illustrates that multinational enterprises can contribute substantially to the competitive advantage of small countries. It advances the notion that small nations increasingly need to rely on both home-grown and foreign multinational enterprises to achieve domestic economic success in industries characterized by international competition. The expert contributors explore the roles of firms in a range of small, successful open economies driven by such multinational enterprises across the globe. They juxtapose country data sets against Professor Michael Porter's paradigm of single diamond components and show that these single diamond components reflect merely a set of initial conditions which can be improved upon through both inward and outward direct investment. Concluding that multinational enterprises create resource linkages between the home and host environments in which they operate, this Handbook proves to be a fascinating read for academics, students and researchers with an interest in business and management economics and international economics. *Exploring the Global Economy* Raymond Vernon, 1985. This wide-ranging collection of previously published articles by Raymond Vernon reflects a portion of the diverse subjects on which he has worked during his career. In the past 20 years, the author has pioneered the study of two major economic institutions which have played important roles in today's global economy: the multinational corporation and the state-owned enterprise. His recent thoughts on these subjects are well represented in this volume. Co-published with the Harvard Center for International Affairs. **Multinational Enterprise in the Global Economy** International Conference on Multinational Enterprise, Zhongguo wen hua da xue. Association of

International Business Studies, 1995 **Multinational Firms in the World Economy** Giorgio Barba Navaretti, Anthony J. Venables, 2020-06-16 Depending on one's point of view multinational enterprises are either the heroes or the villains of the globalized economy. Governments compete fiercely for foreign direct investment by such companies but complain when firms go global and move their activities elsewhere. Multinationals are seen by some as threats to national identities and wealth and are accused of riding roughshod over national laws and of exploiting cheap labor. However, the debate on these companies and foreign direct investment is rarely grounded on sound economic arguments. This book brings clarity to the debate. With the contribution of other leading experts, Giorgio Barba Navaretti and Anthony Venables assess the determinants of multinationals' actions, investigating why their activity has expanded so rapidly and why some countries have seen more such activity than others. They analyze their effects on countries that are recipients of inward investments and on those countries that see multinational firms moving jobs abroad. The arguments are made using modern advances in economic analysis, a case study, and by drawing on the extensive empirical literature that assesses the determinants and consequences of activity by multinationals. The treatment is rigorous yet accessible to all readers with a background in economics, whether students or professionals. Drawing out policy implications, the authors conclude that multinational enterprises are generally a force for the promotion of prosperity in the world economy. Multinational Enterprises and the Global Economy, 1995

Regional Strategies in a Global Economy René Haak, Dennis S. Tachiki, 2004 Both proponents and opponents of globalization assume it is a process that sweeps across national borders. Indeed, over the last twenty years, the key features of globalization provide prima facie evidence for this conventional wisdom. Dramatic developments in information and communications technology, the rise of global companies and production networks, the unstoppable internationalization of financial markets, and the deregulation and privatization of service sectors are all important examples of how this process unfolds in its raw form. Nevertheless, the increase in regional economic activity is another striking feature of this process. As multinational corporations extend their global reach, regional networks also emerge in the global trading system. Globalization therefore does not only mean a global convolution of economies but could also lead to a spatial concentration of economic activity. All through the 1990s and at the beginning of the new century, East Asia experienced numerous structural changes leading to interesting market developments. South Korea's rise to developed country status, the integration of the Southeast Asian economies, and the rise of China have made this region the manufacturing center of the global economy. Considering the economic importance of Japan and the other East Asian nations in the world, the crucial questions that arise include: What are the linkages between the global strategies of multinational corporations and their regional business operations? Why do subregional strategies emerge, especially recently, to take advantage of China as a production base and market? Are the modern business practices in a multinational corporation's home country easily transferred to their overseas operations, and are they readily absorbed by local employees? Finally, which strategic directions are Japanese, American, East

Asian and European enterprises going in this important business area of the world To answer these questions this book takes a closer look at several structural features of the East Asian economy and the corporate and business strategies of multinational corporations The volume assembles up to date research by a number of European Australian and Japanese scholars and presents analysis of various business aspects of regional strategies in a global economy **Multinationals in the Global Political Economy** Lorraine Eden,Evan H. Potter,1993-10-15 Multinationals in the Global Political Economy looks at the new diplomacy between the multinational firm and the nation state focusing on the interdependencies conflictual and co operative between the two primary actors in the global economy An international group of scholars the United Kingdom the United States Canada and Sweden from a variety of disciplines international relations political science public policy economics and business studies discuss the theory and practice of MNE state relations in the 1990s **Handbook of Manufacturing Industries in the World Economy** John R. Bryson,Jennifer Clark,Vida Vanchan,2015-04-30 This interdisciplinary volume provides a critical and multi disciplinary review of current manufacturing processes practices and policies and broadens our understanding of production and innovation in the world economy Chapters highlight how firms

Global Business Mark Casson,2023-09-06 This fascinating book examines international business and multinational enterprise as part of a bigger picture considering the importance of two main components space and time Summarising the past five years Mark Casson reviews the changing role of multinational enterprises within the global economy and how leading firms have generated profitability and growth not only from innovations in technology and marketing but also by exploiting legal loopholes in tax and regulatory systems
