Multinationals Of The South New Actors In The International Economy:

The Emergence of Southern Multinationals Louis Brennan, 2010-12-21 In today's globalised world there is a need to investigate new trends in the global economy which impact on Europe. The emergence of these southern multinationals in Europe is one such phenomenon. This book explores the existing trends and trajectories of these companies, the evidence of their impact and their strategies and processes.

New Multinational Enterprises from Korea and Taiwan Roger van Hoesel, 2013-01-11 This volume represents the first substantive study of emerging multinationals (MNEs) from Asian economies drawing on the unique experiences of South Korea and Taiwan. Combining an econometric investigation with detailed case studies of leading Korean and Taiwanese electronics companies, it aims to demystify the nature and theoretical implications of these dynamic economic regions. The author argues that many of these new multinationals do not possess the characteristics typically ascribed to MNEs such as technological leadership, strong marketing positions or advanced managerial capabilities. This is highlighted by documentation of recent developments in outward investment from Korea and Taiwan at both micro and macro level. The implications of the recent Asian crisis for the internationalization of Korean and Taiwanese firms are also explored.

Emerging Market Multinationals and Europe Andreas Breinbauer, Louis Brennan, Johannes Jäger, Andreas G. M. Nachbagauer, Andreas Nölke, 2019-11-15 Recently there have been public concerns about the impact of emerging market multinationals. The expansion of China's multinationals to Europe and the Belt and Road Initiative is a prominent example that has kindled hope but also started to increase awareness of the long-term implications. Based on a systematic analysis of internationalization theories, the role of foreign direct investment and multinational companies combined with in-depth empirical research using case studies in Turkey, Russia, Latin America, Asia and Europe, this timely edited volume addresses opportunities and concerns related to this new trend. It also provides new insights that are highly relevant for scholars, policy makers, regional business agencies and students as well as the public at large. By focusing on the potential impact of the expansion of emerging market multinationals on Europe and by including a long-term perspective, the book offers a fresh perspective on a highly controversial issue.

The Rules of the Game in the Global Economy Lee E. Preston, Duane Windsor, 2013-11-11 This study has been long in the making and the world has changed dramatically while we have been at work. We initially anticipated a substantial section on the Soviet-dominated Council for Mutual Economic Assistance (CMEA) or COMECON which offered an interesting contrast to the kind of international business regime typically found among market-oriented countries and industries. As we moved toward publication, the CMEA vanished and so we mention it only in passing. The USSR subsequently disintegrated into a Commonwealth of Independent States (CIS). On the other hand, we began with the assumption that the historic rule of capture no longer played a significant role in international economic relations. The seizure of Kuwait's territory and wealth by the government of Iraq suggests that this assumption was heavily influenced by wishful thinking. Even though this seizure has been reversed by

military action the experience remains a challenge to generally held beliefs about the strength of order versus chaos in contemporary international affairs Some readers of this volume have suggested that it gives insufficient attention to the fact that many of the important business and economic regimes of the postwar period are currently under significant pressure perhaps even in danger of collapse We acknowledge that there are many evidences of strain in for example the free trade and money exchange regimes and in many areas of environmental protection

Current Issues in Economic Integration M. Yeung,2002-09-11 Detailed focus on business in Hong Kong timely and newsworthy Great interest at the moment in Chinese business *Corporations and International Lawmaking* Stephen Tully,2007-11-30 The classical model of international lawmaking posits governments as exclusively authoritative actors However commercially oriented entities have long been protagonists within the prevailing international legal order concluding contracts and resolving disputes with governments Is the international legal personality of corporations undergoing further qualitative transformations Corporations influence the State practice constitutive of custom and create refashion or challenge normative rules The corporate willingness to fill legal

lacunae where governments do not exercise their full regulatory responsibility is also observable through resort to alternative legal mechanisms Corporations moreover contribute directly to treaty negotiations and occupy crucial roles during subsequent implementation Indeed an analysis of the access conditions and participatory modalities for non State actors could support a right to participate under common international procedural law Their substantive contributions are also evident when corporations participate in enforcing international law against governments through national courts diplomatic protection including the WTO and arbitration including NAFTA However the practice of intergovernmental organizations reveals several challenges including managing corporate interaction with developing country governments and other non State actors Acknowledging corporate contributions also has important implications for national regulatory autonomy the ability of governments to mediate contested policy issues the democratic legitimacy of the contemporary lawmaking process and an understanding of consent as the underlying basis for international law

Rival States, Rival Firms John M. Stopford, Susan Strange, John S. Henley, 1991-10-17 In this theoretically original work two distinguished authors explore the mutual interdependence of states and firms throughout the world They show how global structural changes in finance technology knowledge and politics often impel governments to seek the help and cooperation of managers of multinational enterprises Yet as Professors Stopford and Strange demonstrate this is constrained by each country's economic resources its social structures and its political history Based on grass roots research into the experience of over 50 multinationals and more than 100 investment projects in three developing countries Brazil Malaysia and Kenya the authors develop a matrix of agendas They present the impact on projects of the multiple factors affecting the bargaining relationships between the government and the foreign firm at different times and in a variety of economic sectors In conclusion they offer some guidelines for actions to both governments and firms and some points to future interdisciplinary research
