Histories of Suicide John C. Weaver,David Wright,2009-01-01 This interdisciplinary collection of essays assembles historians health economists anthropologists and sociologists who examine the history of suicide from a variety of approaches to provide crucial insight into how suicide differs across nations cultures and time periods **Suicide and**

Homicide-Suicide Among Police Antoon Leenaars,Dale Lund,2017-07-28 The goal of this book is to fully explore what the author refers to as the near epidemic levels of suicide and homicide suicide among law enforcement officers and ultimately to offer recommendations and best practices with which to better address the problem The book begins by discussing suicide in some depth for one has to know suicide unequivocally to understand a suicidal or homicidal suicidal officer Suicide and homicide suicide are complex multi determined events the result of an interplay of individual relational social cultural and environmental factors The complexity of causation necessitates a parallel complexity of knowledge There are at least two avenues to understanding the nomothetic general approach which deals with generalizations using empirical statistical and demographic methods or techniques and the idiographic specific approach which typically involves the intense study of individuals This book explores both Attempting to be mindful of the needs of the office on the street the mental health provider the administrator the forensic specialist and the survivors of these needless tragedies the belief is that by amalgamating the concerns of a diverse audience we can meet the challenge of identifying at risk individuals and situations and saving lives **Bulletin of Suicidology** National Clearinghouse for Mental Health Information (U.S.),1967 The

^APerversion of Virtue Thomas Joiner,2014-02-01 In The Perversion of Virtue suicide researcher Thomas Joiner explores the nature of murder suicide and offers a unique new theory to explain this nearly unexplainable act that true murder suicides always involve the wrongheaded invocation of one of four interpersonal virtues Epidemiology of Chronic Disease: Global

Suicide: A Global Perspective Maurizio Pompili, 2012-09-19 In the year 2000 approximately one million people died from suicide a global mortality rate of 16 per 100 000 or one death every 40 seconds In the last 45 years suicide rates have increased by 60% worldwide Suicide is now among the three leading causes of death among those aged 15 44 years both sexes these figures do not include suicide attempts up to 20 times more frequent than completed suicide Suicide worldwide is estimated to represent 1 8% of the total global burden of disease in 1998 and 2 4% in countries with market and former socialist economies in 2020 Although traditionally suicide rates have been highest among the male elderly rates among young people have been increasing to such an extent that they are now the group at highest risk in a third of countries in both developed and developing countries Mental disorders particularly depression and substance abuse are associated with more than 90% of all cases of suicide however suicide results from many complex sociocultural factors and is more likely to occur particularly during periods of socioeconomic family and individual crisis situations e g loss of a loved one employment honour The economic costs associated with completed and attempted suicide are estimated to be in the billions of dollars One million lives lost each year are more than those lost from wars and murder annually in the world It is three times the catastrophic loss of life in the tsunami disaster in Asia in 2005 Every day of the year the number of suicides is equivalent to the number of lives lost in the attack on the World Trade Center Twin Towers on 9 11 in 2001 Everyone should be aware of the warning signs for suicide Someone threatening to hurt or kill him herself or taking of wanting to hurt or kill him herself

someone looking for ways to kill him herself by seeking access to firearms available pills or other means someone talking or writing about death dying or suicide when these actions are out of the ordinary for the person Also high risk of suicide is generally associated with hopelessness rage uncontrolled anger seeking revenge acting reckless or engaging in risky activities seemingly without thinking feeling trapped like there s no way out increased alcohol or drug use withdrawing from friends family and society anxiety agitation unable to sleep or sleeping all the time dramatic mood changes no reason for living no sense of purpose in life Table 1 Understanding and helping the suicidal individual should be a task for all Suicide Myths How to Help the Suicidal Person Warning Sights of Suicide Myth Suicidal people just want to die Fact Most of the time suicidal people are torn between wanting to die and wanting to live Most suicidal individuals don t want death they just want to stoop the great psychological or emotional pain they are experiencing Listen Accept the person s feelings as they are Do not be afraid to talk about suicide directly Ask them if they developed a plan of suicide Expressing suicidal feelings or bringing up the topic of suicide Giving away prized possessions settling affairs making out a will Signs of depression loss of pleasure sad mood alterations in sleeping eating patterns feelings of hopelessness Myth People who commit suicide do not warn others Fact Eight out of every 10 people who kill themselves give definite clues to their intentions They leave numerous clues and warnings to others although clues may be non verbal of difficult to detect Remove lethal means for suicide from person s home Remind the person that depressed feelings do change with time Point out when death is chosen it is irreversible Change of behavior poor work or school performance Risk taking behaviors Increased use of alcohol or drugs Social isolation Developing a specific plan for suicide Myth People who talk about suicide are only trying to get attention They won t really do it Fact Few commit suicide without first letting someone know how they feel Those who are considering suicide give clues and warnings as a cry for help Over 70% who do threaten to commit suicide either make an attempt or complete the act Express your concern for the person Develop a plan for help with the person Seek outside emergency intervention at a hospital mental health clinic or call a suicide prevention center Myth Don t mention suicide to someone who s showing signs of depression It will plant the idea in their minds and they will act on it Fact Many depressed people have already considered suicide as an option Discussing it openly helps the suicidal person sort through the problems and generally provides a sense of relief and understanding Suicide is preventable Most suicidal individuals desperately want to live they are just unable to see alternatives to their problems Most suicidal individuals give definite warnings of their suicidal intentions but others are either unaware of the significance of these warnings or do not know how to respond to them Talking about suicide does not cause someone to be suicidal on the contrary the individual feel relief and has the opportunity to experience an empathic contact Suicide profoundly affects individuals families workplaces neighbourhods and societies The economic costs associated with suicide and self inflicted injuries are estimated to be in the billions of dollars Surviving family members not only suffer the trauma of losing a loved one to suicide and may themselves be at higher risk for suicide and

emotional problems Mental pain is the basic ingredient of suicide Edwin Shneidman calls such pain psychache 1 meaning an ache in the psyche Shneidman suggested that the key questions to ask a suicidal person are Where do you hurt and How may I help you If the function of suicide is to put a stop to an unbearable flow of painful consciousness then it follows that the clinician's main task is to mollify that pain Shneidman 1 also pointed out that the main sources of psychological pain such as shame guilt rage loneliness hopelessness and so forth stem from frustrated or thwarted psychological needs These psychological needs include the need for achievement for affiliation for autonomy for counteraction for exhibition for nurturance for order and for understanding Shneidman 2 who is considered the father of suicidology has proposed the following definition of suicide Currently in the Western world suicide is a conscious act of self induced annihilation best understood as a multidimensional malaise in a needful individual who defines an issue for which the suicide is perceived as the best solution Shneidman has also suggested that that suicide is best understood not so much as a movement toward death as it is a movement away from something and that something is always the same intolerable emotion unendurable pain or unacceptable anguish Strategies involving restriction of access to common methods of suicide have proved to be effective in reducing suicide rates however there is a need to adopt multi sectoral approaches involving other levels of intervention and activities such as crisis centers There is compelling evidence indicating that adequate prevention and treatment of depression alcohol and substance abuse can reduce suicide rates School based interventions involving crisis management self esteem enhancement and the development of coping skills and healthy decision making have been demonstrated to reduce the risk of suicide among the youth Worldwide the prevention of suicide has not been adequately addressed due to basically a lack of awareness of suicide as a major problem and the taboo in many societies to discuss openly about it In fact only a few countries have included prevention of suicide among their priorities Reliability of suicide certification and reporting is an issue in great need of improvement It is clear that suicide prevention requires intervention also from outside the health sector and calls for an innovative comprehensive multi sectoral approach including both health and non health sectors e g education labour police justice religion law politics the media

Pushkin's Mozart and Salieri Robert Reid, 2023-11-20 Mozart and Salieri probably the best known of Pushkin's Little Tragedies was written in 1830 during the peak of the poet's creative powers Like the other Little Tragedies it is a closet drama which concentrates on the devastating effects of an all-consuming human passion in this case envy Mozart and Salieri typifies Pushkin's implicational technique of character construction the salient points of a fictional psyche are highlighted sufficiently to suggest inner depth while stopping short of precise concretization this allows full play to lectorial inference on a plurality of connotational levels thematic psychological and sociological The present work the first of its kind in English isolates two major thematic dominants in the play envy and music and these form the focus for its aesthetic and psychological preoccupations respectively A variety of psychological approaches are brought to bear on the play's protagonists including adaptations of the theories of Freud Adler Jung and Klages The readiness with which these contrastive but complementary approaches yield new insights into the nature and motivations of the protagonists of Mozart and Salieri points to a work of profound cultural significance something all the more remarkable given its modest compass The sociological and anthropological approaches applied to the drama in this study dwell particularly on theories of social interaction and theories of alienation anomie and suicide Pushkin has often been regarded as an enigmatic phenomenon in the west the compactness and economy of his works often seeming at odds with the degree of impact which they have made on subsequent generations of Russian writers The present work seeks to lay bare what is typical for Pushkin the intimation of great psychological and philosophical truths via a superficially unassuming medium It is not surprising therefore that the influence of Pushkin's Mozart and Salieri and of the aesthetic and ideological positions they represent can be felt in the works of later Russian writers notably Dostoyevsky

Crimes of Violence by Mentally Abnormal Offenders H. Häfner, W. Boker, H. H. Fner, 2011-03-03 A detailed and systematic 1973 account of the extent to which mentally abnormal offenders are likely to commit violent crimes based upon a study of all the 533 men and women in the Federal German Republic from 1955 to 1964 who were detained in hospitals after committing homicide or near homicide

DHEW Publication, 1972 Mental Disorders and the Law Lee Peng Kok, Molly Cheang, Kuan Tsee Chee, 1994 Although numerous books have been separately written on mental disorders and law there is as yet no readily accessible literature dealing with both these disciplines in a single volume in Singapore and Malaysia This present text is therefore intended to fill this gap with two aims in mind i e to address the need for a practical manual useful for ready reference to the clinician the lawyer advising his client and also for other interested laymen and for the reader's general information and knowledge Each chapter is structured to provide an overview of both the psychiatric and legal aspects of the subject matter Wherever applicable or feasible an analysis of local cases is made and comparative evaluation attempted with materials from other countries

especially those prevailing in common law and Anglo American jurisdictions The local law as presented in this book applies to both Singapore and Malaysia but where there exist differences these are highlighted in the text itself
