Organ Transplantation Frank P. Stuart, Michael M. Abecassis, Dixon B. Kaufman, 2003-01-01 Organ transplantation is increasingly complex and at the same time increasingly effective The lengthening waiting list for cadaver organs now exceeds the supply several fold Most practicing physicians encounter only a few transplant recipients during a year of practice This volume was written as a quick but comprehensive reference for medical

Biomarkers of Disease Andrew K. Trull, Lawrence M. Demers, David W. Holt, Atholl Johnston, J. Michael Tredger, Christopher P. Price, 2002-06-06 This publication takes a critical evidence based look at the efficacy of diagnostic tests which are increasingly being used to evaluate organ damage and dysfunction The use of biomarkers is growing with a steady stream of products being brought out by the pharmaceutical industry Some of these assist in diagnosis others provide a means of monitoring the state of progression of disease and the effectiveness of therapeutic options However in many cases the evidence which supports the use of these methods as opposed to traditional biochemical tests has not yet been demonstrated and it is intended that this volume will help clarify the strengths and weaknesses of using these biomarkers across a wide range of applications and in the various organs of the body This approach will provide pathologists clinical biochemists and medical laboratory scientists with an invaluable overview of the diverse applications of biomarkers in medicine

Late Graft Loss J.-L. Touraine, J. Traeger, H. Bétuel, J.-M. Dubernard, J.P. Revillard, C. Dupuy, 2012-12-06 In all varieties of organ transplants early results have dramatically improved over the past two decades and failures due to acute rejection are becoming rarer Efficient immunosuppressive regimens have been developed with the objective of very good results at 1 3 and 5 years Successful transplants however are significantly less frequent at 10 and 20 years and many patients require retransplantation Many factors are involved in late graft loss and it is now well recognized that in addition to chronic rejection a number of non immunologic factors play a prominent role In the case of renal transplantation a reduced mass loss transplantation of a single kidney sometimes from an

aged donor ischemic injury and alteration of some nephrons in the case of early acute rejection will result in slowly progressing chronic renal failure even in the absence of any supplementary attack of an immunological nature The new treatments must be analyzed in the light of their capacity to reduce these late failures Several preventive measures can also limit both immunologic and non immunologic factors of late transplant deterioration Chronic Allograft Failure Nasimul Ahsan,2008-07-14 This book addresses one of the largest unmet needs in transplantation the need to reduce late allograft loss In the current era it is reasonable to expect that most allografts will serve their recipients through their life span and death with preserved graft function the ultimate goal for all transplant recipients However long term allograft s

Regenerative Medicine Applications in Organ Transplantation Giuseppe Orlando,2013-10-11 Regenerative Medicine Applications in Organ Transplantation illustrates exactly how these two fields are coming together and can benefit one another It discusses technologies being developed methods being implemented and which of these are the most promising The text encompasses tissue engineering biomaterial sciences stem cell biology and developmental biology all from a transplant perspective Organ systems considered include liver renal intestinal pancreatic and more Leaders from both fields have contributed chapters clearly illustrating that regenerative medicine and solid organ transplantation speak the same language and that both aim for similar medical outcomes The overall theme of the book is to provide insight into the synergy between organ transplantation and regenerative medicine Recent groundbreaking achievements in regenerative medicine have received unprecedented coverage by the media fueling interest and enthusiasm in transplant clinicians and researchers Regenerative medicine is changing the premise of solid organ transplantation requiring transplantation investigators to become familiar with regenerative medicine investigations that can be extremely relevant to their work Similarly regenerative medicine investigators need to be aware of the needs of the transplant field to bring these two fields together for greater results Bridges the gap between regenerative medicine and solid organ transplantation and highlights reasons for collaboration Explains the importance and future potential of regenerative medicine to the transplant community Illustrates to regenerative medicine investigators the needs of the transplant discipline to drive and guide investigations in the most promising directions *Transplant International Official Journal of the European Society for Organ Transplantation* G. Opelz,W.A. Buurman,J.P. van Hooff,P. MacMaster,J. Wallwork,2013-11-11 This supplement to Transplant International contains the Proceedings of the successful 5th Congress of the European Society for Organ Transplantation held in Maastricht from 7 10 October 1991 Of 827 abstracts submitted to the congress 548 were selected by the Scientific Committee for either oral or poster presentation Of these 548 presentations the guest editors selected 212 full papers for publication in this book Two aspects are important where proceedings are concerned the quality of the papers and the speed of publication I thank our authors and guest editors whose combined expertise has given us a guarantee of quality I also thank our editorial and production teams for their tremendous efforts to hasten editing proofreading printing and publication

In particular I would like to express my gratitude to Maurits Booster M D and Sylvia van Roosmalen for their assistance and support in seeing this supplement through to completion As a concession to time we have waived some of our stringent rules of style and limited our correspondence with authors by for example page proofs being reviewed and corrected in house only This enables us to publish two months earlier but has the disadvantage that given the allotted time we have not been able to ensure that each and every article has an abstract nor that every i has been dotted in the reference lists or in the addresses institute affiliations of all the authors
